HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Loanwords in South-Bauchi-West Chadic Languages

B. CARON*

Abstract

The name “South-Bauchi-West (SBW) Chadic languages” identifies a dialect cluster located in the south of Bauchi State (Nigeria), first described in (Shimizu 1978). SBW languages can be characterized as both very close and united as a whole, and heterogeneous if we compare Zaar, the southernmost and numerically most important of them on the one hand, to the rest of the 25 or so other lects on the other hand (Caron 2006; Caron 2011). One way to account for this discrepancy is to start by reconstructing their proto-language and establishing their internal classification, which can then be plotted against their history and their socio-linguistic situation. This can only be done by setting the SBW lexical stock apart from the loanwords.

Once they have been set apart, the study of these loanwords provides some information which will contribute to the history of SBW languages. The present study aims at sorting out borrowings from Hausa and/or Arabic, from current neighbouring languages (Pyem, Afizere, Angas, etc.), and from languages that SBW speakers must have encountered during their migration from the Lake Chad area (Mohammadou 2004; Caron 2009).

This paper aims at identifying loanwords in SBW languages with the help of the RefLex lexical database [<http://www.reflex.cnrs.fr/>]. This study has a twofold interest: apart from the information on the lexicon and history of SBW languages, it will be an opportunity to test the performances of the database and its associated tools.

Introduction

SBW languages share the complex situations of all Nigerian languages of the Middle Belt. SBW populations arrived in the area, around the middle of the 14th Century, where they migrated from their original situation in Kanem, east of Lake Chad, round the North, before moving south-west. They went up the valleys of the rivers Yobe and Gana up to their sources north of the Bauchi hills where they settled around the middle of the 14th Century (Mohammadou 2004 : 116 ; see map XXX) . They migrated along with other Chadic and non-Chadic populations with whom they have kept and developed links mainly due to the slave trade (Bruce, 1982). Around 1750, there arrived in the area another group of Bantu settlers who came from the Upper Benue Valley (Ballard, 1971,

* UMR 8135 (Llacan). CNRS-Inalco. PRES Sorbonne Paris-Cité. caron@vjf.cnrs.fr. <http://llacan.vjf.cnrs.fr/>.

Mohammadou, 2002). The area came under the domination of the Hausas under Yakubu I, Emir of Bauchi (who reigned 1805-1845), and his successor Ibrahim (1845-1877)¹. British colonization set about pacifying the area at the turn of the 20th Century, intent on securing access to the tin mines near Jos². This has resulted in the present complex linguistic situation.

Apart from the dominant languages: English (official national language) and Hausa (dominant all over Northern half of Nigeria), SBW languages are surrounded by Niger-Congo languages in the West (*Izere, Birom*) ; in the East (*Jarawan Bantu*³) ; in the South (*Tapshin, Fyem, Kwanka*) and further South-East (*Tarok*). There exist isolates inside SBW languages (*Bankal* in the North and *Boi* in the South).

From the point of view of genetic classification, these surrounding languages belong to two sub-groups of Niger-Congo languages, Plateau and Jarawan Bantu languages.

Plateau :

- Izere (=Zarek, Afizere, Jarawan Dutse) : Central Plateau;
- Boi (=Ya, Tiya), just like Kwanka (=Kadung), belongs to the Ya-Vaghat-Bijim group, i.e. Western Plateau;
- Tapshin (=Sur), Tarok : Tarokoid Plateau;
- Fyem (=Pyem) : Southeastern Plateau;
- Birom : Biromic Plateau.

jarawan bantu :

- Bankal(awa) =Jaar(aawaa) : bantoïde, méridional, jarawan, nigérian.

SBW Languages

(Shimizu 1978) has identified South-Bauchi languages in the form of a dialect continuum with 9 language clusters defined by the classical method of lexical comparison and reconstruction. These *language clusters* are : 1 – Boghom ; 2 – Kir ; 3 – Tala ; 4 – Guruntum ; 5 – Zaranda ; 6 – Polci ; 7 – Zeem ; 8 – Dass ; 9 – Saya (see Map XXX in Annex). He has gathered the last 5 clusters into the South-Bauchi West group (SBW) which is studied here.

¹ Hogben & Kirk-Green (66 :464). (Mohammadou 2004) wrongly identifies Yakubu I's successor as Yakubu II. This Yakubu II reigned 1907-1941.

² The Royal Niger Company set a post at Ibi, on the river Benue, in 1883. From this base, they captured Wase in 1898 and moved northward into Goemal and the following year. The decisive steps were taken in 1902 when Temple, British resident in Bauchi, "first invaded the Plateau area in direct response to the needs of white tin prospectors". (Isichei 82:209)

³ The name Jar, or Jarawa is misleading since it refers to different populations, speaking different languages: the Jarawan dutse (Mountain Jars) speak Zarek (Zere, Zarek, Afizere, Ifizere), a Benue-Congo language, and the Jarawan Kogi (Plain Jars), speaking Jààr (Zhar), a Bantu language, commonly called Jarawan Bantu. Finally, the Jerawa are another population, speaking Zele, a Benue-Congo language from the Kainji group (Shimizu 1975).

The SBW languages are 23 in number :

- **zaranda** : bolu ; pelu ; geji (=gyaazi, gezawa) ; zaranda (=buu) ;
- **polci** : zùl (=mbarmi, barma) ; baram (=mbaram, barang) ; dir ; luri; buli ; langas (=nyamzax) ; lundur ; polci (=posə) ;
- **zeem** : zeem† (=tulai†) ; danshe (=chaari) ; lushi† (=lukshi†, dokshi†) ;
- **dass** : bàraza ; dùr (=bandas) ; zumbul (=bòodli) ; wandi (=wangdày) ; zòdì (=dott, dwàt) ;
- **saya** : zakshi (=zaksə) ; boto (=boot, bibot) ; zari (=kopti, kwapm) ; sigidi (=sugudi, sigdi, guus) ; zaar (=vikzar, avec les dialectes de Kal, Bogoro, Marti).

In the Megachad Congress that took place in Maroua in 2005, I gave a detailed account of the grammatical interferences between SBW languages and their neighbours, while giving only two or three examples of lexical borrowings. This paper is an attempt at providing a clearer picture of lexical borrowings in SBW languages, both in a qualitative and quantitative way.

Method

The survey was done in two stages: the first one consisted in a general systematic survey of the SBW vocabulary; the second one was aimed at comparing SBW languages with neighbouring non-Chadic languages with the help of Reflex. The sources used to identify and check the possible loanwords against other languages and reconstructions are listed at the end of the paper. These are essentially: Skinner 96 & Bargery for Hausa; Awagana, Löhr and Wolff for loanwords in Hausa and Kanuri; Newman, Ibrizimow & Jungraithmayr, Orel & Stolbova for reconstructions.

RefLex.

I used the RefLex database for this second part of the study. The available sources in the database were linked with Kraft's 434words list (Kraft, 1981). The resulting data sheets were checked manually. The choice of a wordlist ensured comparability for quantitative evaluation, and Kraft's was the largest available in the database. However RefLex still needs to be developed for the languages in study to be properly represented. At the moment, the only available sources are my own published lexical data on Zaar (Bogoro), Sigidi (aka Guus), Zodi, Luri and Zaranda, and some of Kraft's own data that were entered into RefLex: Bankala, Jaku (Jarawan Bantu) and Izere, or Jari (Benue-Congo). Pyem (Nettle, 1998) was added to the comparative table to complement the available sources. However limited, the results are still significant as will be seen below.

General survey.

The survey consists in a complete review of all the lexical data that I have collected and checked. These were tagged for borrowing, essentially from Hausa, when they were entered into a Toolbox database. These consist in 14 lects : Zaar (3 dialects : Bogoro (Zr), Kal (Zr.K) and Marti (Zr.M)); Sigidi (Sg); Zakshi (Zk); Chaari (Ch); Zodi (Zd); Polci (Pol); Diir (Dr); Luri (Lu); Buli (Bu); Geji (Gj); Pelu (Pel); Zaranda (Zda). The quantity of the

lexical data for each language is about 1,000 lexical items, with two exceptions: just under 3,000 items for Zaar of Bogoro; 145 items for Luri.

Analysis

RefLex as a tool for reconstruction and sociolinguistic analysis

Using RefLex spreadsheets, the comparative study of SBW and their neighbouring non-Chadic languages can be done quite easily. Out of an ideal situation where a regular series enables us to find a common root, some exceptions point at a possible loanword (one way or another), while other cases are more confusing and point to the possibility of a word common to the whole area.

Bona fide AA/Chad & SB etymologies

meat⁴: P.Chad (N): **l̥aw-*; P.SB (Sh) **l̥aw*

- Sg : *tù*; Zđ : *tòò* ; Pol : *tó* ; Lu : *tùù* ; Zar : *tùù* ;
- Hausa : *nāmā* ; Angas : *nam*

die⁵: SBW: *məs*; P.Chad (N) **mətə*

- Zr: *məs*; Sg: *məs*; Pol: *məs*; Zđ: *məs*; Lu: *məs-kù*; Zar: *máf*
- Hausa: *mutù* ; Angas: *mùt*

mosquito⁶ P.Chad 'fly' (N):**pəra*

- Zr (fly): *bǎrám*; Sg: *vùrùŋ-sà* (pl.); Zđ: *fùrèèn*; Pl: *vùrèn*; Lu: *vùrèèn*
- Hausa: *kudā*, 'fly'; *saurō*, 'mosquito'; Angas: *nf*út* (mosquito)

Anomalies

Some forms stand out from the SBW series and can be related to neighboring non-Chadic languages, e.g. Jarawa (Bankala, Jaku) and Plateau (Fyem).

Beans

- Zr: *zà:m* ; Sg : *zà:m* ; Pol : *za:m*; Zar: *za:m*
- Zđ: *kún* ; cf. Bankala: *kúwún*; Jaku: *kùn* , 'beans'.

Bird: P.Chad (N): **ɕəy-7*;

- Zr : *yeí* ; Sg : *yà:í* ; Pol : *yá:í* ; Lur : *yá:í* ; Zar : *yá:í*;
- Zđ : *jàl* ; cf. Bankala : *jàl* ; Jaku : *jàl* , 'bird'.

⁴ P.WChadic (OS): **ɕa/uw-*; Meaning: 'meat' 1; **lwa-*; Meaning: '(wild) animal' 1, 'meat' 2; **laHam-/*lamam-* Meaning: 'meat' 1, 'k of gruel' 2; **ɽara/w/*; Meaning: 'bull' 1, 'meat' 2; **nim-/*nam-*; Meaning: 'bull' 1, 'meat' (?pl.) 2, 'wild animal' 3

⁵ AA (OS): **waḥ-*; **gwāɽ-*; **mawVt-*.

⁶ P.AA (OS): **bariy-* (?) ; Meaning: insect; Berber: **bVriḵ-* 'mosquito' 1, 'flying ant' 2 ; Western Chadic: **buruk-* 'mosquito' ; Central Chadic: **bwarVg-* 'louse' ; East Chadic: *bVrVg-* 'water insect' 1, 'caterpillar' 2

⁷ No clear correspondance in P.Chad or P.AA.

These are clear cases of Zodi borrowing from the neighbouring Jarawa languages of Dass.

Heart and liver

In SBW, 'heart' and 'liver' are originally referred to by the same word, *mbaɬ*. In some cases, individual languages have borrowed to differentiate the two meanings:

- Heart & liver: Pol: *mbaɬ*; Bl: *mbáɬ*; Lr: *mbàɬ*; Gj: *mbáɬ*; Pel: *mbáɬì*.
- Heart: Zda: *mbáɬì* (liver: *hántà*: < Hausa *hantà*)
- Liver: Zr: *mbaɬ* (heart: *rā*; cf. Pyem *ría*)

In this case, Zaar seems to have borrowed the word for 'heart' from Pyem, the neighbouring Plateau language. Another case of borrowing from Pyem comes from the word for 'quiver' in Sigidi:

Quiver

- Zr: *kibm*; Zda: *kibàn*⁸
- Sig: *bùtúr*; cf. Pyem *botori*, 'quiver'

This points at Sigidi borrowing from their neighbour Pyem, a Plateau language related to Birom. However, other cases point in a different direction, with neighbouring Plateau and Jarawa languages borrowing from SBW.

Baboon

- Zr: *fwǎkn*; Sg: *fökn*; Zđ: *fwàŋ*; Zda: *hó:gèŋ*
- Pyem: *fwàŋ*

Sour

- Zr: *ndzáŋ*; Zr.K: *ndzam-ní*; Zr.M: *ndzam*; Zk: *ndzâm-i*; Zđ: *nzòŋ-í*; Pol: *ndzwan*; Ch: *ndzâm*⁹
- Pyem: *nzɔŋ*, 'sour'.

When the root is present all over the SBW area, and not only in Sigidi (close to Pyem) or Zodi and Polci (close to Bankala and Jaku), it is difficult to decide in which direction the borrowing took place. The situation is that of a vocabulary common to the area, regardless of the genetic affiliation of the individual languages.

Man/Child

Two etymons (*máni* and *wún*) are found straddling the language borders:

- *máni*: Sg: *ma:n*, Zđ & Lu: *máni*, 'man, husband'; Pol: *máni*, 'man, husband'; Zđ: *mán*, 'male'; Zr: *məmwâ:n*, 'man', *môn* 'slave'; Bankala: *món*, 'boy'; *món bàrò*, 'baby'; Jaku: *mín*, 'child'; *mínmin*, 'baby'

⁸ Note: Zaar is situated in the extreme South and Zaranda in the extreme North of the SBW area, which gives weight to the hypothesis that *kibàn* is the common SBW form.

⁹ Sigidi uses *ɬaw*, 'be sour', which is another meaning of the verb *ɬaw*, 'to cut'. The Zaranda group of SBW languages (Zaranda, Geji, Pelu) share another root: Zaranda: *mbéy*; Geji: *mbay*; Pelu *mbàyí*.

- **wún**: Pyem: **wún**, ‘boy’; Zodi: **wún**, ‘daughter’, ‘child’ in **wún mán**, ‘male child’, **wún bàrtò** ‘baby’ (cf. Bankala: **mún bàrò**, ‘baby’); Polci: **wún**, ‘daughter’, ‘child’ in **wún kòn**, ‘male child’ (cf. Zr **kúni**, ‘boy’), **wún bàrtó** ‘baby’

Horse (< Arabic)

- Zr: **pərfi**; Zd: **pərsi**; Pol: **pírsí**; Lu: **pərzí**; Zda: **bə:sí**
- Bankala: **pírís**; Jaku: **pírsi**

NB: Sg and Zr.K **zúr** probably borrowed from Pyem **zirí**.

Vulture

- Zr: **kwádâk**; Zd: **kúdák**; Pol: **kwádák**
- Bankala: **kwədák**; Jaku: **kwòdoyò**

Sweet potato

- Zr: **la:wur**; Sg: **la:wur**; Pol: **làwúr**
- Bankala: **làwóru**; Pyem: **lávúr**

NB: the other SBW languages have borrowed the Hausa form **dànkali** (Zd: **dànkáli**; Zda: **dànkáli**). The form **la:wur** may have been borrowed from Hausa too¹⁰.

General survey

The loanwords are listed in the Annex, sorted in alphabetical order by their English translation, followed by their Hausa translation and the forms in the SBW languages. They reach 825 items in number.

Quantitative elements

	Gen.Surv. (Ha & Eng)			Reflex (non-Chad)		
	Total	Loans	%	Total	Loans	%
Zaar (B.)	2959	422	14,2%	459	5	1
Sigidi	846	109	13%	336	5	1,5
Zodi	1082	260	24%	386	17	4,5
Polci	890	142	16%	364	10	2,7%
Luri	145	7	2,75%	101	1	1%
Zaranda	848	192	22,7%	324	2	0,5%

Comments : Luri, with a very short wordlist limited to basic vocabulary, has unsurprisingly few loanwords

¹⁰ NB: the form **la:wur** is furthermore present in Mwavavul, Ron Fyer, and North Bauchi languages (Skinner 96). Cf. Hausa **lávur** “(n.m.). 1. The white variety of sweet potato, but sometimes applied also to the red kind. (Vide *dankali*.) 2. A short variety of bulrush-millet which ripens quickly. 3. Applied to the meat which was dried in huge quantities at the time of the rinderpest of 1890-91. 4. Trousers embroidered with magenta thread.” (On-line Bargery). Cf. the Hausa ideophone: **wur** “(adv.). Emphasizes redness. e.g. ja wur, very red. (= jir; zir; zur.)” (*idem*)

In the general survey, Zodi, Polci and Zaranda have the highest score. For Zodi and Polci, this may be due to their total conversion to Islam, which is accompanied by a strong Hausa influence. As for Zaranda, this may be due to language attrition.

Zodi is the language that shows the highest influence from the non-Chadic neighbours, i.e. Jarawan Bantu Bankala and Jaku.

Qualitative elements

The influence of Hausa is very strong on all the languages of the area. As expected, it is mainly concentrated on the activities connected to modern life (cars, motorcycles, petrol lamp, etc.), and especially the vocabulary of state, administration (traditional titles, police, prison), Islam and activities associated with the Hausa (trade, horses and their equipment, clothes, etc.).

This holds true for English as well, when its vocabulary is directly borrowed into SBW, especially by the younger educated generation.

More surprisingly, a large part of the vocabulary associated with nature, e.g. large animals is borrowed from haoussa, as well as the name of a certain number of trees. This is probably linked to the extinction of large animals from the area, and the shift of interest of the speakers from rural life to modern life. As a result, these animals and plants have disappeared from their active practical knowledge, and they only have a theoretical, abstract knowledge that has reached them through Hausa.

From a grammatical point of view, contrary to the vocabulary directly borrowed from English¹¹, the parts of speech concerned are not only nouns but also:

- verbs, including the auxiliary verbs (*taba, riga, dinga*, 'have already');
- grammatical tools such as conjunctions (*ko da shi ke*, 'although'; *don*, 'because, in order that'; *in*, '(conditional) if'; *dã*, '(hypothetical) if' *kafin* 'before'), the reported speech particle *wai*;
- relative pronouns (*yadda*, 'the way that'),
- copulas (*akwai*, 'there is'; *kenan*, 'it is');
- negative markers (*bã*, 'not')
- discourse particles (*kõ*, 'as for'; *dai*, 'indeed'; *sam*, 'at all'; *mã*, 'even'; *mànà*, 'indeed', etc.)
- ejaculations of surprise (*inã, àshē*), pain (*wâyyō*), etc.¹²

¹¹ One exception concerns the verb 'tear' in the Kal dialect of Zaar.

¹² It should be noted that, contrary to what use to be held as true, grammatical morphemes and systems are not immune to replacement by loanwords. This confirms what was noted in Caron, B. (2009). *Les Zaars et leurs voisins*. In Tourneux, H. & N. Woïn (eds.) *Migrations et mobilité dans le bassin du lac Tchad*. Marseille: IRD. concerning the influence of Niger-Congo languages on the morphology of northern SBW languages, e.g. the second person plural verbal suffix *-əN*, Zaar sentence-final interrogation morphemes, etc. Cf. (Nettle 98) for the same phenomenon in Pyem.

Dating loanwords

We shall take examples from Zaar concerning the clues we can use if we want to know how more or less recent a Hausa loanword is. These are essentially due to phonological properties that were first established in (Schneeberg 1974)

Tones

Hausa words with *High tone patterns are lowered to *Mid when borrowed into Zaar, a 3-tone language: Ha *mákáǎántá* > Zr *mákarántá*. In recent borrowings, this rule has not (yet) applied: Ha *kúmá*, 'too' > Zr *kúmá*; Ha *gárá* 'it's better that...' > Zr *gárá*, which contrasts with the older loanword *gárá*, 'a type of gift' > Zr *gárá*.

Consonant mutation

Intervocalic plosives are glottalized in Zaar. Older Hausa loanwords follow the rule: Ha *dàbāǎǎ*, 'plan' > Zr *dàbá:ra*. Recent loanwords that have not been integrated into the phonological system do not follow the rule: Ha *ǎǎdiyò* [< English 'radio'] > Zr: *rè:díyo*.

Older Hausa etymons

Some Hausa words are borrowed with a form that does not correspond to the dialectal form used in Bauchi, but to a form that is identified with the Sokoto/Katsina dialect, and pre-dating the consonant mutation that has been identified by Klingenheben¹³, e.g. Zr *dàmru* < Sokoto Ha *dàmrō*, *dàrmō* (Standard Ha, *dàurō*), 'type of bulrush millet'; Zr *sapká* < Sokoto Ha *sàpka* (Standard Ha *sàuka*), 'alight'.

Since SBW speakers are not in contact with these dialects, the loanword is necessarily ancient, or, at least, predates the spread of Hausa through school and the modern media.

Conclusion

This study of loanwords in SBW confirms what has been already underlined in my previous paper on the grammatical influence of Niger-Congo languages on SBW: an original complex situation, with long-standing (600 years) commercial and marital relationships between all the populations of the area (Pyem and the southern SBW; Jarawan Bantu and the Northern SBW) further compounded by the (relatively) recent linguistic domination of Hausa. This forces us to be extra careful when trying to reconstruct, classify or simply compare these languages. It's only after close examination of the situation to remove areal and borrowed lexical and grammatical features that the classical tools of comparative linguistics can be used to elicit the true nature of SBW and other languages spoken in the Nigerian Middle Belt. And once again, we need good, reliable, well analysed data to rely on.
