Kāśikāvṛtti and Cāndravyākaraṇa:  
*A Comparison of the Pratyāhārasūtra Section*<sup>1</sup>

*Introduction*

This paper is devoted to a comparison of the *Pratyāhārasūtra* (psū) section of the *Cāndravyākaraṇa* with that of the *Kāśikāvṛtti*. The *Cāndravyākaraṇa* is a grammar of the Sanskrit language, composed in Sanskrit and intended for Buddhists. Although it has disappeared from the Indian territory, it has been maintained and transmitted in countries where Buddhism became widespread.<sup>2</sup> The aim of its author, the Buddhist scholar Candragomin, who is thought to have lived around the 4<sup>th</sup>-5<sup>th</sup> century CE, is to present an effortless, clear and exhaustive grammar. In fact, it is the first great revised edition of the *Aṣṭādhyāyī* (A.) of Pāṇini: Candra preserves most of the content of the Pāṇinian treatise but forsakes its generative pattern and adopts a thematic scheme. He also incorporates some of Kātyāyana's and Patañjali's suggestions.

The present study is justified in so far as the *Kāśikāvṛtti* shows numerous similarities with the commentary on this grammar (the *Cāndravyātī*—CV—which was believed for a long time to

<sup>1</sup> I warmly thank Pascale Haag, Vincenzo Vergiani and Thomas Oberlies for their remarks, criticisms and advice. I would also like to thank Saroja Bhate for her help in reading the *Pratyāhārasūtra* section of the C.

<sup>2</sup> Cf. Balbir (2000: 270-71).

have been composed by Candra himself; today some scholars maintain that its author was a certain Dharmadāsa<sup>3</sup>), even if the *Kāśikāvṛtti* does not make reference to it explicitly. To date, the origin of these similarities has given rise to two main hypotheses. According to one view, defended in particular by R. Vedalankar (1977: 250-69) and P. Visalakshy (1981), the *Kāśikā* was influenced by the *Candravyākaraṇa* and the *Candravṛtti*. According to another, both the *Kāśikā* and the *Candravṛtti* were inspired by another text: S.D. Joshi, J.A.F. Roodbergen (1991-1992) and J. Bronkhorst (especially 2002: 185-195) believe that this common source probably belonged to the Pāṇinian tradition; T. Oberlies (1996: 285-86) thinks that it was rather a lost commentary on the *Jainendravyākaraṇa*.

The study of the psū section of the *Candravyākaraṇa* with its *vṛtti*, compared to that of the *Kāśikāvṛtti*, confirms the existence of numerous similarities between the two texts; very few elements of the *Candravṛtti* are not found in the *Kāśikāvṛtti*. In order to grasp somewhat better the peculiarities of this parallelism, I have examined the divergences shown by the two texts: for what reasons do they differ in some passages?

As I will try to show in this paper, some divergences can be explained very simply. This is particularly the case of the differences related to the reference text (cf. 2.2): the *Candravṛtti* refers to Candra's *sūtras*, whereas the *Kāśikāvṛtti* refers to Pāṇini's. This is also the case of the differences in vocabulary (cf. 2.2 "Other divergences"): it is indeed well-known<sup>4</sup> that the technical terminology used by Candra differs considerably from the one used by Pāṇini. It is more difficult to justify some other divergences, like the presence or the absence of sequences or of sentences. The third part of this paper is essentially devoted to this kind of problems.

### *1. Presentation of the psū section of the two texts*

Some details concerning the conventions adopted in this paper:

- a) underlined types indicate that the sequence in question differs in both texts;
- b) bold-faced types indicate that the sequence in question is found in both texts but in different places;

<sup>3</sup> Cf. Dash (1986: 17-21), Oberlies (1996: 267; 2006: 380-81). For a different view on this issue, cf. Bronkhorst (2002: 182-85).

<sup>4</sup> Cf. Dash (1980; 1986: 54-62).

c) the numbering [1] etc. corresponds to the one adopted for the present critical edition of the psū section of the *Kāśikāvṛtti*;

d) in tables 2.1 and 2.2, the = symbol indicates a correspondence, the ≠ symbol indicates a non-correspondence;

e) abbreviations:

[SS]: several missing sentences

[S]: missing sentence

[W]: missing word

[EX]: missing example

[SU]: missing *sūtra*;

f) reference edition of the *Cāndravyākaraṇa* and the *Cāndravṛtti*: *Cāndra-vṛtti, der original Kommentar Candragomin's zu seinem grammatischen Sūtra*, herausgegeben von Bruno Liebich, Abhandlungen für die Kunde des Morgenlandes 14, Leipzig, 1918 [reprint: Kraus Reprint Ltd., Nendeln, 1966];

g) reference edition of the *Kāśikāvṛtti*: the critical edition presented in this book.

## 2. Types of divergences

I distinguish three types of divergences:

First type: several sentences, a sentence, a word, an example or a *sūtra* are present or absent in one text, but not in the other. This type of divergence becomes clearly visible in the parallel presentation of the two texts: for example, in section [2], the symbol [SS] that appears in the *Cāndravṛtti* text corresponds to the underlined sentence sequence *atha... lakṣaṇena* of the *Kāśikāvr̥tti* text; the symbol [W] that appears in the *Kāśikāvr̥tti* text corresponds to the underlined word *hi* of the *Cāndravṛtti* text.

In this type of divergences, I include the cases of sequences that are in both texts but at different places. These cases, indicated by bold-faced types, are the following: [14 CV] = [18-19 KV] and [17 CV] = [21 KV].

Second type: divergences concerning words of common usage and examples. See table 2.1, part 3.1 (common usage vocabulary) and part 3.2 (examples);

Third type: divergences related to the reference text. See table 2.2, part 3.1 and part 3.3.

### 3. Analysis

#### 3.1 Terminology

Generally, on the terminological level (cf. 2.1 and 2.2 “Other divergences”), the *Cāndravṛtti* seems to be more precise than the *Kāśikāvṛtti*.

a) Concerning the words of common usage (cf. 2.1), one observes that when the different vocalic phonemes with which the *anubandha* is articulated have to be mentioned, the *Cāndravṛtti* uses *uccāraṇa*, a term that refers explicitly to the pronunciation, whereas the *Kāśikāvṛtti* resorts to *grahaṇa*, a

a term with a wider extension, which is not related specifically to the articulation of sounds.<sup>5</sup> Moreover, the *Kāśikāvṛtti* uses *grahaṇa* in other contexts, like in [15], while the *Cāndravṛtti* employs the word *upādāna*. Another divergence concerning the vocabulary of common usage is to be noted: in [11], the *Cāndravṛtti* resorts to *jñāpaka* “teaching, indication” where the *Kāśikāvṛtti* uses *ācāra* “masters’ practice”. One may explain this divergence by the fact that Candra, the founder of his own school, does not have any authority to follow, unlike the authors of the *Kāśikāvṛtti*: the word *ācāra* evokes, more frankly, the “weight” of the tradition or of a spiritual heritage, while from this viewpoint *jñāpaka* seems more neutral.

b) As for the technical vocabulary (cf. 2.2 “Other divergences”), several criteria can explain the choices of Candra and his commentator. It would seem that, in general, the *Cāndravṛtti* prefers a transparent or descriptive terminology<sup>6</sup>: one notes particularly the use of *natva* (in [13]), of *ñamādeśa* (in [15])<sup>7</sup> and of *yamādeśa* (in [15]), terms that correspond to *vināma*, *anunāsika* and *parasavarṇa* respectively in the *Kāśikāvṛtti*.<sup>8</sup> In addition to this transparency, some of the terms used in the *Cāndravṛtti* have a narrower extension than the terms to which the *Kāśikāvṛtti* resorts: *natva*, for example, refers exclusively to the cerebralization of *n*, while *vināma* designates the cerebralization of both *n* and *s*. Another example is the expression *yamādeśa*, used instead of *parasavarṇa*: the former refers to a nasal substitute, whereas *parasavarṇa* designates any homogeneous phoneme. In other cases, the subtleties of the Pāṇinian analysis are obliterated in favour of generalization and, therefore, of simplification: the sequence *-ññ* in an utterance such as *udaññ āste* “he is seated in the northern direction” is described, in the *Aṣṭādhyāyī*, as the addition of an augment (*āgama*) identical with the final consonant of the previous

<sup>5</sup> Otherwise, the term *grahaṇa* is used very frequently in Kātyāyana’s *vārtikas* and in the *Mahābhāṣya*.

<sup>6</sup> Remember that the *Cāndravyākaraṇa* is presented as a termless grammar: *candropajñam asamjñakam vyākaraṇam* (*Cāndravṛtti* on *Cāndravyākaraṇa* 2.2.68).

<sup>7</sup> The abbreviation *ñam* is already used in the *uṇādi-sūtras* (cf. Cardona 1976: 148). It is therefore an ancient grammatical term, not proper to Pāṇini.

<sup>8</sup> Note, moreover, that the two technical terms *vināma* and *anunāsika* are known to be very ancient (cf. Renou 1942, 3<sup>rd</sup> part, s.v., and Abhyankar, 1961, s.v.), whereas the terms used by Candra and in the commentary appear with Pāṇini (like *parasavarṇa*) or even after him (like *natva*).

word; Candra and his commentator consider the same sequence as a simple reduplication (*dve, dvitva*) of the consonant (cf. [23]). Likewise in [32], the *Cāndravṛtti* resorts to the term *adeñvikalpa* (lit. “option of |a|, |e| or |o|”) where the *Kāśikāvṛtti* uses *kittva*, the phenomenon referred to here is the optional realization of *guṇa* vowels, conditioned by the presence of some suffixes optionally bearing the marker *k* (hence *k-itva*): the expression *adeñvikalpa* in the *Cāndravṛtti* simply mentions the optional realization of the *adeñ* vowels, that is, it lays stress on the phenomenon itself, while the expression *kittvavikalpa* in the *Kāśikāvṛtti* refers to the optionality of the marker *k* with some suffixes, which conditions the realization of the *guṇa* vowels, thus emphasizing the cause of the phenomenon.<sup>9</sup> These terminological choices, which are possible because of the absence of an authority to be respected,<sup>10</sup> can be explained by the will of making Pāṇini’s grammar less ambiguous and more accessible.<sup>11</sup>

However, it should be noted that this tendency to simplification is not systematic. For example, in [13] the *Cāndravṛtti* resorts to the technical term *nuK* where the *Kāśikāvṛtti* uses *nuD*. One may think that the *Cāndravyākaraṇa* and the *Cāndravṛtti* wanted to generalize the term *nuK* instead of using the three items *nuK*, *nuD* and *nuM*<sup>12</sup> found in the *Aṣṭādhyāyī*. This is not the case, though, for it appears that Candra and his commentator also resort to the two other terms.<sup>13</sup>

### 3.2 Examples

Below I give a table where all the examples quoted in both texts occur.<sup>14</sup>

<sup>9</sup> See Translation, n. 54.

<sup>10</sup> This fact, already mentioned, can equally explain the choice of a term such as *pratyāsannatara* in [16] where the *Kāśikā* uses *antaratama*, a usual term in the Pāṇinian tradition (cf. A. 1.1.50).

<sup>11</sup> It is interesting to notice that the *Jainendravyākaraṇa* of Devanandin (500 or 700 AD?), the oldest work of the Jain school of grammar known to us, which is also based on Pāṇini’s treatise, does not follow the same tendency as Candra. Instead of simplifying and clarifying the rules, Devanandin retains and even expands further the economy of expression (on this point, cf. Scharfe 1977: 168).

<sup>12</sup> These three terms designate three kinds of *n* infixes. For *nuK*, cf. e.g. A. 4.1.32, for *nuT*, cf. e.g. A. 7.1.54 and for *nuM*, cf. e.g. A. 7.1.58.

<sup>13</sup> *nuD* occurs in C. 2.1.32 and C. 5.2.93 particularly; *nuM* occurs in C. 5.4.10 and following.

<sup>14</sup> The order in which the examples of the table occur is identical with that of their quotation in the texts.

	<i>mahā hi saḥ</i> <i>devā hasanti</i> <i>brāhmaṇo hasati</i>	[33]

I will start with two general observations:

- 1) only 3 of the 14 examples quoted in the *Cāndravṛtti* do not occur in the *Kāśikāvṛtti*;<sup>15</sup>
- 2) the *Kāśikāvṛtti* gives many more examples than the *Cāndravṛtti* (27 to 14).

These two tendencies characterize the whole section: the quasi-totality of what is said in the *Cāndravṛtti* occurs in the *Kāśikāvṛtti* and the *Cāndravṛtti* is less detailed than the *Kāśikāvṛtti*.

<sup>15</sup> As is shown in the Introduction, section 2.2.3 (h), the majority of the mss read both *snihitvā* and *snehitvā*. Thus, if one considers the majority reading, only 2 of the examples are not found.

- a) The examples quoted in [7] are found in the *Mahābhāṣya* (vol. 1, p. 19): *kṛ̥ptasikha*, *kṛ̥ptah*, *prakṛ̥ptah*. However, it should be noted that the item *kṛ̥ptavān* is missing in the *Mahābhāṣya* and that the item *kṛ̥ptah* does not occur in any of the texts studied here.
- b) The examples quoted in [8] are found in the *Mahābhāṣya* (vol. 1, p. 19): *aśaktyā kayācid brāhmaṇyā ṛtaka iti prayuktavya ṛtaka iti prayuktam | tasyānukaraṇam brāhmaṇy ṛtaka ity āha kumāry ṛtaka ity āheti*. Although the subject under discussion and the examples are the same, the form of the passage is slightly different in the *Mahābhāṣya* and in the two texts compared here.
- c) Among the examples quoted in [15], the following occur in the *Mahābhāṣya* (vol. 1, pp. 27-28): *anunāśikasya. svar nayati prātar nayatīti [...]*; (vol. 1, p. 27): *dvirvacanasya. bhadraḥradāḥ madraḥrada iti [...]*. It is to be noted that the order in which the last two examples are quoted is not the same in the *Mahābhāṣya* and in the *Kāśikāvṛtti*.<sup>16</sup>
- d) Among the examples quoted in [15] and [16], the following occur in the *Mahābhāṣya* (vol. 1, p. 28): *parasavarṇasya. kūṇḍam rathena. vanam rathena*.
- e) Among the examples quoted in [17], the following occur in the *Mahābhāṣya* (vol. 1, p. 28): *kim prayojanam. ḡnatvam. urah kena, urah pena*.<sup>17</sup>
- f) The examples quoted in [20] are found in the *Mahābhāṣya* (vol. 1, p. 16): *tad yathā. saṄṄyantā saṄṄvatsara yaṄṄlokam taṄṄlokam iti. anusvārah sthānī yaṄṄam anunāśikanam prakalpayati*.
- g) Among the examples quoted in [32], the following occur in the *Mahābhāṣya* (vol. 1, p. 27): *yadi pūrvopadesāḥ kittvam vidheyam. snihitvā snehitvā. sisnihiṣati sisnehiṣati. [...]. ksavidhīḥ. kṣaś ca vidheyah. adhukṣat alikṣat. [...]. idvidhīḥ. it ca vidheyah. rudihi svapihi. [...]. jhalgrahanāni ca. [...]. adāgdhām adāg�ham*. It is to be noted that not all the examples given in the *Mahābhāṣya* appear in the two texts compared here.
- h) Among the three examples quoted in [33], which occur only in the *Kāśikāvṛtti*, the following are found in the *Mahābhāṣya* (vol. 1, p. 27): *ihāpi yathā syāt. mahā hi saḥ. [...]. ihāpi yathā syāt. puruṣo hasati. brāhmaṇo hasatīti*. It should be noticed that the example *devā hasanti*, quoted in the

<sup>16</sup> F. Kielhorn (1880) mentions the following variant: L. 1 Ben. *madraḥradāḥ bhadraḥradāḥ*.

<sup>17</sup> F. Kielhorn (1880) mentions the following variant: L. 21 *urahkena urakeṇa. urahpeṇa urapeṇa*. The edition of Dr. Bal Shastri (2001, 6 vol.) selects the version with four examples.

*Kāśikāvṛtti* in order to show that *h* has to be included in the abbreviation *aś*,<sup>18</sup> does not occur in the extract of the *Mahābhāṣya* quoted above (the two examples *puruṣo hasati* and *brāhmaṇo hasati* illustrate one and the same fact, which results from the application of the rule A. 6.1.114 *haśi ca*).

Conclusive remarks concerning the examples:

(1) in half of the cases (i.e. [8], [15], [16], [20]), the examples quoted by the *Kāśikāvṛtti* seem to be directly borrowed from the *Mahābhāṣya*;

(2) in the case of the examples occurring in [7], it is not impossible that the *Kāśikāvṛtti* based itself on the *Cāndravṛtti* or that both borrowed from a third source: the items are the same and are quoted in the same order. Likewise, in the case of section [32], not all the examples of the *Mahābhāṣya* have been preserved and one observes that both texts have selected the same items (concerning *snehitvā*, cf. Introduction, section 2.2.3 (h));

(3) among the four examples quoted in the *Kāśikāvṛtti* which do not occur in the *Mahābhāṣya* (i.e. *klpptavān*, *ura keṇa*, *ura pena* and *devā hasanti*), only one is quoted in the *Cāndravṛtti* (i.e. *klpptavān*); in most cases, then, any hypothesis of borrowing from this text is excluded. In order to explain the examples *urah keṇa* and *urah pena*, one can invoke the use by the *Kāśikāvṛtti* of a version of the *Mahābhāṣya* where the four items *urah keṇa*, *urah keṇa*, *urah pena* and *urah pena* were quoted (cf. note 15). In order to explain the example *devā hasanti*, which does not seem to appear in any version of the *Mahābhāṣya*, one may wonder whether this is an innovation or a borrowing from a source other than the *Cāndravṛtti*.

### 3.3 Presence/absence of some sequences

The question is now to explain the presence or the absence of some sequences. My assumption is that the presence of a sequence can be explained by the problem(s) that it is supposed to solve (conversely, the absence of a sequence might indicate the absence of a problem to be solved).

<sup>18</sup> It is only if *h* is included in *aś* that the rules A. 8.3.17 and A. 8.3.22 will apply. If so, one can obtain the form *devā hasanti*. In order to obtain the form *mahā hi saḥ*, *h* has to be included in *aT* (so that A. 8.3.9 and 8.3.3 will apply) and in *aś* (so that A. 8.3.17 and 8.3.22 will apply). Thus, the form *devā hasanti* does not really bring any new information, nor does it teach anything more than the form *mahā hi saḥ*.

Beginning of section [2]: the sentence *atha śabdānuśasanam*, which is found only in the *Kāśikāvṛtti* (and in all manuscripts, see Edition, p. 00), seems to be a direct borrowing from the *Mahābhāṣya*. According to Kaiyatā,<sup>19</sup> the purpose of this sentence is to inform about the direct or ultimate aim of grammar. Nāgeśa<sup>20</sup> specifies that the use of the word *atha* is explained by its auspicious character. As it is not really meant to solve a major problem, this may explain the absence of this sentence in the *Cāndravṛtti*.

The absence of the sequence *keśāṁ śabdānāṁ? laukikānāṁ vaidikānāṁ ca*<sup>21</sup> in the *Cāndravṛtti* can be explained by the fact that Candra's grammar does not deal with Vedic words (or that it possibly dealt with them separately, in a lost section<sup>22</sup>). If there is no alternative, this precision loses indeed its *raison d'être*. One will observe that the sequence *katham anu°...lakṣaṇena* of the *Kāśikāvṛtti*, relating to the manner of imparting the teaching of words, does not occur verbatim in the *Paspāśā*.

Section [3]: the sequence *jātinirdeśas cāyam* of the *Cāndravṛtti* (which occurs also in [14] and, in a slightly different form, in [17]), which is missing in the *Kāśikāvṛtti*, could be a reformulation of the vārttika *ākṛtyupadeśat sidhham* (particularly *Paspāśā*, vol. 1, p. 75) "This (i.e. the teaching of all the phonemes including high-pitched, low-pitched, modulated, nasalized, long, trimoric) is realized because of the teaching of the generic form."<sup>23</sup> It is to be noted that this remark does not occur in the corresponding section of the *Kāśikāvṛtti*.

Section [4]: the sentence sequence relating to the /a/ phoneme which occurs in the *Kāśikāvṛtti*<sup>24</sup> does not occur in the *Cāndravṛtti*, probably for the following reason: the question of the degree of openness of the /a/ phoneme seems to be a typical topic of Prātiśākhya and Śiksā works, technical treatises of the Vedic literature; thus, once again, if

<sup>19</sup> Vol. 1, p. 3.

<sup>20</sup> Vol. 1, p. 5.

<sup>21</sup> Which is also a borrowing from the *Mahābhāṣya* (cf. *Paspāśā*, vol. 1, pp. 3 and 6).

<sup>22</sup> On this point, see the first note of K.C. Chatterji, in his edition of the *Cāndravyākaraṇa* (p. 1).

<sup>23</sup> On the *ākṛtipakṣa* and the reasons for not accepting it, cf. Deshpande 1975: 17-31.

<sup>24</sup> The *Mahābhāṣya* also takes up the question of the opening of the /a/ phoneme, but the discussion is not worded in the same terms (cf. *Mahābhāṣya* on *a i u ī*, vol. 1, p. 79 ff.).

Candra does not deal with Vedic words, why should he refer to treatises relating to these words? Another fact that shows Candra's lack of interest in the degree of openness of /a/ is that there is no *sūtra* in the *Cāndravyākaraṇa* corresponding to the last *sūtra* of the *Aṣṭādhyāyī* (i.e. A. 8.4.68: *a a*).

Section [11]: the verse quoted in [11] recalls four *vārtikas* on *ha ya va ra Ṭ* (vol. 1, p. 144). On the use of the terms *ācārāt/jñāpakāt*, cf. 3.1.

Section [17]: the sequence *aṭām madhye... ḷatvam yathā syād iti* in the *Kāśikāvrṛti* could be a slightly altered borrowing from the *vārtika* on vt. 6 ad *ha ya va ra Ṭ* (vol. 1, p. 133) or a borrowing from a third unknown source. This sequence deals with the teaching of the phonemes called *ayogavāha* (lit. “that which pulls without being harnessed”, i.e. attested without being taught), namely *visarjanīya, jihvāmūliya, upadhmānīya, anusvāra, anunāsikya* and *yama*. The vt. 6 stipulates that these units have to be taught between the psū 1 and 5 so that the *ṇ* substitute of *n* is realized after *r* or *s*, also when a vowel, a semi-vowel or *ḥ* are inserted between them (cf. A. 8.4.2 and note 1, p. 291 in the French translation of P.-S. Filliozat, 1975). Thus, this passage partly concerns the organization of the *Aṣṭādhyāyī* (teaching of the *ayogavāha* phonemes in the psū section) and, if one excepts the *visarjanīya*, refers to phonetic facts which occur mostly in Vedic language (*jihvāmūliya, upadhmānīya*), which may explain its absence from the *Cāndravṛtti*.

Section [20]: the sequence *sāyঃyantā... yathā syād iti* of the *Kāśikāvrṛti* may be a borrowing from the *Mahābhāṣya*, vt. 3 on *a i u ḫ* (vol. 1, p. 87). Here again, the mentioned facts occur mainly in Vedic.

Section [21]: the sequence *lakāre...laparvatvam api bhavati* of the *Kāśikāvrṛti* is linked with the *guṇa* degree of /l/ (*laparvatvam*), a very unusual phoneme, which occurs only in some forms of the verb *KLP-*. The little importance of this fact may easily explain its absence in the *Cāndravṛtti*.

Section [34]: the end of this sequence, which does not occur in the *Kāśikāvrṛti*, refers to ancient grammars (*pūrvavyākaraṇeṣu*) especially to the *Phiṭsūtra* of Sāntanava. The *Phiṭsūtra*, which is probably post-Pāṇinian, gives rules for the accentuation of nominal bases according to their phonologic shape and their meaning. This reference to the work of Sāntanava indicates that Candra resorted to this source, though dedicated to accentuation, a language feature that is found mainly in Vedic. This seems to confirm

the hypothesis according to which Candra has really dealt with Vedic facts, but in a separate (and lost) section.

If the *Kāśikāvṛtti* does not mention this sequence, it is probably because it does not take the *Phīṭsūtra* into account and, therefore, the equivalence between *aS* and *aC* is not relevant for it.

One may notice, then, that there are two main reasons to explain the presence of several sequences in the *Kāśikāvṛtti* and their absence in the *Cāndravṛtti*: 1) these sequences, like section [20], refer to linguistic facts belonging to Vedic; 2) these sequences, like section [17], refer to facts peculiar to the *Aṣṭādhyāyī*.

### 3.4 Conclusive remarks

One notes that, for the concerned section, the content of the *Cāndravṛtti* occurs in the *Kāśikāvṛtti* in its quasi entirety: the only sequence of the *Cāndravṛtti* that does not appear in the *Kāśikāvṛtti* is the end of the final sequence, which refers to the *Pratyāhārasūtras* of ancient grammars and quotes rules of the *Phīṭsūtra*. Here too, then, there is a strong similarity between the two texts. Could this constitute a solid argument to prove the influence of the *Cāndravṛtti* on the *Kāśikāvṛtti*? I am not completely convinced of that. The main reason is that the similarity of the two texts for the concerned section does not invalidate the hypothesis according to which both texts borrowed from a third source. Where the *Kāśikāvṛtti* deviates from the *Mahābhāṣya* and seems to draw closer to the *Cāndravṛtti* —as, for instance, in the case of the examples of sections [7] and [32]— nothing forbids to think that it does not borrow from the *Cāndravṛtti*, but from another source on which the *Cāndravṛtti* is also based. Moreover, if the *Kāśikāvṛtti* has mainly drawn its inspiration from the *Cāndravṛtti*, from what source does it draw the example *devā hasanti* in section [33]?

The observations presented in this paper would certainly be more consistent if the *Jainendravyākaraṇa* were provided with a *Pratyāhārasūtra* section; unfortunately, this is not the case for the version which has come down to us.
