**HAL** is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

# Quantifiers in Dan-Gwɛetaa (South Mande)

Valentin Vydrin

INALCO — LLACAN (CNRS, UMR-8135)

## 1. Introduction

Dan (South Mande < Southeastern Mande < Mande < Niger-Congo) is a macrolanguage spoken in Côte d'Ivoire, Liberia and Guinea by about 1,600,000 people (2012, my evaluation). In Liberia, Dan are known under the name of Gio; in Côte d'Ivoire they are most often referred to as Yakuba (Yacouba). Since the 1960s, two language norms are being elaborated in Côte d'Ivoire: Western Dan, based on the Blo dialect, and Eastern Dan, based on the Gwɛetaa dialect (sousprefecture of Santa, prefecture of Biancouma, Tonkpi province).

In the present paper, I am going to deal with the data of the latter variety. The data have been collected by me mainly in 2013-2014 on the basis of E. Keenan's *The Q book questionnaire*; the universal quantifiers' section was also inspired by Tatevosov's (2002) study. My corpus of natural and elicited Dan-Gwɛetaa texts in the Toolbox format has been abundantly used as well.<sup>1</sup>

In Section 2, background data on the Dan-Gwɛetaa phonology and morphosyntax is presented, which is intended to facilitate understanding of the subsequent sections. In Section 3, core quantifiers are discussed: generalized existential, generalized universal, proportional, morphosyntactically complex. In Section 4, "selected topics" of "The Q book questionnaire" are dealt with: comparative quantifiers, "type 2 quantifiers", distributive numerals, mass quantifiers and nascent noun classifiers, existential constructions, bare quantifiers, quantifiers' scope ambiguities, expression of the meaning 'only'. In the same section is represented the phenomenon of conversion of D-quantifiers into A-quantifiers with pre-verbial verbs. In Section 5, a summary table of quantifiers in Dan-Gwɛetaa is given.

## 2. Background information on Dan-Gwɛetaa

### 2.1. Segmental phonology

Dan-Gwɛetaa has 12 oral vowels, 9 nasal vowels, and one defective vowel  $\eta$ .

Oral vowels			Nasal vowels		
Front	Back non-labial	Back labial	Front	Back non-labial	Back labial
<i>i</i>	<i>u</i>	<i>u</i>	<i>ĩ</i>	<i>ũ</i>	<i>ũ</i>
<i>e</i>	<i>ɤ</i>	<i>o</i>			
<i>ɛ</i>	<i>ʌ</i>	<i>ɔ</i>	<i>ɛ̃</i>	<i>ʌ̃</i>	<i>ɔ̃</i>
<i>æ</i>	<i>a</i>	<i>ɒ</i>	<i>æ̃</i>	<i>ʌ̃</i>	<i>ɒ̃</i>

Phonetically long vowels are interpreted as combinations of two identical vowels (rather than long phonemes). There is a trend to phonologization of the mid-closed [ɥ] triggered by morphologically conditioned alternation of tones.<sup>2</sup> / $\eta$ / is a vowel of a limited distribution: it can appear in the feet of the types CV $\eta$ , CVV $\eta$ ,  $\eta$ , but not \*C $\eta$ . Nasalization is marked by a lower tilde, in order to leave space above the letter for tonal diacritics.

Consonants

---

<sup>1</sup> In August 2014, the size of this corpus was about 22,000 words. The corpus is constantly growing, for which reason it is difficult to give a more precise figure. Examples from the corpus are provided with references [in brackets]; examples elicited especially for this study are left without reference.

<sup>2</sup> In Dan-Gwɛetaa, mid-closed vowels, /e, ɤ, o/, are realized as more closed allophones, [ɪ, ɥ, ɔ] under extra-high tone, cf. /wě/ [wɪ] 'to speak' (the lexical form) vs. /wè/ [wɛ] 'to speak' (the regular form in neutral aspect construction). Among the abovementioned allophones, ɥ seems to be on the way to phonologization: so, the neutral aspect form of the verb *sũɣ* [sũɣ] 'to be afraid', *sũɣ*, is normally pronounced identically to the verb *sũɣ* 'to get up early in the morning' (in both lexical and neutral aspect form). However, some informants can hear the difference between the latter forms (probably, under the influence of the neighbouring dialect of Tee, where the contrast in question seems to be phonological).

	Labial	Dental	Palatal	Velar	Velar labialized	Labiovelar
Voiceless stops	<i>p</i>	<i>t</i>		<i>k</i>	<i>kw</i>	<i>kp</i>
Voiced stops	<i>b</i>	<i>d</i>		<i>g</i>	<i>gw</i>	<i>gb</i>
Voiceless fricatives	<i>f</i>	<i>s</i>				
Voiced fricatives	<i>v</i>	<i>z</i>				
Implosives/sonants	<i>ɓ</i>	<i>ɗ</i>	<i>y</i>		<i>w</i>	
Lateral sonant		<i>l</i>				

In a nasal foot, any consonant is nasalized; the nasalization is especially prominent for the phonemes /b, d, y, w, gb/ which are represented in this case by their allophones [m, n, ɲ, w̃, gm]. Foot-internal *-l-* is realized as [-r-] when preceded by dental or palatal consonants, and as [-l-] after labial and velar consonants.

## 2.2. Suprasegmental phonology: tones

There are five level tones:

- extra-high: *káá* ‘scabies’,
- high: *káá* ‘you (pl.)’, the negative imperfective series of pronominal predicative markers,
- mid: *kāā* ‘you (pl.)’, the prospective series of pronominal predicative markers,
- low: *kàà* ‘to scratch’ (a conjoint construction form),
- extra-low: *kää* ‘reed’.

There are three modulated tones (all are available on single vowels), they are less frequent than level ones:

- high-falling: *gbê* ‘dog’,
- mid-falling: *djĩ* ‘hunger’,
- extra-high – falling: *zĩzĩdê* ‘extremely ancient’.

Grammatical tones (tonal morphemes) substitute the lexical tone of a word (*pɔ* ‘to dig’ → *pɔ̃* ‘to dig’, the neutral aspect) or are suffixed (→ *pɔ̃* ‘to dig’, the infinitive).

**2.3. Syllabic structures** allowed in Dan are: V, CV, C<sub>1</sub>C<sub>2</sub>V. The only consonant admissible in the C<sub>2</sub> position is /l/, it cannot be preceded by *ɗ, gw-, l-, v-, y-*.

The main rhythmical unit is **metric foot**. The types of feet attested in Dan are: V (including *ŋ*), CV, CVV, CVŋ, CVVV, CVVŋ, CIV, CIVV, CIVŋ. A foot is characterized by nasal harmony, restrictions on vowel combinations, restrictions on tonal combinations.

## 2.4. Basic syntax

2.4.1. The **basic word order** in a simple verbal sentence is (S) PPM (DO) V (X), where S is for the subject, PPM is for the pronominal predicative markers (or auxiliaries, see 2.9), DO is for direct object, V is for verbal predicate, X is for the indirect/oblique object or circumstant. Dan is a null-subject language (explicit presence of a subject NP is unnecessary, for the subject is indexed in the PPM). Presence of a DO makes a verb transitive; if the DO position is void, the verb is intransitive.

2.4.2. **Non-verbal sentences** are formed with copulae *bũ, bā, dɛ, dɛ* (identification, negative identification, presentative, equative) and with PPM (negative identification, locative, qualitative, equative; on PPM, see 2.9.).

Identification, S *bũ* ‘it is S’ (if the object referred by S is in the range of visibility), S *bā* ‘it is S’ (S is outside the range of visibility). One of the equative sentence type, S *bũ* OO *ká* ‘S is OO’ (OO is for Oblique object), can be regarded as a variety of the identification sentence.

Negative identification, (S) NEG.IPFV *bũ* ‘it is not S’.

Presentative sentence, S *dɛ* ‘here is S’.

In the (affirmative) identification and the presentative sentences, a subject is obligatory and a PPM is missing; all other sentence types in Dan contain a PPM.

Locative sentence, (S) EXI X ‘S is located in X’, the negative counterpart: (S) NEG.IPFV X. Apart from the locative, many other meanings are expressed by this sentence type as well: possessive, equative, physical and psychological states, etc.

Qualitative sentence, (S) EXI ADJ, negative counterpart: (S) NEG.IPFV ADJ.

In non-autonomous clauses, EXI are replaced with JNT.

## 2.5. Noun

Nouns are subdivided into the classes of nouns proper and “locative nouns”. The latter have an emergent inflectional category of case, the former have none.

2.5.1. **Locative nouns** come from a fusion with postpositions; therefore, they are used in the circumstant function without postpositions (unlike the noun proper). Six morphological cases can be singled out, with a great deal of irregularity in their formation. In more detail, see (Vydrin 2011).

### 2.5.2. Relational and free nouns

This distinction is valid for both the nouns proper and the locative nouns; it manifests itself in a possessive NP where the possessor (the dependent word) is a person. If the head (the possessum) is a free noun, it is connected to the possessor noun by a connective word (a postposition) *bà* ~ *à*:

- (1) *Gbàtò* *bà* *dá-dù*  
 NOM.M POSS child-PL  
 ‘Gbato’s children’.

*Bà* is most often replaced by *gò* if the NP appears in the circumstant function:

- (2) *n̄* *gò* *kóódf̄*  
 1SG.NSBJ POSS.LOC house.LOC  
 ‘at my home’.

If the possessed noun is relational, there is no connective word: *Gbàtò dá* ‘Gbato’s father’.

Most of body part names and kinship terms belong to the class of relational nouns, however, there are some important exceptions: *dá* ‘child’, *béé* ‘nephew, niece (sister’s child)’, *wū* ‘hair (head hair)’, *fáyí* ‘sweat’ are free nouns, while *bāñ* ‘child’ (a synonym of *dá*), *kāā* ‘body hair’, *wēé* ‘urine’ are relational.

2.5.3. Standard plural marker is *-dù* which follows the noun. The majority of locative nouns have no plural forms in the oblique cases. The plural marker *dù* at the same time expresses the definiteness.

The plural marker appears preferably with nouns for humans and big (identifiable) animals; it is less used (although, by no means, not prohibited) with names for small animals and inanimate objects whose basic form remains thus neutral to the opposition of singular and plural. On the other hand, plural marker is compatible with mass and liquid nouns, in which case a semantic shift is observed towards the meanings “portions of the substance” (evidently, a distributive meaning, (3)) or “sorts of” (4):

- (3) *zá* *yí* *dóñdóñ-sù-dù*  
 liana.sp. water viscous.substance-ADJ-PL  
 ‘bowls of sauce of the liana "zan" [e4:20].

- (4) *Bā-dù* *wó* *kó* *dō* *à* *ká*, *wáá* *kā* *dí*.  
 mud-PL 3PL.JNT house build 3SG INSTR 3PL.IPFV.NEG do so.CLOSE  
 ‘One does not build a house with such sorts of mud’ [f180:7].

With most names of physiological substances and excretions (*yòò* ‘blood’, *gbō* ‘excrement’, *wēé* ‘urine’<sup>3</sup>), *-dù* may also express the meaning of emphatic plural (‘a great quantity of’):

- (5) *Bē* *yòò-dù* *wò* *síāā*.  
 human blood-PL 3PL.EXI earth.SUB

(a) ‘There is a great deal of man’s blood on the earth’, or (b) ‘There is blood of several/many persons/animals on the earth’ [f181:1].

A non-numerative expressive meaning of the plural marker should be mentioned: when followed by the universal quantifier *gbà*, it may mean ‘and besides’, ‘on the top of everything’ (6).

- (6) *Zá-dù* *gbàà* *kā* *zī*.  
 NOM.M-PL all.3SG.PRF do old  
 ‘On the top of everything, Jean has grown old’ (litt.: ‘All the Jeans have grown old’).

## 2.6. Adjectives

Syntactic functions characteristic of adjectives are:

– noun modifier in an attributive NP:

- (7) *Yáñ* *gbéé* *yò* *fáyí* *gā* *lòò* *bē* *bà*.  
 sun.CMM difficult 3SG.EXI sweat bone arrive\NEUT human on  
 ‘Hot sun makes one sweat’ [d162:6].

– predicate in a postpositionless construction:

- (8) *N̄* *kò* *yò* *kpáákpáá*.  
 1SG.NSBJ hand.CMM 3SG.EXI numb  
 ‘My hand is numb’ [d163:7].

– predicate in a postpositional construction:

- (9) *Á* *gē* *yò* *kpáá* *ká*.  
 3SG.NSBJ foot 3SG.EXI bare with  
 ‘He is barefoot’ [d162:13].

In most cases, both predicative uses of adjectives are more or less equivalent, and sometimes, there are some subtle differences. See in more detail (Vydrin 2007, 2010).

<sup>3</sup> To the contrary, the word *fáyí* ‘sweat’ cannot have the plural marker.

For the adjectives, there are semi-regular derivative models for plural and intensive meaning based on reduplication, modification of tones, suffixation and transfixation.

All adjectives have a selective form derived by the suffix *-sũ* (homonymous to the gerund suffix and the adjectivizing suffix).

### 2.7. Determiners, numerals

Determiners is a heterogeneous (by their syntactic behavior) class of semi-auxiliary words which occupy normally rightmost position in a NP. Among determiners, there are articles, focus and contrastive topic markers, quantifiers. On the grammaticalization of demonstrative adverbs to the definite article and demonstrative pronoun/determiner, see 2.10.4.

Cardinal numerals are determiners, they follow the noun. Nouns modified by numerals appear in their single form, and by default, no plural marker is used after the numeral: *sũ plɛ* ‘two months’. About the context where a numeral is followed by the plural marker, cf. 3.1.1.1.

Ordinal numbers are adjectives. They are derived by the suffix *-dãã* (*sɔɔdũ-dãã* ‘the fifth’). Only ‘first’ has a suppletive form, *blɛɛsũ*.

### 2.8. NP structure

The basic word order in a NP is as follows (optional elements are in brackets):

(N<sub>2</sub> (- Atr - Det)) - N<sub>1</sub> - (Atr - Det)

In a **genitive-like construction**, the head noun follows the dependent one. Genitive constructions are of two types: (a) unmarked: *bãã dũ* (lit. ‘cassava-tree’) ‘cassava stalk’, and (b) head-marked, where the syntactic connection is marked on the head noun by an extra-low tone: *bãã dũ* ‘cassava plant’. To the class of genitive-like NPs belong the postpositional NP, where the connection between the constituents is marked by a postposition: *dũɔɔ bã gbĩngã* (lit.: ‘raffia.palm – on – caterpillar’) ‘raffia palm caterpillar’. Possessive NP (*dũutĩ bã dãã* ‘village chief’s knife’) can be also regarded as a variety of the postpositional NP.

In an **attributive construction**, the head word precedes the dependent one: *gbɛ tĩ* <dog black> ‘black dog’. In the attributive constructions, determiners (plural marker, definite article, etc.) normally follow the dependent word: *gbɛ tĩ-dũ* ‘black dogs’, *gbɛ tĩ bã* ‘the black dog’. Rather atypically of Mande languages, the plural marker can optionally follow the head word (*gbɛ-dũ tĩ* ‘black dogs’) or appear in both positions (*gbɛ-dũ tĩ-dũ* ‘black dogs’); both strategies are subject to numerous lexical restrictions.

The **coordinative NP** is constructed with coordinative pronouns, cf. 2.10.

**2.9. Pronominal predicative markers (PPM)** are auxiliaries (but by no means auxiliary verbs!) stemming from the fusion of personal pronouns in the subjective function with post-subject auxiliary elements (predicative markers). A PPM appears as a head word of a VP, it is necessarily present in any verbal sentence (while the subject may be null); it is also obligatory in most types of non-verbal utterances. A PPM expresses (alone or in combination with grammatical tones on the verb, verbal suffixes and auxiliary verbs) various TAM meanings and polarity.

Table 1. Pronominal predicative markers (auxiliaries) in Dan-Gwɛetaa

Person, gloss	Singular				Plural	Dual	Plural			
	1	2	3	Logo-phoric			1 ex-clusive	inclusive	inclu-sive	2
Existential EXI	<i>ã</i>	<i>ĩ/ũ</i>	<i>yɔ̃/yɔ̃</i>	<i>ɔ̃</i>	<i>yĩ</i>	<i>kõ</i>	<i>kwã</i>	<i>kã</i>	<i>wò</i>	<i>wõ</i>

## 2.10. Pronouns, Articles, Adverbs

### 2.10.1. Personal pronouns

Table 2. Personal pronouns in Dan-Gwæetaa

Person	Singular				Plural	Dual	Plural			
	1	2	3	Refle-xive			1 exclusive	inclusive	2	3
Non-subject	<i>N̄</i>	<i>ī/ū</i>	<i>à/ø</i>	<i>ɾ</i>	<i>yī</i>	<i>kō</i>	<i>kwā</i>	<i>kā</i>	<i>àdū</i>	<i>wō</i>
Possessive	<i>bā</i>	<i>ū</i> <i>bā</i>	<i>à bā</i>	<i>ɾ bā</i>	<i>yī</i>	<i>kōð</i>	<i>kwāà</i>	<i>kāà</i>	<i>àdāà</i>	<i>wōð</i>
Autonomous	<i>bā</i>	<i>bī</i>	<i>yɾ</i>	-	<i>yī</i>	<i>kō</i>	<i>kwā</i>	<i>kā</i>	<i>wō</i>	-
Contrastive	<i>bā̄</i>	<i>bī̄</i>	<i>yɾɾ</i>	-	<i>yī̄</i>	<i>kō̄</i>	<i>kwāā</i>	<i>kāā</i>	<i>wō̄</i>	-
Simple coordinative	<i>yāā</i> / <i>yāà</i>	<i>kāā</i> / <i>kāà</i>	<i>wāā</i> / <i>wāà</i>	-	<i>yāā/yāà</i> ... <i>dū</i>	-	<i>kwāā/kwā</i> <i>à (... dū)</i>	<i>kāā/kāà</i> ... <i>dū</i>	<i>wāā/wā</i> <i>à ... dū</i>	-
Fused coordinative	<i>yāà</i>	<i>kāà</i>	<i>wāà</i>	-	<i>yāà ... dū</i>	-	<i>kwāà (... dū)</i>	<i>kāà ... dū</i>	<i>wāà ... dū</i>	-
Co-ordinative portemanteau	<i>yē̄</i> / <i>yē̄</i> 1&3	<i>kē̄</i> / <i>kē̄</i> 2&3	<i>wē̄</i> / <i>wē̄</i> 3&3	-	<i>yē̄ dū</i> (1&3)+ 3	<i>kwē̄</i> / <i>kwē̄</i> 1&2	<i>kwē̄</i> / <i>kwē̄ ... dū</i> (1&2)+3	<i>kē̄</i> / <i>kē̄ dū</i> (2&3)+ 3	<i>wē̄</i> / <i>wē̄ dū</i> (3&3)+ 3	-

Non-subject pronouns appear in any argument position, with the exception of subject; they can also appear as the dependent member of a genitive-like noun construction. It can be modified by an adjective, in which case the pronoun has a generic meaning (10, 11).

(10) *Kɾ kíl bā wálǎgā dē̄, bī*  
that that.2SG.SBJV>2SG.NSBJ POSS money loose 1SG.NEG.PFV

*dó à wé̄ dū.*  
go 3SG.NSBJ other give\INF

‘If you loose your money, I won't give other’ [e4:10].

(11) *Á-dāà bláá yà gā, wà à dèè dó.*  
3NSBJ-PL.POSS sheep 3SG.PRF die 3PL.PRF 3SG.NSBJ new buy

‘Their sheep has died, they have bought a new one’.

The 3SG non-subject pronoun *à* is on the way of grammaticalization as a prepositional definite article (all other determinants in Dan are postpositional) (12).

(12) *Bā̄ dèbɾɾ à wɔ̄ yɾ ká n̄ kɔ̄...*  
1SG.CNTR self 3SG.NSBJ matter 3SG.EXI RETR 1SG.NSBJ astonish

‘The matter astonished me...’ [Dū wɔ̄].

2.10.2. **Interrogative pronouns** are used for special questions: *dē* ‘who?’, *bá* ‘what?’, *dē* ‘how many? how much?’, *bé̄* ‘which?’, *bé̄* ‘where?’. As a rule, they occupy the same position as the substituted word, however, an interrogative pronoun (or a NP containing such a pronoun) can also be realized in leftmost position (which is often connected with relativization), in most cases a resumptive pronoun occupies its syntactic position:

(13) *Bā̄ ɾ ú à yɾ kp̄ tã?*  
what REL 2SG.JNT 3SG.NSBJ see.JNT road on

‘What have you seen on the road?’

### 2.10.3. Demonstrative pronouns, definite articles and adverbs

There are five demonstrative adverbs differentiated according to different parameters: *yɾ* and *yā* indicate a place near the speaker or on equal distance from the speaker and the addressee, within the limits of visibility. *Bā* indicates a place near the addressee, within or outside the visibility of the speaker. *Bū* stands for a place outside the visibility of both participants of the communication, which can be described, but not indicated, or designates a movement from the deictic center, with an indefinite final point. *Tīdɾ* (the intensive form is *tī̄tīdɾ*) designates a remote object at the limit of visibility or just beyond, it is necessarily accompanied by an indication by hand or by finger.

*Yā* has undergone grammaticalization into a demonstrative pronoun, and a definite article has evolved from the adverb *bā̄*. In both cases, a relativization construction is involved, and the relativisation marker can be always restituted in a slow pronunciation:

- (14a) *kó ɣ̄ ɣ̄ yā... /bā̄* → (14b) *kó (ɣ̄ ɣ̄) yā /bā̄*  
 house REL 3SG.JNT here there house REL 3SG.JNT this ART  
 ‘house which is here/there (near the addressee)’ → ‘this house/ the house’.

Another definite article is *dō̄*. It is used exactly as *bā̄*, but it is characterized by a limited geographical distribution; unlike *bā̄*, it seems to be used only in the Gwæetaa dialect. Still another definite article is *ä* preceding the defined NP. It results from grammaticalization of the non-subject 3 sg. pronoun and expresses a situative definiteness (“the object may be even not yet mentioned, but it is defined by the general context”).

#### 2.10.4. Other adverbs

There are two productive derivative suffixes of adverbs, *-dɣ̄* and *-wō̄ ~ -bō̄*.

The former one is homonymous to the suffix of the locative case of locative nouns (most probably, both suffixes are etymologically identical). However, the great majority of the *-dɣ̄*-adverbs are non-motivated, i.e., corresponding suffixless stems are lacking in Dan-Gwæetaa.

The variants of the other suffix go back to two dummy verbs, *wō̄* and *bō̄* which are practically always interchangeable in Dan-Gwæetaa. *-wō̄*-adverbs go back to adjectives and determiners. The mechanism of this derivation is certainly connected to the very frequently used strategy of focalization of verbs through their nominalization: a content verb can be fronted and converted into a morphologically unmarked verbal noun, while the verbal position is occupied by the dummy verb *wō̄* or *bō̄* (15a, b).

- (15a) *Yɣ̄ ɣ̄ tɛ́édō̄ blùù gwà gú.*  
 3SG.EXI REFL.SG friend push\NEUT stone in  
 ‘He pushed his friend to the stones’ [f4:13].

- (15b) *Yɣ̄ ɣ̄ tɛ́édō̄ blùù dɿ ä wō̄ gwà gú.*  
 3SG.EXI REFL.SG friend push FOC 3SG.NSBJ do\JNT stone in  
 ‘What he did is to push his friend on the stones’ [f4:12].

The nominalized verb can have nominal modifiers, as in (16).

- (16) *Gbätò yà dū pɛ́pɛ́ ɣ̄' wō̄, yɣ̄*  
 NOM.M 3SG.PRF come each REL.3SG.JNT-3SG.NSBJ. do\JNT 3SG.EXI

*pā̄ dō̄*  
 thing buy\NEUT

‘Every time Gbato comes, he buys something’ (litt.: ‘Every coming<sub>i</sub> that Gbato does it<sub>i</sub>, he buys a thing’).

It is very much in the logic of the Dan-Gwæetaa language that determiners frequently used with nominalized verbs end by merging with the dummy verb which brings forth a subsequent reinterpretation of *-wō̄/-bō̄* as an adverbial suffix, while the verbal noun is again recursively reinterpreted as a verb.

### 2.11. Verb

#### 2.11.1. Nominalizations

There are following means of nominalization in Dan-Gwæetaa:

— a name of the result of action formed with the suffix *-dɛ̄* (homonymous to several other suffixes) which also serves a means of phrasal nominalization;

— a gerund, formed with the marker *-sù* following the verbal stem or the postposition closing the verbal phrase (in the latter case, it serves a means of phrasal nominalization, and the verb acquires an extralow tone which serves a nominalization marker, cf. below). The gerund is used as a verbal noun and as a participle (in the attributive construction);

— a supin formed with the suffix *-yɛ̄*;

— a masdar formed with the suffix *-dɛ̄*;

— an extralow grammatical tone on the verbal root marking nominalization with the retention of the post-verbal arguments.

#### 2.11.2. Reduplication

There are two types of verbal reduplication in Dan-Gwæetaa, full and partial.

The first type implies a complete reduplication of a verbal stem (the preverb included, the inflexional suffixes not included; the tonal contour is maintained). This reduplication expresses pluractionality (repetition of the action and/or plurality of the direct object/subject of intransitive verb), cf. (17a, b).

(17a) *Gbätò yà bīlā dūú.*  
 NOM.M 3SG.PRF wound extinguish  
 ‘Gbato has washed a wound with warm water’.

(17b) *Gbätò yà bīlā-dū dūú-dūú.*  
 NOM.M 3SG.PRF wound extinguish-extinguish  
 ‘Gbato has washed (numerous) wounds with warm water’.

In the second case, only the vowel of the verb is copied, so that it becomes triple: *gǎ* ‘to pull’ → *gǎǎǎ*, *gǎǎ* ‘to wrestle’ → *gǎǎǎǎ*, *dīlā* ‘to walk’ → *dīlāǎǎ*. The partial reduplication has an intensive meaning: ‘to pull’ → ‘to pull with a force and for a long time’; ‘to wrestle’ → ‘to wrestle with intensity’; ‘to walk’ → ‘to walk excessively’ (about a prostitute; or about a child who is never seen at home).

Both types of reduplication concern only a minority of verbs (about a third of the entire list each).

### 2.12. Focalization strategies

1) The main means of contrastive focalization is the particle *dā* (with a dialectal variant *dū*). It follows the focalized NP which is fronted. There are two kinds of fronting: the focalized NP can be brought to the sentence-initial position (see ex. (18), where the focalized NP is co-referent with the DO expressed by a resumptive pronoun), or fronted within its argumental position (see ex. (19), where the focalized NP is followed immediately by the resumptive pronoun in the DO position).

(18) *Ā dā<sub>i</sub> dā š ä<sub>i</sub> dē ä<sub>i</sub> tó ká.*  
 3SG.NSBJ father FOC 3SG.JNT 3SG.NSBJ call\JNT 3SG.NSBJ name with  
 ‘It is his father he addressed by name (once)’ [e16:13].

(19) *Yš bānglōō kpō<sub>i</sub> dā ä<sub>i</sub> bš.*  
 3SG.EXI mango unripe.fruit FOC 3SG.NSBJ eat\NEUT  
 ‘It is an unripe mango he has eaten’ [e11:9].

To focalize a verb, the following procedure is used: the verb is nominalized (through conversion), and the NP with the nominalized verb as a head is focalized and put in the position of a DO of the dummy verb *wō* or *bō* (see (15b)).

2) There is a specialized series of personal pronouns (“the autonomous series”, see 2.10) whose primary function is the focalization.

There are two suffixes of selectivity: *-dē* is added to adjectives, and the “actual selectivity” suffix *-sū* is added to nouns or adjectives. In both cases, forms with such suffixes are obligatorily followed by the focalization particle *dā*.

### 2.13. Relativization

There are two relativization strategies.

1) Correlative strategy: a full-fledged relativized NP, followed by the relative conjunction *š* (sometimes *kš*), appears in the leftmost position in the subordinated clause. The relativized NP is resumed in its own syntactical position in the subordinated clause by a PPM or a non-subject pronoun; it is resumed again, by a PPM or a non-subject pronoun, in the main clause. The relative clause can be put either to the left of the main clause (20), or embedded into the main clause (21); in the latter case we have a typologically rare clause-internal correlative strategy typical of South Mande languages (see in particular Nikitina 2012). If the relative clause precedes the main clause, the relativized NP can be repeated in the main clause (22), necessarily with a definite article (let us remember that the construction “noun + definite article” is in Dan-Gwεetaa also a reduced relative clause); such a repetition produces an emphatic effect.

(20) *[Wū<sub>i</sub> š fī-sū ká] yš ú dū*  
 meat REL.3SG.JNT smell-ADJ with CONS 2SG.JNT come\JNT

*ä<sub>i</sub> ká èè?!*  
 3SG.NSBJ with Q  
 ‘But how, you have brought a meat that stinks?!’ [e5:9].

(21) *Yš bēē n dē [n kwàä<sub>i</sub> š ä gbš*  
 3SG.EXI beg\NEUT 1SG.NSBJ before 1SG.NSBJ theft REL 3SG.NSBJ son

*š ä bō bā] ä<sub>i</sub> wš gú.*  
 3SG.JNT 3SG.NSBJ remove\JNT ART 3SG.NSBJ matter\IZF in

‘He is imploring me about the matter of a theft committed by his son against me’ [e10:1].

(22) *[Dēbā š blū kpā], ā dēbā bā*  
 woman REL. 3SG.JNT rice boil\JNT 1SG.EXI woman ART

*ä dš.*  
 3SG.NSBJ know\NEUT

‘The very woman who has cooked rice, I know her’ [f187:6].

2) Left-side relativization: the relativized noun is preceded by a nominalized verb (the nominalization is marked by an extra-low tone on the verb if it is separated from the relativized noun by a OO or circumstant; otherwise, the nominalization remains morphologically unmarked). The relative clause appears in a reduced form; pronominalized subject and direct object are omitted.

### 3. Core quantifiers

#### 3.1. Generalized Existential (Intersective) Quantifiers

##### 3.1.1. D-quantifiers

The basic strategies for the expression of existential quantification are:

— bare NP that can express indiscriminately singular, plural or mass meanings (it can be said that the bare form has a neutral number meaning). The plural marker *dũ* is normally not used if the plural meaning is already expressed by a numeral or another determiner; with names of pair body parts; most often, it is not used with names of inanimate objects, insects or small animals (percieved as “lacking individual identity”); in fact, *dũ* expresses jointly the meanings of plurality and referentiality (see in more detail 2.6.2.). A bare NP in the subject position controls most often a singular PPM, although a semantic agreement by number is also possible (a bare NP may control a plural PPM).

— a NP with definite articles *bā*, *d̄b̄* (to the right of the NP) or *à* (to the left of the NP), see 2.10.3.

— indefinite determiner *bá* appears in practically all indefinite and negative contexts, in particular:

a) specific unknown:

- (23) *Bē*    *bá*    *yà*            *dũ*    *ũ*            *wɔ́*    *gú.*  
 human certain 3SG.PRF come 2SG.NSBJ affair in  
 ‘Someone came after you’.

b) interrogative context:

- (24) *Bē*    *bá*    *yà*            *wɔ́*    *dɔ́*    *dɛ́*    *bī*            *dó*    *dèè?*  
 human certain 3SG.PRF affaire know that 2SG.PROS go today  
 ‘Does anybody know that you are leaving today?’

c) conditional:

- (25) *Bī*            *bā*            *pìŋ-gā-sòò*    *sílŋ*            *dɔ́*    *bē*  
 2SG.PROS 1SG.POSS iron-bone-horse borrowing put human

*bá*    *bà*, *à*            *pɔ́*    *n̄*            *yǎǎ.*  
 certain on 3SG.NSBJ say 1SG.NSBJ eye.COM

‘If you are going to lend my bike to anybody, tell me’.

d) indirect negation (the negation is in the main clause, and the indefinite determiner is in the dependent clause):

- (26) *Yáá*            *n̄*            *yǎǎ*            *dɛ́*    *bē*            *bá*            *yà*  
 3SG.NEG.IPFV 1SG.NSBJ eye.COM that human certain 3SG.PRF

*dũ.*  
 come

‘I don’t think that anybody has come’.

e) clause depending on implicitly negative verb:

- (27) *Gbàtò*    *yà*            *zòò*    *dɛ́*    *yíí*            *kpà*    *bē*  
 NOM.M 3SG.PRF deny that 3SG.NEG.PFV see human

*bá*    *bà*    *zīāā*    *tà.*  
 certain on road on

‘Gbato has denied (falsely) he had met anybody on the road’.

f) in the typical context “specific known”, *bá* appears in the expression *bá ɔ́ bũ*, litt. ‘certain who is there’ (28).

- (28) *Bē*    *bá*    *ɔ́*            *bũ*    *yɔ́*            *à*            *pɔ́*  
 human certain REL.3SG.JNT there 3SG.EXI 3SG.NSBJ say\NEUT

*yɔ́ɔ́*    *n̄*            *dú*            *sú.*  
 3SG.PROS 1SG.NSBJ daughter take

‘Someone (“certain person who is there”) says, he is going to marry my daughter’.

About the expression of the negative universal meaning by *bá* and its usage in the free choice contexts, see 3.2.1.6.

*bá* is not allowed in only two contexts typical for indeterminate pronouns in other languages:

— non-specific irreal; in this case, the noun is used without determiners:

- (29) *N gbā dāā-dá ká.*  
 1SG.NSBJ give knife-DIM with  
 ‘Give me any whatever knife (you have)’.

— a standard for comparison, in which case the NP is used either in its plural form ((30b), the plural marker *dū* being, in fact, a determiner too), or with the universal determiner *gbà* (30a).

- (30a) *Yř bññ sù ř zřř ká ř*  
 3SG.EXI running take\NEUT 3SG.JNT pass\JNT with REFL.SG  
*téébé gbà tà.*

‘He runs faster than all his age-mates’, or

- (30b) *Yř bññ sù ř zřř ká ř*  
 3SG.EXI running take\NEUT 3SG.JNT pass\JNT with REFL.SG  
*téébé-dū tà.*  
 age-mate-PL on

‘He runs faster than his age-mates’.

### Numerals

1 <i>dō</i>	10 <i>kòòñ dō</i>	90 <i>kòòñ sùèsīř</i>
2 <i>plè ~ pèèdā</i>	11 <i>kòòñ dō ř gā dō</i>	100 <i>kāñ dō</i>
3 <i>yààgā</i>	12 <i>kòòñ dō ř gā plè</i>	200 <i>kāñ plè</i>
4 <i>yīīsīř</i>	13 <i>kòòñ dō ř gā yààgā</i>	1000 <i>gblú dō</i>
5 <i>sóódú</i>	20 <i>kòòñ plè</i>	2000 <i>gblú plè</i>
6 <i>sòòdō</i>	21 <i>kòòñ plè ř gā dō</i>	10 000 <i>gblú kòòñ dō</i>
7 <i>sòòplè</i>	22 <i>kòòñ plè ř gā plè ~ pèèdā</i>	100 000 <i>gblú kāñ dō</i>
8 <i>sáàgā</i>	30 <i>kòòñ yààgā</i>	1 000 000 <i>gblú bēē dō</i>
9 <i>sùèsīř</i>	40 <i>kòòñ yīīsīř</i>	

As it was mentioned in 2.7, cardinal numerals function as determiners. A noun with a numeral normally lacks plural marking or any other determiner: *pā yààgā* ‘three things’. On the other hand, a numeral can have a plural marker, in which case it acquires an ‘exactly’ interpretation (it can be regarded as contrastive focalization of the numeral):

- (31) *Pōlīsíyè-dū wà kwàbē yààgā-dū kú.*  
 policeman-PL 3PL.PRF thief three-PL catch

‘The policemen caught exactly three thieves’ (the context: One knows that three thieves have fled a prison. One learns that, later on, the police have caught thieves. It is not clear whether these are the same thieves or not, but the number of the thieves is the same as of those who had fled) [f181:3].

A noun determined by a numeral can appear with a definite article. More precisely, in this case we have a leftside transposition of the noun with the article, with its substitution by a resumptive pronoun which is determined by the numeral (32). The construction has a partitive meaning.

- (32) *Pōlīsíyè bā à sóódú wà dēñ.*  
 policemen ART 3SG.NSBJ five 3PL.PRF loose  
 ‘Among the policemen, five have got lost’.

Other existential quantifiers in Dan-Gwæetaa also follow the noun. The meaning of ‘several’, ‘a couple of’, ‘a few’ is expressed by the morphologically complex determiners *dábá* <child/diminutive marker-some> (33) and *sēēdā bá* <small-some> (34), the latter includes however a semantic component of evaluation, ‘less than expected’. With uncountable nouns, it expresses the meaning ‘a small quantity of’.

- (33) *Gbātò yà káá dábá dō.*  
 NOM.M 3SG.PRF hoe a.little buy  
 ‘Gbato has bought several hoes’.

- (34) *Gbātò yà káá/blù sēēdā bá dō.*  
 NOM.M PRF hoe/rice small other buy

‘Gbato has bought several hoes’/‘Gbato has bought a small quantity of rice’.

*Dáábá* can be followed by the plural marker which seems to produce no effect on the semantics of the construction:

(35) *Gbàtò yà káá dáábá-dū dō*. ‘Gbato has bought several hoes’.

**Interrogatives:** the cardinal meaning ‘how many? how much?’ is expressed by the determiner *dē*, and the intersective meaning ‘which?’ by *bēē*. The determiners are often followed by the focalization particle *dā* (36, 37), although this is not obligatory (38, 39).

(36) *Bláá dē dā wó dā blēé gò?*  
sheep how.many FOC 3PL.JNT save\JNT dry.season PP

‘How many sheep have survived the dry season?’

(37) *Klàj dā bēē dā wó gīzābē pāsē?*  
formation child which FOC 3PL.JNT examination pass\JNT

‘Which students have passed the exam?’

(38) *Ȳ kā ʒ- wō d̄ bā, dā dē*  
CONS.3SG.JNT do 3SG.JNT-3SG.NSBJ do\JNT so.REM there child how.many

*ʒ ū gò?*  
3SG.JNT 2SG.NSBJ PP

‘And so, how many children have you got?’ [Sumaoro].

(39) *W̄ d̄d̄d̄sù bēē ʒ dā à gú yā?*  
matter clinging which 3SG.JNT go.up\JNT 3SG.NSBJ in here

‘What is the very sticky matter that he is stuck in?’ [e2:16].

When used in the adverbial function, *dē* stops to be a quantifier; it expresses instead the meanings ‘why?’ and ‘how?’.

#### Value judgement D-quantifiers

Morphologically simple modifiers are: *gbé* ‘many’ (40) and also ‘enough, sufficient’ (41), *kēē ~ kēē* ‘few’ ((31), probably, from the noun *kēē ~ kēē* ‘hull, peel, shell’), *sēēdā* ‘few’ (also ‘small’, the latter meaning being a default one).

(40) *Bē gbé wā dō gblù bā, bē kēē dā wó dū.*  
human many 3PL.PRF go war on human several FOC 3PL.JNT come\JNT

‘Many people have gone to the war, few have come back’.

(41) *Yá yākābē gbé sú k̄ wō blāà dēè zū-bō.*  
1PL.EXCL.PRF worker many take that 3PL.SBJV field new bottom-remove

‘We have hired enough workers to launch a new plantation’.

*dódó* ‘few, rare’ (42) results from reduplication (accompanied by a tonal modification) of the numeral *dō* ‘one’. Its semantics has evolved from a distributive meaning ‘one by one’. When following a pluralized NP (in which case we have a construction with a partitive meaning), *dódó* has a non-value judgement meaning ‘certain, some’ (43).

(42) *Bē dódó dā wó d̄ kwàbē bā d̄-’.*  
human rare FOC 3PL.JNT go\JNT thief ART know-INF

‘Few are those who know the thief’ [f154:10].

(43) *Ȳ bē-dū dódó d̄.*  
3SG.EXI human-PL rare know\NEUT

‘He knows certain among the people’.

A value judgment meaning “few” can be also rendered by an expression with a negatively polarized item (NPI) *t̄t̄bàsù* (which could be dubitatively translated as ‘multitude’) appearing only in negative sentences (44) and in subordinate clauses whose main clauses are negative (45a) to express the meaning of ‘a couple, a small number’. In other contexts typical of NPI (general question (45b); conditional sentences) *t̄t̄bàsù* is not allowed.

(44) *Ā- p̄ á b̄ gbé d̄, kēē*  
1SG.EXI-3SG.NSBJ at 1SG.SBJV machete numerous buy\JNT but

*b̄ t̄t̄bàsù yáá à ḡ.*  
machete multitude 3SG.NEG.IPFV 3SG.NSBJ PP

‘I wanted to buy many machetes from him, but he had only a couple’.

(45a) *Yáá n̄ yǎǎ dɛ̃ Zâ*  
 3SG.NEG.IPFV 1SG.NSBJ eyes.COM that NOM.M

*yɔ̃ dɔ̃ kálá tʃŋ̀bàsù dɔ̃-’.*  
 3SG.EXI go\NEUT hoe multitude buy-INF

‘I doubt that Jean would buy many hoes’.

(45b) \**Zâ yɔ̃ dɔ̃ kálá tʃŋ̀bàsù dɔ̃-’ èè?*  
 NOM.M 3SG.EXI go\NEUT hoe multitude buy-INF Q

‘Will Jean buy many hoes?’

The quantifier *gbé* can add the plural marker, in which case the quantifier acquires an intensive meaning: *blúukābɛ̀ gbé-dũ* ‘very many hunters’.

### 3.1.2. A-quantifiers

The cardinal numerals can be used in the post-verbal (adverbial) position to express a multiplicative meaning (46, 47).

(46) *Bá kpǎ ũ bā dɛ̃bà bā dō.*  
 1SG.PRF see 2SG.NSBJ POSS woman on one

‘I have seen your wife once’.

(47) *Yà sǔǔ zā yààgā.*  
 3SG.PRF cane.rat kill three

‘He has killed cane rats thrice (in his life)’ [d85:15].

Other determiners that can function as both D- and A-quantifiers are *gbé* ‘much’ (48), *sɛ̀ɛ̀dǎ* ‘little’ (49), and *dódó* ‘occasionally, from time to time, with intervals’ (50).

(48) *Dǎ-dũ wò gblá-sīl gbé kó tààbà.*  
 child-PL 3PL.EXI yell-DUR much house behind

‘Children yell much behind the house’.

(49) *Ū bā dɛ̃ŋ̀-’ dũ wò pā bɔ̃ sɛ̀ɛ̀dǎ.*  
 2SG.NSBJ POSS guest-PL 3PL.EXI thing eat\NEUT little

‘Your guests eat little’.

(50) *N̄ gbɔ̃ blɛ̀ɛ̀sù yɔ̃ n̄ dɛ̃ sì̀sì̀ kɛ̀ɛ̀*  
 1SG.NSBJ son first.ADJ 3SG.EXI 1SG.NSBJ call\NEUT often.INT but

*bɛ̀ dɔ̃ à píɔ̃ yɔ̃ n̄ dɛ̃ dódó.*  
 human put 3SG.NSBJ at 3SG.EXI 1SG.NSBJ call\NEUT from.time.to.time

‘My first son calls me often, and the next one calls me from time to time’.

*Dǎbáwō ~ dǎbábō* ‘a little’ is derived from the D-quantifier *dǎbá* by the means of the adverbial suffix *-wō ~ -bō* (cf. in more detail 2.10.4). It expresses only the meaning of low intensity of action (or quality), and has no meaning of ‘small number of actions’ (that could be expected, taken into account the meaning of the original D-quantifier).

(51) *Ā bā dũ yɔ̃ púú dǎbábō.*  
 3SG.NSBJ POSS cow 3SG.EXI white a.little

‘His cow is whitish’ [f157:10].

Other cardinal A-quantifiers are:

— *sìl ~ sì̀sì̀* can express both low frequency (‘sometimes, from time to time’) and high frequency of events (‘often’), cf. (52). In order to remove the ambiguity, one can combine *sìl* by the adverb *dódó*, and the combination of both adverbs expresses the meaning ‘from time to time, rarely’, cf. (53);

— *sì̀sì̀ ~ sì̀̀sì̀̀* ‘often, frequently’ can be regarded as a reduplicated form of *sì̀*. Unlike the latter, *sì̀̀sì̀̀* is not ambiguous and refers only to the events of a high frequency, cf. (54);

— *dɛ̀dɛ̀wō* ‘completely, utterly’ ‘often’ (55), ‘for a long time’ (56) and ‘a lot, in a great number’ (57). This lexeme also has non-quantifying modal meanings ‘very, very much’, ‘seriously’, ‘well’, ‘certainly’, ‘truly, indeed’. It is derived by the adverbial suffix *wō* from the determinant *dɛ̀dɛ̀* ‘self’.

(52) *Ā n̄ bɛ̀-dũ tùàà-bò sìl.*

1SG.EXI 1SG.NSBJ human-PL greeting-remove\NEUT sometimes  
 ‘I visit my relatives from time to time/often’.

(53) *Ū gb̄r̄ ȳr̄ yā kà bláā sàì dódó.*  
 2SG.NSBJ son 3SG.EXI work do\NEUT field.LOC sometimes one.by.one

‘Your son works in the field rarely/from time to time’.

(54) *Sáá ȳr̄ yī t̄ kwāā sàìsàì.*

‘A sparrowhawk often steals our chickens’.

(55) *Kéé-kā-gèè bā ȳr̄ b̄ dèdè-wō.*  
 threat-do-mask ART 3SG.EXI appear\NEUT true-ADV

‘This attacker mask appears often’ [e11:4].

(56) *Ȳr̄ d̄ n̄ ḡ dèdè-wō yāā d̄r̄.*  
 3SG.EXI put\NEUT 1SG.NSBJ PP true-ADV yesterday

‘Yesterday he waited for me for a long time’ [f9:15].

(57) *Kèsé ȳr̄ d̄r̄j̄ d̄r̄-sù ká r̄ ḡ*  
 NOM.M 3SG.EXI trap set-GER with REFL.SG POSS.LOC

*d̄r̄j̄ d̄r̄ dèdè-wō.*  
 hamlet.LOC true-ADV

‘Kese has set traps a lot in his remote field’ [e18:15].

A syntactically complex A-quantifier *sàì t̄r̄j̄ bā-d̄j̄ gú* <sometimes-time-certain-PL-in> expresses the meaning ‘often’ (however, less frequently than *gb̄é*, the latter may designate that events happen practically without intervals, while *sàì t̄r̄j̄ bā-d̄j̄ gú* implies intervals).

(58) *Bā d̄r̄-d̄j̄ w̄ w̄ n̄ bā sàì t̄r̄j̄*  
 1SG.POSS child-PL 3PL.EXI appear\NEUT 1SG.NSBJ on sometimes time

*bā-d̄j̄ gú.*  
 certain-PL in

‘My children visit me often’ [f184:15].

A syntactically complex NPI quantifier *t̄r̄j̄ gú* <time in> is used in negative sentences and expresses the meaning ‘(too) few, insufficiently’ (59, 60).<sup>4</sup> It is not allowed in other contexts typical of NPI elements (general question; dependent clause with a negation in the matrix clause, etc.).

(59) *Bē yāá t̄r̄j̄ gú.*  
 human 3SG.NEG.IPFV time in

‘People are too few’ [f158:5b].

(60) *Dā yí bā t̄r̄j̄ gú.*  
 rain 3SG.NEG.PFV rain time in

‘It rained insufficiently’.

### 3.2. Generalized universal (Co-intersective) Quantifiers

#### 3.2.1. Universal D-Quantifiers

There are two determiners expressing universal quantifying meanings, *gb̄à* which is an “all-type” modifier, and *p̄p̄é ~ p̄éé* which is a distributive (“every/each-type”) modifier. Apart from this, universal meanings can be expressed by two syntactically complex quantifiers: a reduplication of the determined noun with the connective morpheme *óó* (primarily a free choice meaning), and the expression *r̄ d̄r̄* (distributive and free choice meanings). Certain combinations of these means are also possible. Besides, meanings contiguous to universal quantification are expressed by some constructions with the indefinite determinanant *bā*.

In this section, the semantics and contexts of use of these means will be analysed in more detail.

3.2.1.1. *gb̄à* is the default universal “all-type” quantifier capable to appear also, marginally, in distributive and free choice contexts. It is used mainly as a determinant of a NP which can be pronominalized, in which case we have a partitive construction (61a).

(61a) *D̄s̄kwá-l̄-d̄r̄, yúr̄r̄ d̄s̄ ḡ s̄, ā k̄*  
 market-LOC fish market be.PST\NEUT good 1SG.EXI RETR

<sup>4</sup> If the noun *t̄r̄j̄* has a nominal or pronominal dependent to the left, it is interpreted in a non-idiomatic way, ‘in the time of X’.

à gbà d̄.  
3SG.NSBJ all buy\NEUT

‘In the market, fish was not expensive, I bought it all’.

The determined NP can be sometimes (not always!) omitted, cf. (61b).

(61b) D̄kwál-d̄, yúřř d̄ř gũ sà, ā  
market-LOC fish market be.PST\NEUT good 1SG.EXI

kā gbà d̄.  
RETR all buy\NEUT

‘In the market, fish was not expensive, I bought all’.

In (61a), the referent object (fish) is definite (a particular lot of fish is meant), while in (61b) it appears more vague.

The NP determined by *gbà* may have a plural marker *dũ* which influences the semantics of quantifier (see below).

When followed by the predicative marker of the perfect series 3SG *yà* ~ *yà* or 3PL *wà* ~ *wà*, it optionally fuses with them producing the form *gbàà*.

(62) B̄ gbàà b̄ yā.  
darkness all.3SG.PRF put yere

‘It has got quite dark there’ [Dūw̄ 12].<sup>5</sup>

(63) B̄ gbàà d̄ ḡēēṅd̄.  
human all.3PL.PRF stand fixedly

‘Everyone was stricken by stupor (after springing to one’s feet)’ [B182:5].

### 3.2.1.1.1. CMP-quantification

*Gbà* expresses the meaning ‘entire, whole’ when the determined NP is single and definite. The definiteness can be expressed by various means, such as the definite article *bā* (64), the demonstrative determiner *yā* (65a), a possessor (66).

(64) D̄kpòb̄yì ȳs̄ z̄ṅgú Gbàtò b̄ d̄ēb̄l̄ yā  
day four between NOM.M POSS woman 3SG.PRF

d̄ū b̄ gbà ḡ.  
tree ART all burn

‘During four days, Gbato’s wife burnt the entire tree’.

(65a) B̄ k̄ yā gbà ḡ.  
1SG.PRF house this all daub

‘I have daubed all this house’.

(66) D̄ēb̄l̄ b̄ yā ȳ ḡ ṛ d̄ē gbà b̄.  
woman ART 3SG.PRF oil daub REFL.SG place all on

‘The woman has smeared her entire body with oil’.

If the NP determined by *gbà* has no definiteness markers, both CMP and collective readings are possible (65b).

(65b) B̄ k̄ gbà ḡ.  
1SG.PRF house all smear

(i) ‘I have daubed the entire house’ or (ii) ‘I have daubed all the houses’.

The CMP meaning is also available if the subject NP designs a complex object, contains no plural marker *-dũ*, and the auxiliary (co-referent with the subject) is singular:

(67) P̄d̄ē gbà yā ḡ.  
village.CMM all 3SG.PRF burn

‘The entire village has burnt’.

Cf. example (68) where a NP with similar characteristics appears in a position other than that of a subject (therefore, no auxiliary is available to remove the ambiguity), which makes the collective reading the only one possible.

(68) K̄b̄d̄ yā w̄ w̄ k̄d̄ gbà t̄.  
prefect 3SG.PRF affair lie family all on

‘The prefect has punished all families’.

<sup>5</sup> In the example 62 *gbà* expresses a high degree of intensity. This meaning seems to be reserved to this particular expression (‘quite dark’), it does not appear in other similar contexts.

Single object nouns may require a noun classifier word in order to express the CMP meaning of *gbà*: *gèè* ‘carcass, body’ (69a), *bǝǝ dō* ‘one bunch’ (69b), *bē* ‘fruit’ (70a):

(69a) *Gbàtò yà tǝ gèè gbà bǝ.*  
 NOM.M 3SG.PRF chicken body all eat

‘Gbato has eaten the entire chicken’.

(69b) *Gbàtò yà tǝ bǝǝ dō gbà bǝ.*  
 NOM.M 3SG.PRF chicken bunch one all eat

id.

(70a) *Dàdā bē ǝ yā à gbà yǝ wálà kǎǎ*  
 pineapple fruit REL.3SG.JNT here 3SG.NSBJ all 3SG.EXI money hundred

*dō.*  
 one

‘The price of the entire pineapple is 500 francs’.

The wholeness meaning can be emphasized through adding a gerundive expression *tǝ dǝ-sù*, lit. ‘remaining so’ (*dǝ* ‘so’ is an adverbial; in Dan-Gwæetaa the gerundive marker *-sù* is normally added to the verb, and when a verb has an adverbial, to the adverbial):

(70b) *Dàdā bē ǝ yā à gbà tǝ*  
 pineapple fruit REL.3SG.JNT here 3SG.NSBJ all remain\NMLZ

*dǝ-sù yǝ wálà kǎǎ dō.*  
 so.REM-GER 3SG.EXI money hundred one

‘The price of the complete pineapple is 500 francs’.

### 3.2.1.1.2. Universal quantification of referent sets, the collective meaning (DEF- and INDEF-quantification)

The collective meaning of *gbà* is realized when the preceding NP has no definiteness marker (with some exceptions, see below). If the NP appears in the subject position, the co-referent auxiliary is necessarily plural (otherwise, the CMP reading is preferable). If the NP designates a set of objects with clearly defined limits, it normally has a plural marker *-dǝ* and expresses a definite universal meaning, cf. (71a). If it refers to a set with vague limits, the plural marker is absent (71b), and the indefinite universal meaning is expressed.

(71a) *Dēbà-dǝ gbà wà dǝ kwálàdǝ.*  
 woman-PL all 3PL.PRF come RECP.LOC

‘All the women gathered’ (e.g., all the members of an association).

(71b) *Dēbà gbà wà dǝ kwálàdǝ.*  
 woman all 3PL.PRF come RECP.LOC

‘All women gathered’.

In the former case, the limits of the group are clearcut (all the members of the association are known, and it is easy to establish that nobody is absent), and in the latter case, they are vague (it may be all women of a village, and some “natural” absentees, e. g. sick or too old people, can be easily disregarded).

Thus, if the plural marker of the subject noun in (72a) is omitted (*gǝ gbà wà wliúú...*), the resulting sentence is hardly acceptable, as far as the space of the house where the elder entered defines the limits of the group of the men (“those who are in the house”).

(72a) *Gǝ-dǝ gbà wà wliúú kǝ pǝ-dā yà*  
 male-PL all 3PL.PRF rise still village-father 3SG.PRF

*dà kǝ-dǝ.*  
 go.up house-LOC

‘All the men rose when the elder entered the house’.

To the contrary, in (72b) the referent group is represented by the men of a village, and the limits of this set are vague: evidently, there may be some disabled or sick people who belong to the class of the men of the village but they will hardly go to the war, and therefore are disregarded. As a result, the subject NP carries no plural marker.

(72b) *Gǝ gbà wà wliúú.*  
 male all 3PL.PRF rise

‘All the men have risen’ (to go to the war).

In the sentence (73), the referent group is “all those who are present at the moment of the accident”. The absence of the plural marker on the subject *bē* is indicative of the fact the group is perceived as open<sup>6</sup>.

- (73) *Yá bē gbà wó yà gbó bō-sù bā.*  
 CONS human all 3PL.JNT put\JNT crying pass-GER on  
 ‘Then everybody started crying’ [Zūá sèèè].

In certain contexts the opposition of definiteness (i.e., the clearcut or vague nature of its limits) seems to be irrelevant for the referent group, in such cases the presence or absence of the plural marker is optional (74a, b).

- (74a) *Gwēē yà dù gbà zā.*  
 leopard 3SG.PRF cow all kill  
 ‘A leopard killed all the cows’.

- (74b) *Gwēē yà dù-dū gbà zā* ‘id’.

Inanimate nouns realizing their wholeness meaning with count words (cf. 69, 70) represent a special case. When count words are missing, *gbà* with such nouns expresses the collective meaning, and when the plural marker is missing, the noun is definite, and the auxiliary is singular (75).<sup>7</sup>

- (75) *Dàdā yā à gbà yá wáá káā dō.*  
 pineapple this 3SG.NSBJ all 3SG.EXI money hundred one  
 ‘The price of all these pineapples is 500 francs’.

Although the plural marker *dū* expresses at the same time the meaning of definiteness, it is not incompatible with the definite article *bā* (76), however no NP with both a plural marker and an article followed by the universal quantifier *gbà* appears in my corpus.

- (76) *Kàsò-gú-bē-dū bā wò ká dùà zīāā yā-’*  
 prison-in-human\IZF-PL ART 3PL.EXI RETR flee\NEUT road this-3SG.NSBJ  
*tā.*  
 on

‘The prisoners fled away by this road’.

### 3.2.1.1.3. Quantifier *gbà* with uncountable nouns

In Dan-Gwætaa most of mass and liquid nouns have alternative readings (realized when the plural marker is added, cf. 2.6.3) ‘sort of X’ and ‘a recipient of X’. Used with the quantor *gbà*, these nouns without plural marker and definiteness markers designate the entirety of the quantity available:

- (77) *Gbàtò yà yí gbà bū.*  
 NOM.M 3SG.PRF water all drink  
 ‘Gbato has drunk all the water’.
- (78) *Ū bā dā yà sō gbà dī-kú.*  
 2SG.NSBJ POSS child 3SG.PRF cloth all dirt-catch  
 ‘Your child has dirtied all the clothes’.
- (79) *Yá blyù gbà ká.*  
 1PL.EXCL.PRF rice all cut  
 ‘We have mowed all the rice’.

If such a NP appears in the subject position, it is resumed by a singular auxiliary:

- (80) *Káfléé gbà yà sē.*  
 coffee all 3SG.PRF spoil  
 ‘All the coffee has spoiled’.

### 3.2.1.1.4. The distributive meaning of *gbà*

*Gbà* constructions with distributive and collective meanings do not differ formally, they depend on the general context. The referent group can be definite (if the NP has the plural marker *dū*), as in

<sup>6</sup> However, it should be mentioned that the use of the word *bē* ‘man, human’ without plural marker in combination with *gbà* is preferable even in the contexts where, according to the general rule, one would expect *-dū*. This particularity should be probably explained through lexicalization.

<sup>7</sup> The subject NP looks like a left-dislocated topic, however, this interpretation is not necessarily correct. In fact, the demonstrative determiner *yā* stems from a demonstrative adverb used in a non-verbal relative clause (see 2.10.3.), and it is necessarily followed by a 3SG nonsubject resumptive pronoun (it can be elided, but its structural slot is there). Therefore, in the synchrony, this construction can be viewed as sufficiently grammaticalized and non-topical.

(81, 82b)), in which case we have a partitive construction, or indefinite (withouth plural marker, cf. (82a)).

(81) *Pɔ̃-dũ gbà wà ǵɔ̃.*  
village-PL all 3PL.PRF burn

‘All the villages (of the canton) have burnt (one by one)’.

(82a) *Yĩ gbáǎdũ pɔ̃dɛ̃ gbà ǵú yɔ̃*  
1PL.EXCL.EXI stop\NEUT village.CMM all in CONS

*yĩ ǵɔ̃ bàà.*  
1PL.EXCL.JNT vehicle prepare\JNT

‘We stopped in each village to repair the car’.

(82b) *Yĩ gbáǎdũ pɔ̃dɛ̃-dũ gbà ǵú yɔ̃*  
1PL.EXCL.EXI stop\NEUT village.CMM-PL all in CONS

*yĩ ǵɔ̃ bàà.*  
1PL.EXCL.JNT vehicle prepare\JNT

‘We stopped in each village (without exception) to repair the car’.

In (81) the distributive meaning is combined with partitive (‘all of the villages’). If the plural marker is removed (*Pɔ̃ gbà wà ǵɔ̃*), we get a collective reading with a reference to an indefinite group with vague limits: ‘villages have burnt all at once, and the group of the villages which have burnt is not predefined’.

In (82b), the situation is represented in a way that the travellers stopped punctiliously in every village they met, in order to delve into raparation works, so that the entire set of the villages was brought into play. (82a) interpretes the situation in a more realistic way: the travellers stopped many times, however, the speaker does not pretend that each village on the road was marked this way.

If necessary, the distributive meaning can be reinforced lexically, through the abovementioned adverb *dódó* in its distributive meaning ‘one by one’.

(83) *Dàdà (bɛ̃) gbà sú dódó kɔ̃ ú à ǵà.*  
pineapple fruit all take one.by.one that 2SG.SBJV 3SG.NSBJ see

(Here is a pile of pineapples, some are rotten.) ‘Take each pineapple and examine it’.

### 3.2.1.1.5. Generic quantification

*gbà*-constructions for generic quantification are formally similar to those for INDEF-quantification. Normally, the NP defined by *gbà* has no plural marker, and when it occupies the subject position, the plural auxiliary is used.

(84) *Gwǎdǎ gbà wò bɔ̃ ǵwɛ̃ɛ̃ bà.*  
cat all 3PL.EXI appear\NEUT leopard on

‘All cats resemble leopard’.

(85) *Gwǎdǎ gbà wò bɔ̃ kwǎǎ.*  
cat all 3PL.EXI appear\NEUT RECP.SUB

‘All cats are alike (resemble each other)’.

(86a) *Bǎŋ gbà wò dʒʒdʒbɛ̃-dũ ká.*  
Jula all 3PL.EXI merchant-PL with

‘All Jula<sup>8</sup> are merchants’.

Sometimes a generic reading is allowed for a NP with the plural marker (86b, 87), however, it coexists with a specific (definite) interpretation which is preferable.

(86b) *Bǎŋ-dũ gbà wò dʒʒdʒbɛ̃-dũ ká.*  
Jula-PL all 3PL.EXI merchant-PL with

‘All Jula are merchants’, two interpretations: (i) all the Jula who are included into a particular group of people are merchants; (ii) all Jula of the world are merchants.

(87) *Wũ dɔ̃ yɔ̃ dǎ(-dũ) gbà kǎ.*  
meat desire 3SG.EXI child(-PL) all do\NEUT

‘All children like meat’, with two interpretations: (i) all the children who are in the group in question; (ii) all children of the world.

### 3.2.1.1.6. *gbà* in the free choice context

When the free choice meaning (‘any’) is expressed, the NP defined by *gbà* carries no plural marker (88), and when this NP occupies the subject position, the auxiliary is singular (89, 90).

(88) *Dǎ ɔ̃ yā yɔ̃ dɔ̃ bɛ̃ gbà*  
child REL.3SG.JNT here 3SG.EXI go\NEUT human all

<sup>8</sup> Jula is generic name for all ethnic groups in Côte d’Ivoire speaking Manding languages.

*sāl-bō-*

tiredness-remove-INF

‘This child will tire anyone’.

(89) *Wū gbà yǎ bǎ-pà ká.*  
meat all 3SG.EXI eat-thing\IZF with

‘Any meat is edible’.

(90) *Bē gbà yǎ bǎǎ à bǎ ǎ yā*  
human all 3SG.EXI can\NEUT 3SG.NSBJ on 3SG.JNT work

*bā ká.*

ART do\JNT

‘Any person can do this job’.

The singular auxiliary is the most remarkable feature of the free choice construction with *gbà* distinguishing it from the DEF- and GEN-constructions. For example, the singular auxiliary allows the free choice reading in (91a).

(91a) *Dēbǎ gbà yǎ sūà-sū.*  
woman all 3SG.EXI untruth-ADJ

‘Any woman is a liar’.

If the singular auxiliary is replaced by the plural one, the meaning of the construction is generic.

(91b) *Dēbǎ gbà wò sūà-sū.*  
woman all 3PL.EXI untruth-ADJ

‘All women are liars’.

So, a singular form of the auxiliary excludes all other interpretation, apart from the free choice one, the inverse is not true: a plural form of the auxiliary does not necessarily exclude the free choice reading in an appropriate context, cf. (92).

(92) *Dǎǎ-dǎ-bē gbà wò dǎ-*  
market-buy-human\IZF all 3PL.EXI go\NEUT-3SG.NSBJ

*pǎ-* *ū bā dǎǎ yǎ gbéé.*  
say-INF 2SG.NSBJ POSS market 3SG.EXI difficult

‘Any buyer will tell you that your goods are overpriced’.

If the semantics of the predicate (e.g., a reciprocal one) implies necessarily more than one participant, the plural auxiliary and even a plural marker on the subject NP may be obligatory and compatible with the free choice meaning (93).

(93) *Tǎǎǎdǎ-dū gbà wò wò kó wò gú-mǎ.*  
friend-PL all 3PL.EXI PL.REFL RECP.CMM voice inside-hear\NEUT

‘Friends always understand each other’ (any couple of friends).

Lexical means, such as the noun *sūū* ‘sort’, can be brought to play in order to avoid ambiguity in favour of the free choice interpretation (94).

(94) *Yǎ yā sūū gbà ká.*  
3SG.EXI work sort all do\NEUT

(Context: Jean horribly needs money.) ‘He catches at any job’.

Among all the contexts where the free choice meaning can be expected on typological grounds (Tatevosov 2002, 147-155), *gbà* expresses it in the following ones: modal probability (88, 90, 92), non-prospective future and habitual (94), generic (91a, 93).

### 3.2.1.1.7. Summary: formal means and semantics of the *gbà*-construction

Table 3. Semantics of the *gbà*-construction in relation with the character of the NP and the choice of the auxiliary

Semantics of the construction	Form of the NP	Auxiliary
Quantification of definite groups, collective meaning (DEF-quantification)	plural (- <i>dū</i> )	plural
Distributive meaning, definite plural	plural	plural
Quantification of indefinite (referent) groups, collective meaning (INDEF-quantification)	singular	plural
Distributive meaning, indefinite group	singular	plural
Quantification of generic sets (GEN-quantification)	singular	plural
Free choice meaning	singular	singular (plural allowed)
Wholeness (CMP-quantification)	singular, definite; count	singular

	words	
Uncountable nouns (masses, liquids)	singular	singular

### 3.2.1.2. *pépe* ~ *péé*, a distributive modifier

Among both variants of the determiner, in my corpus the full one (*pépe*) is much more frequent than the shorter one.

Most often, *pépe* appears together with *gbà* (see in detail 3.2.1.3); in this section, however, an autonomous use of *pépe* (without *gbà*) will be dealt with. *pépe* has a distributive meaning, and it can also appear in the free choice contexts (both meanings being pretty close, they are sometimes difficult to delimit).

The NP determined by *pépe* may have or miss the plural marker *dũ*, and when this NP occupies the subject position, the auxiliary may be plural or singular. These factors seem to be independent of the semantics of the construction (unlike the *gbà*-construction), they are rather determined by general rules of the expression of plural in Dan-Gwæetaa: for the names of human beings, the plural marker *dũ* is rather obligatory; for the animals it is optional (for big “individualizable” animals it is preferable); for small animals and insects, as well as inanimate nouns, it is rarely used. If a subject NP has a marker *dũ*, or if it is represented by a coordinative construction, the auxiliary is obligatorily plural; otherwise, more complex rules are brought into play.<sup>9</sup>

#### 3.2.1.2.1. The distributive meaning of *pépe*

Most often, the distributed set to which refers the NP determined by *pépe* has indeterminate meaning (95), sometimes generic (96).

(95) *Dàdā bē pépe sú k̄ ú à gā.*  
 pineapple fruit every take that 2SG.SBJV 3SG.NSBJ look  
 ‘Take every pineapple and examine it’ (every pineapple that you find).

(96) *Bāñ(-dũ) pépe wò d̄d̄d̄b̄b̄ ká.*  
 Jula(-PL) every 3PL.EXI merchant c  
 ‘Every Jula is a merchant’.

However, one can find in natural texts some instances of NP with a reference to semantically definite groups with clear limits (97).

(97) *Bā sē, Gbāāgwī sē wāā Sīpl̄r̄ sē,*  
 Man land.CMM Biancouma.LOC land.CMM 3SG.and Sipilou land.CMM

*à-dũ bā bē ȳ yā-sũ ká Gwēētā wò*  
 3SG.NSBJ-PL POSS writing 3SG.EXI put-GER with Gwæetaa voice

*gú, ȳ wò pépe r̄ Dádāñ sē gú,*  
 in CONS voice every REL.3SG.JNT Danane land.CMM in

*à-dũ bā d̄r̄ Blō wò gú.*  
 3SG.NSBJ-PL property be Blo voice in

‘The departments of Man, Biancouma, Sipilou have their writing in the Gwæetaa dialect, and each of those who are in the Danane department, their writing is in the Blo dialect’ [Pame1\_1wɔn\_təng.014].

#### 3.2.1.2.2. Use of *pépe* in free choice contexts

Among all the contexts where one would expect the free choice meaning on the typological grounds (Tatevosov 2002, 147-155), constructions with *pépe* realize it only in two ones, habitual (98-100) and generic (101-103).

(98) *Gbātò ȳ yí pépe bũ.*  
 NOM.M 3SG.EXI water every drink\NEUT  
 ‘Gbato drinks any water’.

In this particular case, noun *yí* appears in its countable meaning ‘sort of water’; see 2.6.3 about such a semantic shift of mass and liquid nouns in the pluralizing context.

(99) *Ȳ yā pépe ká.*  
 3SG.EXI job every do\NEUT  
 ‘He catches on any job’.

<sup>9</sup> See in detail (Vydrin 2013).

- (100) *Bā dā gblú ȳ zī̄-sī̄, ȳ*  
 1SG.POSS child stomach 3SG.EXI pass-DUR 3SG.EXI  
*tò ȳ pā pēpē dā ̄ dī.*  
 remain\NEUT 3SG.EXI thing every rise\NEUT REFL.SG mouth  
 ‘My child has diarrhea often, (because) he puts everything in his mouth’.
- (101) *Wū pēpē ȳ b̄-pā ká.*  
 meat every 3SG.EXI eat-thing\IZF c  
 ‘Any meat is edible’.
- (102) *Gwádā pēpē ȳ kp̄̄sù.*  
 cat every 3SG.EXI sly  
 ‘Any cat is sly’.
- (103) *Bē pēpē wò gā-b̄ ká.*  
 human every 3PL.EXI death-human\IZF with  
 ‘Any human is mortal’.

The determiner *pēpē* is inherently distributive, it does not appear with collective predicates.

### 3.2.1.3. Combination of *gbà* and *pēpē*: an emphasis

Both determiners can go together, in any order: *gbà pēpē* or *pēpē gbà* (in natural texts the sequence *gbà pēpē* seems to be preferable, while *pēpē gbà* is used more rarely and is perceived as more fanciful). In this combination, *pēpē* loses its individualization function and becomes an intensifier of *gbà* communicating the meaning of completeness: ‘all without exception’, ‘altogether’.

- (104) *Gbàtò yà yí gbà pēpē bū.*  
 NOM.M 3SG.PRF water all every drink  
 ‘Gbato has drunk all the water’ (nothing is left).
- (105) *Wē dō ȳ gō gbà pēpē kà.*  
 wine desire 3SG.EXI male all every do\NEUT  
 ‘All the men (without exception) like palm wine’.

This “heavy” form tends to erode its intensive meaning, so that some people use *gbà* in combination with *pēpē* more often than alone<sup>10</sup>, as in (106).

- (106) *Sī̄sī̄bā ȳ pā-dū bā ̄-dū gbà pēpē*  
 immediately CONS thing-PL ART REL.3SG.NSBJ-PL all every  
 ̄ *sìò...*  
 3SG.JNT find

‘Immediately, all these things that were found...’ [Dūw̄].<sup>11</sup>

The usages of the combination *gbà pēpē* are the same as those of *gbà* alone; in any case, I have not found any divergence.

### 3.2.1.4. Reduplication with the connective morpheme *óó* (*óó*-reduplication): the free choice meaning

#### 3.2.1.4.1. The structure and the syntax of the *óó*-reduplication construction

The noun undergoes a full reduplication, and the connective element *óó* is inserted between the reduplicands.

- (107) *Bē óó bē ̄ dū, ā*  
 human any human REL.3SG.JNT come\JNT 1SG.EXI  
*dō à b̄-’.*  
 go\NEUT 3SG.NSBJ beat-INF  
 ‘Whoever comes, I’ll beat him/her’.

The sequence of two reduplicands and their connective element should be undoubtedly interpreted as three words, rather as bound morphemes. An argument against the interpretation of this sequence as a single word is a possibility to define each reduplicand by an adjective (108a), or even by two adjectives (108b), or by a determiner (109).

- (108a) *Gbē z̄d̄dē óó gbē z̄d̄dē, à sú.*  
 dog red any dog red 3SG.NSBJ take

<sup>10</sup> So, in the autobiographical narrative by Daan Dua (the entire volume of the text is 3438 words), the combination *gbà pēpē* occurred 9 times, while the quantifier *gbà* alone appeared 4 times.

<sup>11</sup> In (106), we have a partitive construction, ‘all of the things in question’, where the noun *pā-dū* ‘things’ has a definite article *bā* which is regularly introduced through a relative clause followed by a resumptive pronoun; see 2.10.3.

‘Take any red dog’.

- (108b) *Gbê z̄p̄dē s̄ēēd̄í ńń gbê z̄p̄dē s̄ēēd̄í yà d̄ũ,*  
 dog red small any dog red small 3SG.PRF come  
*b̄āā à k̄l̄.*  
 1SG.PROS 3SG.NSBJ do

‘Whatever small red dog comes, I’m going to chase it away’.

- (109) *Z̄à yíí p̄l̄ bá ńń p̄l̄ bá b̄ɔ̄.*  
 NOM.M 3SG.NEG.PFV thing certain any thing certain eat

‘Jean has eaten nothing (among all the kinds of food which were offered)’ [f186:7].

Prototypically, *ńń*-reduplication concerns nouns, however reduplication can also affect the determinative *d̄é* ‘other’ following the head noun (110) or, in negative contexts, *bá* ‘any, other’ (111).

- (110) *Ȳɔ̄ d̄ò t̄óó d̄é ńń d̄é ɔ̄ d̄ɔ̄*  
 3SG.EXI know\NEUT gravy other any other REL.3SG.JNT be

*à k̄l̄-d̄ē k̄á.*  
 3SG.NSBJ do-MSD with

‘She can cook any gravy’.

- (111) *K̄ó bá ńń bá yíí ḡɔ̄, k̄ɔ̄ yíí*  
 house certain any certain 3SG.NEG.PFV burn that 3SG.NEG.PFV

*k̄l̄ n̄ b̄à k̄á.*  
 do 1SG.NSBJ one with

‘No house burnt, except for mine’.

It seems that we observe here a lexicalization of *d̄é ńń d̄é* and *bá ńń bá* as quantifier expressions.

*ńń*-reduplication is possible for verbs, in this case the verb is nominalized and fronted, while its syntactic position is occupied by one of the dummy verbs *w̄ò* or *b̄ò*. However, not all the verbs are available for this construction (presumably, the limitation is of a lexical nature).

- (112) *D̄ó ńń d̄ó ɔ̄ Z̄à-’ w̄ò tá ḡú,*  
 go any go REL NOM.M-3SG.NSBJ do\JNT walking in

*ȳɔ̄ d̄ũ n̄ s̄āā k̄á.*  
 3SG.EXI come\NEUT 1SG.NSBJ gift with

‘Any time Jean goes to a trip, he comes back with a gift for me’.

The *ńń*-reduplicated construction is often fronted (113) or relativized *in situ* (114), which reflects its pragmatically enhanced status.

- (113) *T̄ò ńń t̄ò, s̄ákp̄ád̄l̄ ȳɔ̄ à b̄ɔ̄.*  
 chicken any chicken mangoose 3SG.EXI 3SG.NSBJ eat\NEUT

‘A mangoose eats any chicken’.

- (114) *Ȳɔ̄ɔ̄ k̄l̄ k̄ò ńń k̄ò ɔ̄-’*  
 3SG.PROS do way.CMM any way.CMM REL.3SG.JNT-3SG.NSBJ

*b̄à, ḡā w̄ò d̄l̄ t̄ò-’ b̄à.*  
 on death affair\IZF FOC remain\JNT-3SG.NSBJ on

‘However may it be, death will come anyway’ [f48:6].

It seems that even when formal means of relativization (the relative marker *ɔ̄*, the 3SG auxiliary of the conjoint set *ɔ̄*, the resumptive personal pronoun) are absent (as in (115a)), we have cases of their omission typical of the allegro style (which is also attested in other constructions, such as focalization phrase, where the relativization mechanism is used). In a more careful pronunciation, these elements reappear (115b).

- (115a) *B̄á p̄l̄ ńń p̄l̄ b̄ɔ̄, ā gw̄á d̄l̄ b̄à*  
 1SG.PRF thing any thing eat 1SG.EXI cat property

*d̄ũ.*  
 give\NEUT

‘Whatever I eat, I give to the cat its part’.

- (115b) *B̄á p̄l̄ ńń p̄l̄ ɔ̄ à b̄ɔ̄, ā*  
 1SG.PRF thing any thing REL.3SG.JNT 3SG.NSBJ eat 1SG.EXI

*gw̄á d̄l̄ b̄à d̄ũ.*  
 cat property give\NEUT

‘Id.’

### 3.2.1.4.2. Semantics of the *ńń*-reduplication

The core semantics of this construction is that of the free choice in the generic context (all the elements of the class in question existing in the world are available for the choice).

(116) *Dá ǒǒ dǎ, wū dǒ yǎ ǎ kǎ.*  
 child any child meat desire 3SG.EXI 3SG.NSBJ do\NEUT  
 ‘Any child likes meat’.

(117) *Gwǎdǎ ǒǒ gwǎdǎ wǒ bǒ kwǎǎ.*  
 cat any cat 3PL.EXI appear\NEUT RECP.SUB  
 ‘All cats are alike’ (litt.: ‘Whatever is a cat, they all resemble each other’).

In the situations where the referent group for the free choice is definite, *ǒǒ*-reduplication is often not accepted. So, when translating into Dan the sentence ‘(Here are my children.) Any (of them) can help you’, my informant first suggested the phrase (118), then indicated that a generic reading of this phrase would be more appropriate.

(118) *Bē ǒǒ bē dǎ ū tǎ-kǎ-’.*  
 human any human go\NEUT 2SG.NSBJ surface-catch-INF  
 ‘Anyone (any person in the world) will help you’.

This limitation seems to be strong, but not absolute. So, the informant allowed the example (119), where the reduplicated construction undoubtedly has a reference to a limited set of objects.

(119) *Bā gǒ-dǔ gǎ ũ bǒǒ ǎ bǎ*  
 1SG.POSS vehicle-PL look 2SG.EXI can\NEUT 3SG.NSBJ on

*ú dǎ ǒǒ dǎ sū.*  
 2SG.JNT other any other take\JNT  
 ‘Here are my cars. You may take any’.

The cases when the reference group is specific indefinite, are not rare:

(120) *Dǎglǒǒ ǒǒ dǎglǒǒ wǒ péē wǎ*  
 youth any youth 3PL.EXI village.this.in 3PL.EXI.3SG.NSBJ

*pǐǎ wǒ Yǒdē sú.*

‘If the child would stay here, he would bother anyone who is here’.

### 3.2.1.5. *ǎ dǎ*-construction

#### 3.2.1.5.1. Morphology

This construction consists of the relative marker *ǎ* fused with the homonymous 3SG pronominal predicative marker (auxiliary) of the conjunctive series, and the verb of being *dǎ* going back to the movement verb *dǒ* ‘go, leave’. However, the fact that the tone of *dǎ* does not change to mid (which

would be necessary when the verb is preceded by an auxiliary of the conjunctive series) signifies that *dʒ* is here not a verb, but a non-verbal copula (although of a verbal origin). However may it be, the original meaning of this construction is ‘which exists’.

The verb *dó* displays various stages of grammaticalization in various constructions. When in its lexical meaning (112), it has vowel *o* and by its tonal behaviour it does not differ from other verbs. In the non-prospective future construction (107) where it appears as an auxiliary verb, a free variation of the vowel, *dó* ~ *dʒ*, is attested (the latter form, with delabialization, dominates in neutral and allegro registers), the grammatical tonal alternation is kept: *dō* ~ *dʒ̄* in the conjoint construction, and *dō̄* ~ *dʒ̄̄* in the neutral aspect construction from which the future construction is derived. As for the construction *ʒ dʒ* (and other constructions where *dʒ* acquires the meaning of being), grammaticalization advances to the next degree. At the morphological level it leads to the abolition of the vocalic variation in favour of the non-labial (i.e., a reduced) vowel. At the same time, the high tone (which is the lexical one) of the lexeme is not replaced with the mid tone, as one would expect when a verb is preceded by an auxiliary belonging to the conjoint set, which signifies that in this context, *dʒ* is not a verb any more.

### 3.2.1.5.2. Syntax

The complex determiner *ʒ dʒ* follows a non-pluralized NP which cannot be pronominalized (a fact that can be easily explained by the etymology of the determiner). Such a NP is usually fronted, and a resumptive pronoun appears in the original syntactic position (124), with the exception of the position of subject where no resumptive pronoun is possible, and the anaphoric function is fulfilled by the auxiliary (125; in this particular example, both *óó*-reduplication and *ʒ dʒ*-constructions are used, which is allowed in Dan-Gwæetaa).

(124) *Wūi ʒ dʒ, dʒ-dʒ wò dō äi*

 child any child REL.3SG.JNT be 3SG.EXI go\NEUT 2SG.NSBJ stand-INF

*t̄*

mountain ART on

‘Any child will guide you to the mountain’.

The fronting of the NP with the determiner *ʒ dʒ* is the most frequent strategy. However, it can be left *in situ* (126), but even in this case a resumptive pronoun is necessary.

(126) *Kūbʒdʒ yà wɔ̄ wɔ̄ kɔdʒi ʒ dʒ̄ äi t̄.*  
 prefect 3SG.PRF affair lie family REL.3SG.JNT be 3SG.NSBJ on

‘The prefect has punished every family’.

### 3.2.1.5.3. Semantics

The principal quantifier meanings of the quantifier *ʒ dʒ* are the distributive and the free choice ones. However, the collective meaning proves to be possible too.

3.2.1.5.3.1. **Distributive meaning** is realized when the determined NP is specific and referential. In particular, when the verbal predicate appears in the perfect construction, the *ʒ dʒ* construction necessarily has the distributive meaning (126, 127, 128).

(127) *Bɛ ʒ dʒ yà dó ʒ*

(128) *Pʒdɛ ʒ dʒ yà gʒ.*  
 village.CMM REL.3SG.JNT be 3SG.PRF burn

‘All the villages have burnt’ (one by one, not all at once).

3.2.1.5.3.2. **The free choice meaning** of the construction *ʒ dʒ* manifests itself in the following typical contexts (Tatevosov 2002, 147-155): modal probability (124, 125, 129, 130), non-prospective future (not very distinct from the modal probability meaning, cf. 124, 125, 130), imperative (131), habitual (132).

(129) *Bē* *ɔ̄* *dɔ̄* *yɔ̄* *bɔ̄ɔ̄* *à* *bá*

(132) *Pābèè* *ɔ̄* *dɔ̄*, *yɔ̄* *à* *bɔ̄*.  
 food REL.3SG.JNT be 3SG.EXI 3SG.NSBJ eat\NEUT  
 (Gbato is not fussy.) ‘He eats any food’.

In the generic context, *ɔ̄ dɔ̄* can appear only with a NP represented by the *óó*-reduplicative construction, so that the free choice meaning is expressed by both means at the same time (133).

(133) *Wū* *óó* *wū* *ɔ̄* *dɔ̄* *yɔ̄* *bɔ̄-pā* *ká*.  
 meat any meat REL.3SG.JNT be 3SG.EXI eat-thing\IZF with  
 ‘Any meat is edible’.

In my data, there are no cases of expression of the contrafactive modality by the means of *ɔ̄ dɔ̄*.

This determinant cannot be used if the elements of the distributive set have no permanent status. So, the *ɔ̄ dɔ̄* construction has been rejected for the translations of the sentences ‘Any buyer will say that your goods are overpriced’ (because ‘buyer’ is a situational status, rather than permanent), and ‘This child will bother anyone’ (because the status of the person watching the child is temporary). This limitation can be explained by the original existential semantics of the expression *ɔ̄ dɔ̄*.

3.2.1.5.3.3. When expressing **the collective meaning**, the construction has a different syntax. First, the resumptive pronoun (or the auxiliary, if the NP in question occupies the subject position) is necessarily plural. Second, in the expression *ɔ̄ dɔ̄*, the 3SG.JNT auxiliary *ɔ̄* can be optionally replaced by 3PL.JNT auxiliary *wó* (134a).

(134a) *Bē* *wó/ɔ̄* *dɔ̄* *wà* *kpà* *wó*

 human all 3PL.JNT be 3PL.P see  
 ‘Id.’

### 3.2.1.6. Indefinite determiner *bá* as a universal quantifier

Free choice meaning in the imperative contexts (a request or a demand) can be expressed by the indefinite determiner *bá*. In this case, *bá* competes (with some semantic differences) with the determinant *dō* ‘one’ and the combination *dō bá*, but also with the determiners and constructions *gbà* (3.2.1.1) *pépé* (3.2.1.2), *X óó X* (3.2.1.4), *ɔ̄ dɔ̄* (3.2.1.5).

(135) *Ū* *dō* *bā* *dɔ̄kwèè* *yā* *à* *bá*

 human certain 3SG.SBJV go 1SG.NSBJ put-INF village-father

*píɔ̄-dɔ̄*.  
 at-LOC

‘Let anyone guide me to your elder’.

*bá* has a universal meaning under direct negation (137), where it undergoes competition with the constructions *X óó X bá* (138), which has an expressive meaning, and *yáá dɔ̄* (139). The latter can be

regarded as a negative analogue of the abovementioned *ɔ̃ d̃ɔ̃*-construction, however, *yáá d̃ɔ̃* is possible only in existential sentences and is therefore in complementary distribution with *bá*.

(137) *Wíí à dlāā wɔ́ bá ká.*  
3PL.NEG.PFV 3SG.NSBJ teach affaire certain with

human self REL 3SG.PROS go 3SG.NEG.IPFV be

‘There is not a person who would like to leave’ [b188:6].

In the direct negation context, an emphatic reduplication of the entire NP (including the indefinite determiner) is possible, accompanied with the substitution of lexical tones with extra-low tone on the second reduplicand (140a). A superintensive triplication is also possible, in which case the first and the third reduplicands keep their lexical tones, while the second one carries the extralow tone (140b). A question rises, whether this reduplication (and triplication) is a sufficient argument to consider *bá* a bound morpheme (a suffix), making one lexeme with the preceding word? For a while, I restrain myself from a final decision on this point.

### 3.2.1.7. Universal D-quantifiers semantic map

Here is a semantic map of universal D-quantifiers (and also the indefinite determiner *bá*) based on Sergey Tatevosov’s matrix (with one modification: the distributive meaning has been included into the matrix, contrary to what Tatevosov suggests).

It turns out that the semantic map by Tatevosov does not explain the evolution of semantics of the elements in question in Dan-Gwætaa. The zone of *bá* occur to be split into three segments, and the zone of *ɔ̃ d̃ɔ̃* is split into two.

Explanation to the map:

The red zone: *bá*

The blue zone: *gbà*

The green zone: *ɔ̃ d̃ɔ̃*

The yellow zone: *p̃ép̃é*.

### 3.2.2. Universal A-Quantifiers

**Syntactically simple** universal A-quantifiers are:

— *kp̃èw̃ō ~ kp̃æw̃ō ~ kp̃æw̃ō* (intensive form: *kp̃èkp̃èw̃ō, kp̃ækp̃æw̃ō*) ‘always’, ‘all the time’, ‘every time’. With predicates designating processes, the meaning of the quantifier is ‘always, permanently, continuously’ (without break) (141), and with verbs for punctual events, it is rather ‘every time’ (142). The quantifier contains an adverbial derivative suffix *w̃ō ~ b̃ō* (going back to

two dummy verbs, see for more details 2.10.4), and the initial element may be etymologically identical to the noun *kpɛɛ* ‘rest, remainder’, however, this etymological link seems to be not perceivable in the synchrony;

— *tō̄ñtō̄ñd̄ɔ̄* ‘never’ (the intensive form: *tō̄ō̄ñtō̄ñd̄ɔ̄*) is a NPI appearing only in negative sentences (143), it cannot be used in non-negative clauses typical for NPI (a general question; a subordinate clause governed by a negative matrix clause, etc.). Another (non-quantifying) meaning of this adverb is ‘by no means’. The quantifier contains an adverbial derivative suffix *-d̄ɔ̄*, however, there is no such word as \**tō̄ñtō̄ñ* in Dan-Gwɛetaa from which the quantifier could have been derived;

— *dō* ‘never, (not) yet’ (only about past events), can appear in negative clauses (144), in the context of general question (145a), in a dependent clause when the matrix clause is negative (145b). In negative clauses, *tō̄ñtō̄ñd̄ɔ̄* and *dō* can combine (145c). This adverb, coming back to the numeral *dō*, can express other adverbial meanings as well: ‘finally’ (an encouragement to act to a hesitating person), ‘directly’ (about a movement), ‘to the end’.

(141) *Á yā kà kpææwō, t̄ɔ̄í yáá ñ ḡò*

*tō̄ñtō̄ñd̄ɔ̄ dō.*  
never ever

‘I doubt you have ever tested milk’.

If *kpææwō* appears in a negative clause, the scope of the sentential negation is the A-quantifier (146a); cf. the situation with *tō̄ñtō̄ñd̄ɔ̄*, where the scope is the predication (146b).

(146a) *Gbātò yáá ɔ̄ ḡò gú-zú kpææwō.*  
NOM.M 3SG.NEG.IPFV REFL.SG head inside-wash always

‘It is not always (not every time) that Gbato washes his head’.

(146b) *Gbātò yáá ɔ̄ ḡò gú-zú tō̄ñtō̄ñd̄ɔ̄.*  
NOM.M 3SG.NEG.IPFV REFL.SG head inside-wash never

‘Gbato never washes his head’.

*Dèdèwō*, also used as a generalized existential A-quantifier (cf. 3.1.2), may have a universal meaning ‘completely, utterly’ (147).

(147) *Bl̄ō yā pā gwææ ká dèdè-wō.*  
bag 3SG.PRF fill cassava with true-ADV

‘The bag is utterly full of cassava’.

*Gbààdɔ̄* ‘entirely’ is an adverb used in the universal meaning with verbs of time duration, such as *kā* ‘do; spend (time)’ or *bá* ‘put; observe (Ramadan)’, cf. (148). Its other (non-quantificational) meaning is ‘truly, absolutely, really’. The adverb is probably derived, with the means of the suffix *-dɔ̄*, from the determiner *gbà* ‘all, entire’ (a locative postposition may have been also involved, presumably *bà* ‘on’, so that the original form might have been *\*gbà-bà-dɔ̄*).

(148) *Yɔ̄ k̄ā s̄ú d̄ō k̄ā ȳúá ḡú gbààdɔ̄.*  
 3SG.EXI RETR moon one do\NEUT illness in entirely  
 ‘He was ill a whole month’.

**Syntactically complex** general A-quantifier is *tɔ̄ŋ gbà ḡú* ‘all the time’ ((149); probably, *yɔ̄ gbà k̄á* ‘every day’ should be also mentioned here).

(149) *S̄iáó z̄à yɔ̄ k̄óókóó tɔ̄ŋ gbà ḡú.*  
 NOM as.for 3SG.EXI house.LOC.INT time all in  
 ‘Siao is at home all the time’ [f91:3].

Besides, *óó*-reduplicated construction can be also used as an A-quantifier (with the meaning ‘every time’), in which case the content verb is nominalized, fronted, and substituted by the dummy verb *wō* in the verbal position (150; more on this nominalization strategy in 2.10.4., 2.12). This strategy cannot be applied to any verb; limitation seem to be of lexical nature.

(150) *D̄ū óó d̄ū ɔ̄ Gbàt̄ò ɔ̄-’ wō B̄áááɔ̄*  
 come any come REL NOM.M 3SG.JNT-3SG.NSBJ do\JNT Man.LOC

*yɔ̄ sièt̄t̄i d̄ò.*  
 3SG.EXI cigarette buy\NEUT  
 ‘Every time Gbato comes to Man, he buys cigarettes’.

### 3.3. Proportional quantifiers

#### 3.3.1. Proportional D-quantifiers

Simplex proportional D-quantifiers are *gbédɛ̄* ‘majority of’ (151), with mass nouns it means ‘major part’; *kp̄l̄idɛ̄* ‘overwhelming majority of’ (152), with mass nouns ‘the great part of’. *Kp̄l̄idɛ̄* can be supplemented by the universal determiner *gbà* ‘all’, the expression *kp̄l̄idɛ̄ gbà* means ‘almost all’. *Gbédɛ̄* is derived by the abstraction suffix *-dɛ̄* from the generalized existential quantifier *gbé* ‘many’, and *kp̄l̄idɛ̄* is derived by the same suffix from the adjective *kp̄l̄i* ‘big’. Both these quantifiers are relational nouns. If the NP containing a proportional D-quantifier occupies the subject position, a semantic agreement by number with the PPM is possible (152); its availability seems to be conditioned by the position of the dependent noun in the animacy hierarchy. So, in (152), *l̄ēb̄ēl̄ɔ̄* ‘rebel(s)’ designates humans, while in (153) *bl̄áá* ‘sheep’ stands for non-humans, and the agreement with PPM is lacking.

(151) *D̄òtl̄óó̄b̄ī ȳà b̄ē gbédɛ̄ d̄é-k̄ā*

 woman majority 3PL.NEG.IPFV livestock kind certain go.up

‘Few women have any domestic animal’.

The meaning of ‘half of’ is expressed by the non-idiomatic phrase *pɛ̃ɛ̃ dō ~ pɛ̃ɛ̃ dō* <half/part-one> (the noun *pɛ̃ɛ̃ ~ pɛ̃ɛ̃* means ‘a part, a share’, and *dō* means ‘one’). It goes with a countable noun, the latter appears in a plural form, and the construction has a partitive meaning (155).

- (155) *Gwēē yà yīl bláá-dū pɛ̃ɛ̃ dō zā.*  
 leopard 3SG.PRF 1PL.EXCL.POSS sheep-PL part one kill  
 ‘The leopard killed a half of our sheep’.

There are also morphosyntactically complex expressions *pɛ̃ɛ̃ kpīl* ‘majority’ (litt. “big part”) and *pɛ̃ɛ̃ sɛ̃ɛ̃ dā* ‘minority’ (litt. “small part”), as in (156).

- (156) *Bē pɛ̃ɛ̃ kpīl-sū wà bō Gbàtò ká,*

 CONS human part small-SLA 3PL.PRF pass NOM.M with

‘A majority of the people has voted for Gbato, and a minority for Jean’.

### 3.3.2. Proportional A-quantifiers

There seem to be no specialized proportional A-quantifiers in Dan-Gwɛetaa. *sìr ~ sɪl* ‘often’ (cf. 3.1.2) can also express the meaning of ‘usually’; a value judgment quantifier *dódó* (cf. 3.1.2) can be used for ‘rarely’.

### 3.4. Morphosyntactically complex modifiers

#### 3.4.1. Complex D-modifiers

##### 3.4.1. Cardinal complex D-modifiers

Syntactically simple modifiers of this type in Dan-Gwɛetaa are few.

There are two synonymous restrictors, *gbéñ* and *sēñ* (both can undergo a full reduplication to express intensity) which go with numerals expressing the meaning ‘as little as’, ‘only’, ‘just’. Their distribution is lexical: *sēñ* appears with the numerals containing the element *dō* ‘one’ (1, 11, 21 etc.),<sup>12</sup> while *gbéñ* goes with all numerals, with the exception of *dō* ‘one’:

- (157) *Wà kwàbɛ̃ kððñ dō gā dō sēñ kú.*  
 3PL.PRF thief ten one bone one only catch

‘Only 11 thieves have been caught’.

- (158) *Yà dū plɔ̃r yààgā gbéñ.*  
 3SG.PRF come village.LOC three only

‘He has come to the village only thrice’ [g6:20].

There are three restrictors expressing the meaning ‘exactly’: *kpɛ̃ɛ̃ñdɔ̃* (*-dɔ̃* is an adverbial derivative suffix, the element *kpɛ̃ɛ̃ñ* has no synchronic etymologization) (159), *dèbɔ̃ɔ̃* <self-bunch> (160), which is otherwise used as a determiner ‘self’, and a floating restrictor *zòò*.

- (159) *Wáá gblú plè wāà wáá kāñ yīlɔ̃sɔ̃r*  
 money thousand two 3SG.and money hundred four

*kpɛ̃ɛ̃ñdɔ̃ dā ñ gò.*  
 exactly FOC 1SG.NSBJ PP

(The price of a rice bag is 12000 francs.) ‘I have exactly 12000 francs’.

- (160) *Bē kððñ dō gā yīlɔ̃sɔ̃r dèbɔ̃ɔ̃ bɔ̃ɔ̃ ñ dɛ̃.*  
 human 10 one bone four self search 1SG.NSBJ before

‘Find me exactly fourteen people’.

A floating restrictor *zòò* ‘exactly’ can either follow a numeral (161a), or the verb (161b), or occupy sentence-penultimate position (161c). In any case, the final position in the sentence is normally occupied by a modal particle *wà* (expressing unpleasant astonishment, insistence, warning, and sometimes politeness).

- (161a) *Wò kððñ dō zòò kɛ̃ɛ̃ wáá bɔ̃ɔ̃ à bā*  
 3PL.EXI 10 one but.how but 3PL.NEG.IPFV be.able 3SG.NSBJ on

*kɔ̃ wò yā bā à kā wā.*

<sup>12</sup> Some people also allow combinations of the restrictor *sēñ* with numerals *sɔ̃ɔ̃dú* ‘five’, *sɔ̃ɔ̃dò* ‘six’ and *kððñ dō* ‘ten’, others do not accept them.

that 3PL.SBJV work ART 3SG.NSBJ do ouch!

(161b) *Wò kòdòḡ dō kěé wáá b̂႗ ẑ႗ à b̂à k̄r wò yā b̂ā à k̄l ŵ.*

(161c) *Wò kòdòḡ dō kěé wáá b̂႗ à b̂à k̄r wò yā b̂ā à k̄l ẑ႗ ŵ.*

‘They are exactly ten, but they cannot do this job’ [d80:15].

In other contexts, *ẑ႗* (with the particle *ŵ* in the sentence-final position) expresses an unpleasant surprise, or (with the particle *ŵ* in the sentence-final position) a concessive meaning.

There are several **verbal constructions** expressing complex quantifying meanings (for which meanings there are no dedicated D- or A-quantifiers):

— *zīr̄* ‘pass; exceed’ with the superessive postposition *t̂à* ‘on (horizontal surface)’ for the meaning ‘more than’ (162) or, with a sentential negation, ‘maximum’ (163);

— *b̂႗* ‘be able; reach’ with the postposition *b̂ā* ‘on (flat surface)’ in a negative sentence, for the meanings ‘less than’ (164) and ‘approximately, nearly’ (165). If the indirect object of the verb *b̂႗* is an alternative construction, the predication expresses the meaning ‘between’ (166). With the sentence negation, this verb expresses a value judgment meaning ‘insufficient’;

— *ŷ႗* ‘approach’ with the postposition *ŝ႗* ‘near’, for the meaning ‘almost’ (167);

— *b̂ō*, a very polysemic verb (also used as a dummy verb) whose prototypical meaning is most probably ‘remove, take out’, can also mean ‘reach (a dimension, a quantity)’. It is in this meaning that it appears in the construction for ‘about, approximately’ (168).

### 3.4.1.2. Complex value judgment D-quantifiers

The meaning ‘too much’ is expressed by a combination of determiners *gbé dèdè* <many self>.

- (169) *Bá bē gbé dèdè dà gō gú.*  
 2SG.PRF human numerous self go.up vehicle in  
 ‘You have put too many people into the car’.

The meaning ‘too few, not enough’ is expressed by the D-quantifier *tšǐ̀bàsù* already discussed in 3.1.1.2.

### 3.4.1.3. Exception modifiers

Practically all exception modifying meanings are expressed by complex sentences, such as ‘all houses burnt, but two did not’ (170) for ‘all but two houses burnt’, or ‘many coffee plantations have yielded, but some Gbato’s ones did not yield’ (171) for ‘most of plantations, except for Gbato’s ones...’

- (170) *Kó gbà wò kī gš, kééǐ à plè dā*  
 house all 3PL.EXI RETR burn\NEUT but 3SG.NSBJ two FOC

- bà dódó dā wíí bā.*  
 one rare FOC 3PL.NEG.PFV fructify

‘Most of the coffee plantations, except some Gbato's ones, have yielded well’.

### 3.4.1.4. Proportional quantifiers

For the meanings ‘more than/exactly/nearly/less than’, see 3.4.1.1.

There are two ways to express the fractions in Dan-Gwæetaa.

1) The denominator is marked by the postposition *tà* ‘on’ and followed by the numerator. The counted noun is mentioned both with the denominator and the numerator (172). This is a standard word order; it can be modified through regular syntactic transformations, such as topicalization (173).

- (172) *Pšdš, bē kòdǐ̀ dō tà bē yǐ̀sǐ̀š dā*  
 village.LOC human 10 one on human four FOC

- wó sǐ̀tǐ̀ bū.*  
 3PL.JNT cigarette drink/JNT

- (173) *Dššgò bléè-sù, bē sšdú tá yúá kī bē plè kù.*  
 week first-ADJ human five on illness RETR human two catch\NEUT  
 ‘The first week, two out of (every) five people grew ill’.

2) A gerundive construction of the disjoint verb *pé-gú* ‘to split’, with the denominator in the position of the indirect object (governed by the comitative/transformative postposition *ká*), while the numerator appears in the next clause as determiner of the noun *péé* ‘part’ (“by splitting X by denominator, it is numerator-part”), cf. example (174). This construction is descriptive, it is less frequently used than the previous one.

- (174) *Bē-dū pé gú-sù š yààgā ká, à*  
 human-PL split inside-GER REL.3SG.JNT three with 3SG.NSBJ

- péé dō wà kwí wò bā.*  
 part one 3PL.PRF Caucasian voice hear

‘One third of the people understand French’.

The meaning of ‘percent’ is expressed as follows: “from 100 existing object, X objects”.

- (175) *Bē kǐ̀j dō š dš, bē kòdǐ̀ yààgā*  
 human hundred one REL.3SG.JNT be human 10 three

- wò kwí wò bā.*  
 3PL.EXI Caucasian voice hear\NEUT

‘Thirty percent of the people understand French’.

The meaning ‘a small minority’ is expressed by the expression *pɛ̃ɛ̃ sɛ̃ɛ̃dɔ́* ‘minority’ (cf. 3.3.1) where the adjective appears in its intensive form:

(176) *Pɔ̃ yā guú kó-dũ wó dɔ̃, à pɛ̃ɛ̃ sɛ̃ɛ̃dɔ́*

‘Not more than two hunters in five can drive’ (litt.: ‘On five hunters, a person does not surpass two people that they might know how to drive a car’).

### 3.4.1.6. Partitives

The partitive meaning can be expressed

— within a NP, through the definiteness (expressed by different means) of the left noun which is interpreted as dependent in relation to the element to its right (which is thus interpreted syntactically as a noun), cf. examples (32) for a partitive construction with numerals, (81, 82b) for constructions with *gbà* ‘all of...’, (155) for a construction with *pɛ̃ɛ̃* ‘half of’. Here is a partitive construction with the nominalized determiner *bá* ‘any’:

(183) *Bíí dũ b̃ɛ̃ yā bá d̃j̃-gà.*  
1SG.NEG.PFV tree fruit this certain taste-look.at

‘I haven’t tested any of these fruits’.

The definite left-side NP can be fronted and substituted with a resumptive pronoun:

(184) *Kwà-b̃-dũ wó gũ bá wà à gbà kú.*  
theft-human\IZF-PL 3PL.JNT be.PST\JNT there 3PL.PRF 3SG.NSBJ all catch

‘All these thieves have been captured’.

Here are some examples of more complex partitive constructions.

The meaning ‘as many as’ is expressed by a clausal intransitive construction with the verb *bɔ̀ɔ̀* ‘to be able; to reach; to be in agreement’, the compared NPs are in coordinative construction; cf. also 3.4.1.1.

(202) *Klànjdíř-dí-dũ bā pìř-gā-sòdò wó-’ kwàà à*  
 school-child-PL POSS iron-bone-horse 3PL.JNT-3SG.NSBJ steal\JNT 3SG.NSBJ

#### 4.4. Mass quantifiers and noun classifiers

The system of noun classifiers in Dan-Gwæetaa is at an early stage of grammaticalization. There are three count words, *gā* ‘grain, bone, drop’, *bē* ‘fruit’, *dǎ* ‘child’ whose formalization is relatively advanced (although there is still a great deal of lexical limitations in their use), and certain other nouns (*kp̄* ‘ball’, *gèè* ‘dead body, carcass’, *b̄* ‘bunch’) seem to evolve in this direction too. The low degree of grammaticalization manifests itself in the fact that the count words are obligatory with certain nouns only; with some others, they are optional; and a great number of Dan-Gwæetaa nouns are combined with numerals without count words. On the other hand, the situation is complicated by the fact that these elements are integrated into a number of compound words (ex., *fáá gā* ‘comb’, *làà gā* ‘moonfish’, *sè dǎ gā* ‘needle’, *pèè gā* ‘adze’, *yé gā* ‘savanna’, *yóò bē* ‘rattle’, *yū bǎ dǎ* ‘cat’, *bī dǎ* ‘intestinal worm’, *sl̄ dǎ* ‘cicada’, etc.), and it is sometimes difficult to decide where we have a count word, and where it is a component of a compound noun.

*gā* ‘grain, bone’ is by far the most productive (and the most grammaticalized) count word<sup>13</sup>. It appears with many collective nouns (names of insects, such as *zē* ‘mosquito’, *zō* ‘gravel’, *kā* ‘body hair; hair of an animal; feather; wing of an insect’, *wū* ‘hair’, *dē* ‘leaves’, *sá dē* ‘paper’, etc.), long objects (*bī* ‘rope’, *d̄* ‘rope, wire’, *yí* ‘river’<sup>14</sup>, *gb̄* ‘petiole of raffia palm’), and some others. The degree of necessity of *gā* vary, which seems to be conditioned both semantically and lexically. So, it seems to be obligatory with names of edible caterpillars (221), with nouns of small bodyparts (*yá* ‘eye’, *s̄* ‘tooth’, *né* ‘tongue’ (222)), with *bī* ‘rope’ (223), with the word *wá* ‘money, 5 CFA francs’ (224), and many others.

(221) *Yō yà kp̄ zòò/gòò gā/\*ø s̄ dū b̄.*  
 NOM.MF 3SG.PRF see caterpillar1/caterpillar2 bone five on

‘Yo has found five brown hairy/big black edible caterpillars’.

(222) *Bá yá/s̄/dé gā/\*ø s̄ dū dē-kā.*  
 1SG.PRF eye/tooth/tongue bone five leaf-do

‘I have tried (medically) 5 eyes/teeth/tongues’.

(223) *Bá bī gā/\*ø s̄ dū d̄.*  
 1SG.PRF rope bone five buy

‘I have bought five ropes’.

(224) *Bá wá gā/\*ø yàà gā dū à dē.*  
 1SG.PRF 5.francs bone three give 3SG.NSBJ before

‘I have given him fifteen francs’.

With many other nouns, the count word *gā* is optional (225–227).

(225) *Bá yí gā/ø yàà gā ká.*  
 1SG.PRF water bone three cut

‘I have crossed three rivers’.

(226) *Bá n̄ kā gā/ø s̄ dū wò.*  
 1SG.PRF 1SG.NSBJ hair bone five extract

<sup>13</sup> For a detailed analysis of the semantics of *gā* ‘bone’ in Dan-Blo (a variety closely related to Dan-Gwæetaa) see (Erman 2005). In the same article, words for ‘grain’ in several other Mande languages are also analyzed.

<sup>14</sup> Without the classifier *gā*, the lexeme *yí* may mean ‘water’ or ‘river’ (or any other water reservoir).

‘I have pulled out five my bodyhair’.

- (227) *Bá tǒ-dě gā/ø sǔǔdǔ dǔ-kā.*  
1SG.PRF ear-leaf bone five leaf-do  
‘I have tried (medically) 5 ears’.

*Bē* ‘fruit’ appears with nouns of fruits (where it realizes its original lexical meaning), but also with nouns for elongated and rather thick (oblong) objects: *dīāā* ‘earthworm’, *kpāī* ‘multipede’, *yúǔǔ* ‘fish’, *blúù* ‘bread’. With nouns other than names of fruits, this count word can be always omitted (or replaced with another count word, see below).

*Dǎ* ‘child’ is used with animate nouns. As a count word, it seems to be always optional.

Certain nouns (names of fishes, of some insects...) can be used with two or even three of the count words, with some semantic modifications, cf. (228), where *bē* appears if the fishes were rather big, *gā* is neutral (with some other nouns, this count word indicates a small size), and *dǎ* implies that the fishes were bought alive<sup>15</sup>.

- (228) *Bá yúǔǔ gā/bē/dǎ yāāgā dǔ.*  
1SG.PRF fish bone/fruit/child three buy  
‘I have bought three fishes’.

The “embryo countwords” *kpǔ* ‘ball’, *gèè* ‘dead body, carcass’, *bǔǔ* ‘bunch’ do not deviate from their original meaning (with the exception of *bǔǔ*). *kpǔ* can be also regarded as a natural segment noun (229). *gèè* and *bǔǔ* are used only with names of animals and imply that the animal is dead, and that its entire body is concerned.

- (229) *Yà bǔ gèè/bǔǔ yāāgā dǔ.*  
3SG.PRF goat corps/bunch three buy  
‘He has bought three entire goat carcasses’.

Mass nouns are quantified using container nouns (230, 231), natural segment nouns (232–234) and measure phrases (235).

- (230) *wē védǔ yāāgā*  
palm.wine glass three

‘three cakes of soap’,

- (233) *bāā dèè yāāgā*  
cassava root three  
‘three cassava roots’,

- (234) *glǔ kpāā yāāgā*  
banana bunch three  
‘three bunches of banana’,

- (235) *kǎflǔ kídǔ yāāgā*  
coffee kilogram three  
‘three kilograms of coffee’.

A count word *yǎ* ‘contents’ (the original meaning is ‘eye’) is used with container nouns.

- (236) *yí kǔǔ yǎ yāāgā*  
water gourd eye three  
‘three gourds of water’.

More precisely, this phrase designates the quantity of water equal to that in three gourds (while the water itself can be placed in a different container, or even spilled on the ground...). If *yǎ* is omitted (*yí kǔǔ yāāgā*), it means that water is necessarily placed in three gourds.

<sup>15</sup> -*dǎ* is also a diminutive suffix, therefore, an alternative reading in this case is ‘three small fishes’.

If used with numerals without count nouns, the mass nouns undergo a semantic shift to the ‘kind of’ meaning: *yí sǔǔdǔ* ‘five sorts of water’, *yěě sǔǔdǔ* ‘five sorts of sand’ (see 2.6.3 for the same semantic shift with the plural marker).

Possibilities of combination of D-quantifiers with mass nouns are reflected in the Table 4.

For the use of noun classifiers with the universal quantifier expressing the CMP-quantification, see 3.2.1.1.3.

#### 4.5. Existential constructions

There are three types of existential constructions in Dan-Gwetaa.

a. A two-argument construction: (S) AUX X, where S is a subject NP (optional), AUX is an auxiliary of the existential series (see Table 1) for an affirmative (237, 238) sentence and of the negative imperfective series for a negative sentence (239); X is an oblique (a postpositional group, a locative noun, an adverb).

(237) *Bǎǎǎglǎǎ yǎ ǎ dǔ dǎ.*  
 papaya.fruit 3SG.EXI REFL.SG tree on  
 ‘Papaya fruits are on the papaya tree’ [c62:7] (litt. ‘Papaya fruit is on its tree’).

(238) *Dǎǎ dǐǐkǐdǐǐkǐ yǎ ǎ gǎ.*  
 knife sharp.ExtINT 3SG.EXI 3SG.NSBJ PP  
 ‘He has an extremely sharp knife’ [f86:7].

(239) *ǎ sǎ yǎǎ n̄ dǎ.*  
 3SG.NSBJ choice 1PL.EXCL.NEG.IPFV 1SG.NSBJ before  
 ‘I have no choice’ [f154:5] (litt.: ‘Its choice is not before me’).

b. A one-argument construction: (S) AUX *dǎ*, where *dǎ* is a defective verb.

(240) *Yǎǎ yǎ dǎ dǎ.*  
 sun.CMM 3SG.EXI be\NEUT today  
 ‘It is very hot today’ [f57:8] (litt. ‘Sun exists today’).

(241) *... kǎ ǎ dǎ dǎ wǎǎ bǎ yǎǎ dǎ.*  
 that 3SG.NSBJ go place other certain 3SG.NEG.IPFV be  
 ‘... for he had no other place to go’ [f2:7] (litt. ‘that another place for him to go did not exist’).

The negation in the existential constructions is expressed by the negative imperfective series of auxiliaries, in the same way as in certain verbal and other non-verbal constructions.

As show respectively examples (237) and (238), the inalienable and alienable possession can be expressed by the existential construction.

#### 4.6. Floating quantifiers

Only restrictor *zǎǎ* ‘exactly’ (see 3.4.1.1) and adverb *zǎǎwǎ* ‘as many as’ (see 3.4.2) can float.

#### 4.7. Bare quantifiers

The following bare quantifiers can function as predicates: numerals (242), *dǎdǎ* ‘a few, a small number’, *gbǎ* ‘many’ (243), *gbǎ dǎdǎwǎ* ‘very much, too much’, *kǎǎ* ‘few’, *sǎǎdǎ* ‘small quantity’, *tǎǎbǎsǔ* ‘a couple, a small number (with negation)’ (244).

(242) *ǎ bǎ kǎ yǎ yǎǎgǎ.*  
 3SG.NSBJ POSS house 3SG.EXI three  
 ‘He has three houses’ (litt. ‘his house is three’) [f77:14].

(243) *Bǎdǎ-kǎ-bǎ-dǎ wǎ yǎ-tǎ-sǎ n̄ gǎ wǎ gbǎ.*  
 work-do-human\IZF-PL 3PL.JNT eye-leave-DUR 1SG.NSBJ PP 3PL.EXI numerous  
 ‘The workers who are waiting for me are many’.

(244) *Bǎdǎ-kǎ-bǎ-dǎ wǎ yǎ-tǎ-sǎ n̄ gǎ*  
 work-do-human\IZF-PL 3PL.JNT eye-leave-DUR 1SG.NSBJ PP

*wǎǎ tǎǎbǎsǔ.*  
 3PL.NEG.IPFV multitude

‘The workers who are waiting for me are not many’.

The following bare quantifiers can function as arguments: numerals, *bǎ* ‘certain’, *bǎ-dǎ* ‘some’, *dǎbǎ* ‘several’, *gbǎ* ‘many’, *gbǎ pǎpǎ* ‘all (emphatic)’, *gbǎ* ‘many, numerous’, *gbǎ dǎdǎ* ‘too many’, *gbǎdǎ* ‘majority’, *kǎǎ* ‘few’, *kpǎdǎ* ‘overwhelming majority’, *kpǎdǎ gbǎ* ‘almost all’, *pǎǎ dǎ* ‘a half’, *pǎǎ kpǎ* ‘majority’, *pǎǎ sǎǎdǎ* ‘minority’, *sǎǎdǎ* ‘little’, *sǎǎdǎ bǎ* ‘several, few’, *tǎǎbǎsǔ* ‘a small number’ (with negation)?

(245) *Dǔǔkwáá-dǔ, yúǔǔ dǔǔ gǔ gǔ, ā ā*  
 market-LOC fish market be.PST\NEUT good 1SG.EXI

*kā plè/gbà/gbé/bá-dǔ/kpíídē dǔ.*  
 RETR two/all/many/certain-PL/most buy\NEUT

‘In the market, fish was not expensive, I bought two/all/many/some/most of them’.

Bare quantifiers are less apt to appear in the subject position, where the quantifiers need to be determined at least by an anaphoric pronoun:

(246) *Bā káá-dǔ gǔ. À gbà/gbé/dē/bá-dǔ/gbé/dódó*  
 1SG.POSS hoe-PL see 3SG.NSBJ all/majority/certain-PL/many/rare

*wǎ yé.*  
 3PL.PRF break

‘Here are my hoes. All/majority/some/many/few of them have broken’.

Bare numerals, in both predicate and argument functions, can be determined by the restrictors *gbéǐ* and *sēǐ* ‘only’. As for the restrictor *kpéǐdǔ* ‘exactly’, it can go with a bare numeral in the argument position only, contrary to *zǔ* ‘exactly’, which accompanies bare numerals only in the predicate position.

#### 4.8. Relation between different types of pronouns

In Dan-Gwæetaa, no existential or negative pronouns are available. An indefinite pronoun does not exist either, there is a determiner *bá* ‘any’ instead (see 3.2.1.6).

4.9. Decreasing D-quantifiers are absent in Dan-Gwæetaa.

#### 4.10. Distribution

There seems to be no restrictions on distribution of quantification NPs, they can assume all syntactic functions proper to NPs. There are no special positions reserved exclusively for quantifiers.

#### 4.11. Scope ambiguities

Scope ambiguity contexts are similar to those found in English.

(247) *Dēbǎ ǔ dǔ yǔ tǎ dō bō.*  
 woman REL.3SG.JNT so.REM 3SG.SBJV song one remove

‘Let each woman sing one song’, OWS: each woman should perform one and the same song; SWS: each woman should perform one song of her choice.

Scope ambiguities in wh-questions:

(248) *Tǎ bǔǔ ǔ dēbǎ ǔ dǔ ǔ*  
 dance which REL woman REL.3SG.JNT so.REM 3SG.JNT

*ǎ bō?*  
 3SG.NSBJ remove\JNT

‘Which song did each woman sing?’ OWS: for each woman, identify her song; SWS: identify the unique song performed by all the women.

However, in the context “N hunters have checked N1 traps” (249), no scope ambiguities have been found.

(249) *Blúkǎbǔ yǎǎgā wǎ dǔǔ kǔǔ dō gā sǔǔdǔ gǎ.*  
 hunter three 3PL.PRF trap 10 one bone five look.at  
 ‘Three hunters have checked fifteen traps (they checked every trap together)’.

#### 4.12. One to one dependency

(250) *Dúú gā dǔ ā ǎ tǎ, ǎ*  
 tree bone other 1SG.EXI 3SG.NSBJ close\NEUT 3SG.NSBJ

*gbàà bō, yà kā dúú kpíí ká.*  
 entire.3SG.PRF appear\JNT 3SG.PRF do tree big with

‘Every grain I planted sprouted and grew into a big tree’.

#### 4.13. Expression of the meaning ‘only’

Simple translations of ‘only’ are possible only with numerals, by the means of the restrictors *gbéǐ* and *sēǐ*, see 3.4.1.1. With other NPs, the restricting meaning is expressed by combination of a personal pronoun of a special (“contrastive”) series with the numeral *dō* ‘one’, usually followed by a definite article (251), a focalizer (252, in a contrastive context), or a restrictor (253).

(251) *Ȳr̄r̄ dō bā ȳr̄ gũ t̄ ð pl̄ z̄ngú.*  
 3SG.CNTR one ART 3SG.EXI be.PST\NEUT mountain two between  
 ‘It (the way) was the only one between two mountains’ [zuase.013].

(252) *Sl̄l̄l̄ ȳr̄r̄ dō d̄l̄ r̄-’ d̄.*  
 pepper 3SG.CNTR one FOC 3SG.JNT-3SG.NSBJ buy\JNT  
 ‘She has bought only pepper’ [f56:5].

(253) *B̄l̄ r̄ k̄l̄ ȳr̄ yáá tó kwí*  
 what 3SG.JNT do\JNT CONS 3SG.NEG.IPFV remain Caucasian

*wò wāà wò w̄éé-d̄ȳ wōō dō s̄ēñ b̄à?*  
 voice 3SG.and voice other-PL 3PL.CNTR one only on

‘Why does it (newspaper) not remain only in French and other languages?’  
 [Pam̄l\_1w̄on\_taong.003].

If the restriction concerns a verbal predication, it is expressed through nominalization and focalization of the verb, as in (254). For transitive verbs, focalization of the direct object of the restricted verb can suffice (255).

(254) *Z̄á, d̄l̄l̄l̄ d̄l̄ r̄-’ b̄, k̄ééñ*  
 NOM.M walk FOC REL.3SG.JNT-3SG.NSBJ remove\JNT but

*yí wē b̄ȳ.*  
 3SG.NEG.PFV wine drink

‘Jean only walked, he didn’t also drink wine’ (litt.: ‘Jean, it’s walking he did, but he did not drink wine’).

(255) *Z̄á, p̄l̄ d̄l̄ r̄-’ b̄, k̄ééñ yí*  
 NOM.M thing FOC REL.3SG.JNT-3SG.NSBJ eat\JNT but 3SG.NEG.PFV

*yí b̄ȳ.*  
 water drink

‘Jean only ate, he did not also drink water’ (litt.: ‘Jean, it’s a thing that he ate, he didn’t drink water’).

#### 4.14. Conversion of D-quantifiers into A-quantifiers with pre-verbal verbs

In Dan-Gw̄etaa there is a productive mechanism of verbal derivation with elements, mainly of locative semantics, added to the verbal stems on the left. These elements, or preverbs, are of ambiguous nature. On one hand, they can be easily separated from the verbal stem by various grammatical and even content words, cf. (256b).

(256a) *Gb̄àt̄ò yà yā ḡ-d̄.*  
 NOM.M 3SG.PRF work head-stand  
 ‘Gbato has finished a work’.

(256b) *Yā bā ḡ yà d̄.*  
 work ART head 3SG.PRF stand  
 ‘The work has been finished’.

On the other, the preverbs display a high degree of semantic integrity with the verbal stem, in particular, in the scope of the preverb’s modifier (257b) and in reduplication (257c).

(257a) *Gb̄àt̄ò yà b̄èd̄é gú-gú-d̄.*  
 NOM.M 3SG.PRF drug in-taste  
 ‘Gbato has tested a drug’.

(257b) *Gb̄àt̄ò yà b̄èd̄é gú s̄éé-d̄l̄ d̄.*  
 NOM.M 3SG.PRF drug in small taste  
 ‘Gbato has tested a drug a little bit’.

(257c) *Gb̄àt̄ò yà b̄èd̄é-d̄ȳ gú-d̄-gú-d̄.*  
 NOM.M 3SG.PRF drug-PL in-taste-in-taste  
 ‘Gbato has tested the drugs one by one’.

As can be seen from (257b), a modifier following a preverb, while preserving formal characteristics of a D-modifier, has the entire verb as its scope. Thus we have here a productive mechanism of adverbialization of D-modifiers. It is true that not every D-modifier is apt to appear after a preverb (which also depends very much on their semantic compatibility), however, it turns out to be possible for a good number of D-quantifiers, cf. (258b, c, d, e).

- (258a) *Gbätò yà à bà dēbà t̄à-kú.*  
 NOM.M 3SG.PRF 3SG.NSBJ POSS wife surface-catch  
 ‘Gbato has helped his wife’.
- (258b) *Gbätò yà à bà dēbà t̄à bá kú.*  
 NOM.M 3SG.PRF 3SG.NSBJ POSS wife surface any catch  
 ‘Gbato has helped his wife in some way’.
- (258c) *Gbätò yà à bà dēbà t̄à gbà kú.*  
 NOM.M 3SG.PRF 3SG.NSBJ POSS wife surface all catch  
 ‘Gbato has helped his wife by all means’.
- (258d) *Gbätò yà à bà dēbà t̄à-dũ kú.*  
 NOM.M 3SG.PRF 3SG.NSBJ POSS wife surface-PL catch  
 ‘Gbato has helped his wife repeatedly’.
- (258e) *Gbätò yà à bà dēbà t̄à gbé kú.*  
 NOM.M 3SG.PRF 3SG.NSBJ POSS wife surface many catch  
 ‘Gbato has helped his wife very much’.

### 5. Summary table

In Table 4, the quantifiers mentioned in this chapter are listed in an alphabetic order (syntactically complex ones are ranged according to their key word). If a lexeme also has non-quantifying meanings, these senses are given {in curly brackets}. In the columns to the right, indications are given concerning their ability to function as D-quantifiers and as A-quantifiers, and about their respective semantics in these functions. For D-quantifiers it is also indicated whether they can determine mass nouns, and whether the preceding NP can be pluralized. Other parameters have not been put into the table in order to avoid its surcharge; these informations can be found in the respective sections of the present chapter.

The adverbialization of D-quantifiers in the constructions with preverbal verbs is not represented in the Table 4, as well as the expression of quantifying meanings by verbal constructions.

Table 4. Summary for quantifiers in Dan-Gwæetaa

	D-quantifiers	With mass nouns	With pl. form	A-quantifiers
Numerals	+	kind of	partitive	+
<i>bá</i>	certain; any; {other}	{other}	–	–
<i>báwō</i>	–	–	–	{again}
<i>dēbǎǎ</i>	exactly (with numerals); {self}	–	{self}	–
<i>dēbǎǎwō</i>	–	–	–	exactly (with numerals)
<i>dèdèwō</i>	–	–	–	utterly; often; for a long time; in great number
<i>dō</i>	certain, a	–	–	ever; never (in negative sentences)
<i>dódó</i>	rare, few	–	some	occasionally; rarely; one by one
<i>dǎbá</i>	several	a little, some	–	–
<i>dǎbábō</i>	–	–	–	a little (small intensity); {at least}
<i>gbà</i>	all, entire (see Table 1)	all	all	–
<i>gbà pépé</i>	all (emphatic)	all (emphatic)	all (emphatic)	–
<i>gbáàdǎ</i>	–	–	–	entirely
<i>gbéǎ</i>	only (with numerals)	–	–	only (with numerals)

	<b>D-quantifiers</b>	<b>With mass nouns</b>	<b>With pl. form</b>	<b>A-quantifiers</b>
<i>gbé</i>	many, enough	much	many, much (partitive)	much, often
<i>gbé dèdè</i>	too many	too much	too much (partitive)	–
<i>gbé dèdèwō</i>	–	–	–	too much, very much
<i>gbédè</i>	majority	major part	majority	–
<i>kéé</i>	few	–	–	–
<i>kpèèwō</i>	–	–	–	always
<i>kpèèṅdṛ</i>	exactly (with numerals)	–	–	exactly
<i>kpîdè</i>	overwhelming majority	the great part of	–	–
<i>kpîdè gbà</i>	almost all	almost all	–	–
X óó X	any, whatever	any (kind of)	–	(nominalization of the verb)
ṛ dṛ	every; any; (all)	any (kind of)	–	–
<i>pépé</i>	every, (all)	(‘kind of’)	–	–
<i>péé dō</i>	a half (of one object or of a group)	–	half of (the group)	–
<i>péé kpî</i>	majority	–	majority	–
<i>péé sèédá</i>	minority	–	minority	–
<i>sēṅ</i>	only (with numerals)	–	–	only (with numerals)
<i>sèédá</i>	(small)	few	–	little
<i>sèédá bá</i>	several, few	small quantity of	–	–
<i>sì</i>	–	–	–	sometimes, often; usually
<i>sìsì</i>	–	–	–	often
<i>sì tṣṣ́ bá-dù gú</i>	–	–	–	often
<i>tōṅtōṅdṛ</i> (NPI)	–	–	–	never
<i>tṣṣ́bàsù</i> (NPI)	a couple, a small number	a small quantity	–	–
<i>tṣṣ́ gú</i> (NPI)	–	–	–	few, insufficiently
<i>tṣṣ́ gbà gú</i>	–	–	–	all the time
<i>zìààwō</i>	–	–	–	as many as
<i>zòò</i>	exactly (with numerals)	–	–	exactly (with numerals)

### Abbreviations

ADJ – adjective; adjectivizer suffix (-*sù*)

ADV – adverbial suffix (-*wō* ~ -*bō*)

ART – definite article *bā*

Atr – attribute

AUT – autonomous pronominal series

AUX – auxiliary

C – consonant

CMM – common case

CNTR – contrastive pronominal series  
COM – comitative case  
CONS – consecutive conjunction (*γʃ*)  
COP – copula  
Det – determiner  
DIM – diminutive suffix  
DO – direct object  
DUR – durative verbal suffix *-sɫ̄i*  
EXI – existential series of PPM  
EXCL – 1 pers. exclusive plural pronoun/PPM  
FOC – a) focalization particle (*dɔ̄* ~ *dɪ̄u*); b) grammatical high tone on certain focalized nouns  
GER – gerundive suffix *-sū*  
IMP – imperative series of PPM  
INF – infinitive marker (extralow tone suffixed to the verb stem)  
INSTR – instrumental/comitative/transformational postposition (*ká*)  
INT – intensive  
IPFV – imperfective  
IZF – isaphet marker (an extralow tone on the noun)  
JNT – conjoint series of PPM; tonal modification on the verbal stem in the conjoint construction  
LOC – locative case  
LOG – logophoric pronoun  
MSD – suffix of masdar (verbal noun, *-dɛ̄*)  
N – noun  
NEG – negative  
NEUT – neutral aspect marker (extralow tone on the verbal stem)  
NOM.F – female proper noun  
NOM.M – male proper noun  
NP – noun phrase  
NPI – negative polarizing item (?)  
NSBJ – non-subject pronominal series  
OO – oblique object  
OWS – object wide scope  
PST – past  
PFV – perfective  
PL – plural  
POSS – possessive marker (*bá, gɔ̄*)  
PP – postposition with a broad meaning (*gɔ̄*)  
PPM – predicative pronominal marker (auxiliary)  
PRES – presumptive series of PPM  
PRF – perfect series of PPM  
PROH – prohibitive series of PPM  
PROS – prospective series of PPM  
Q – general question particle (*ɛ̄ɛ̄*, or a copy of the final vowel)  
RECP – reciprocal pronoun  
REFL – reflexive pronoun  
REL – relativization marker (*ʃ*)  
REM – remote  
RETR – retrospective operator  
S – subject  
SBJV – subjunctive series of PPM  
SG – singular  
SLA – selective marker (*-sū*)

SUB – subessive case or postposition (*bã*)  
SWS – Subject Wide Scope  
TOP – topicalization particle (*zã*)  
V – (a) verb; (b) vowel  
X – post-verbal arguments and circonstants
