HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

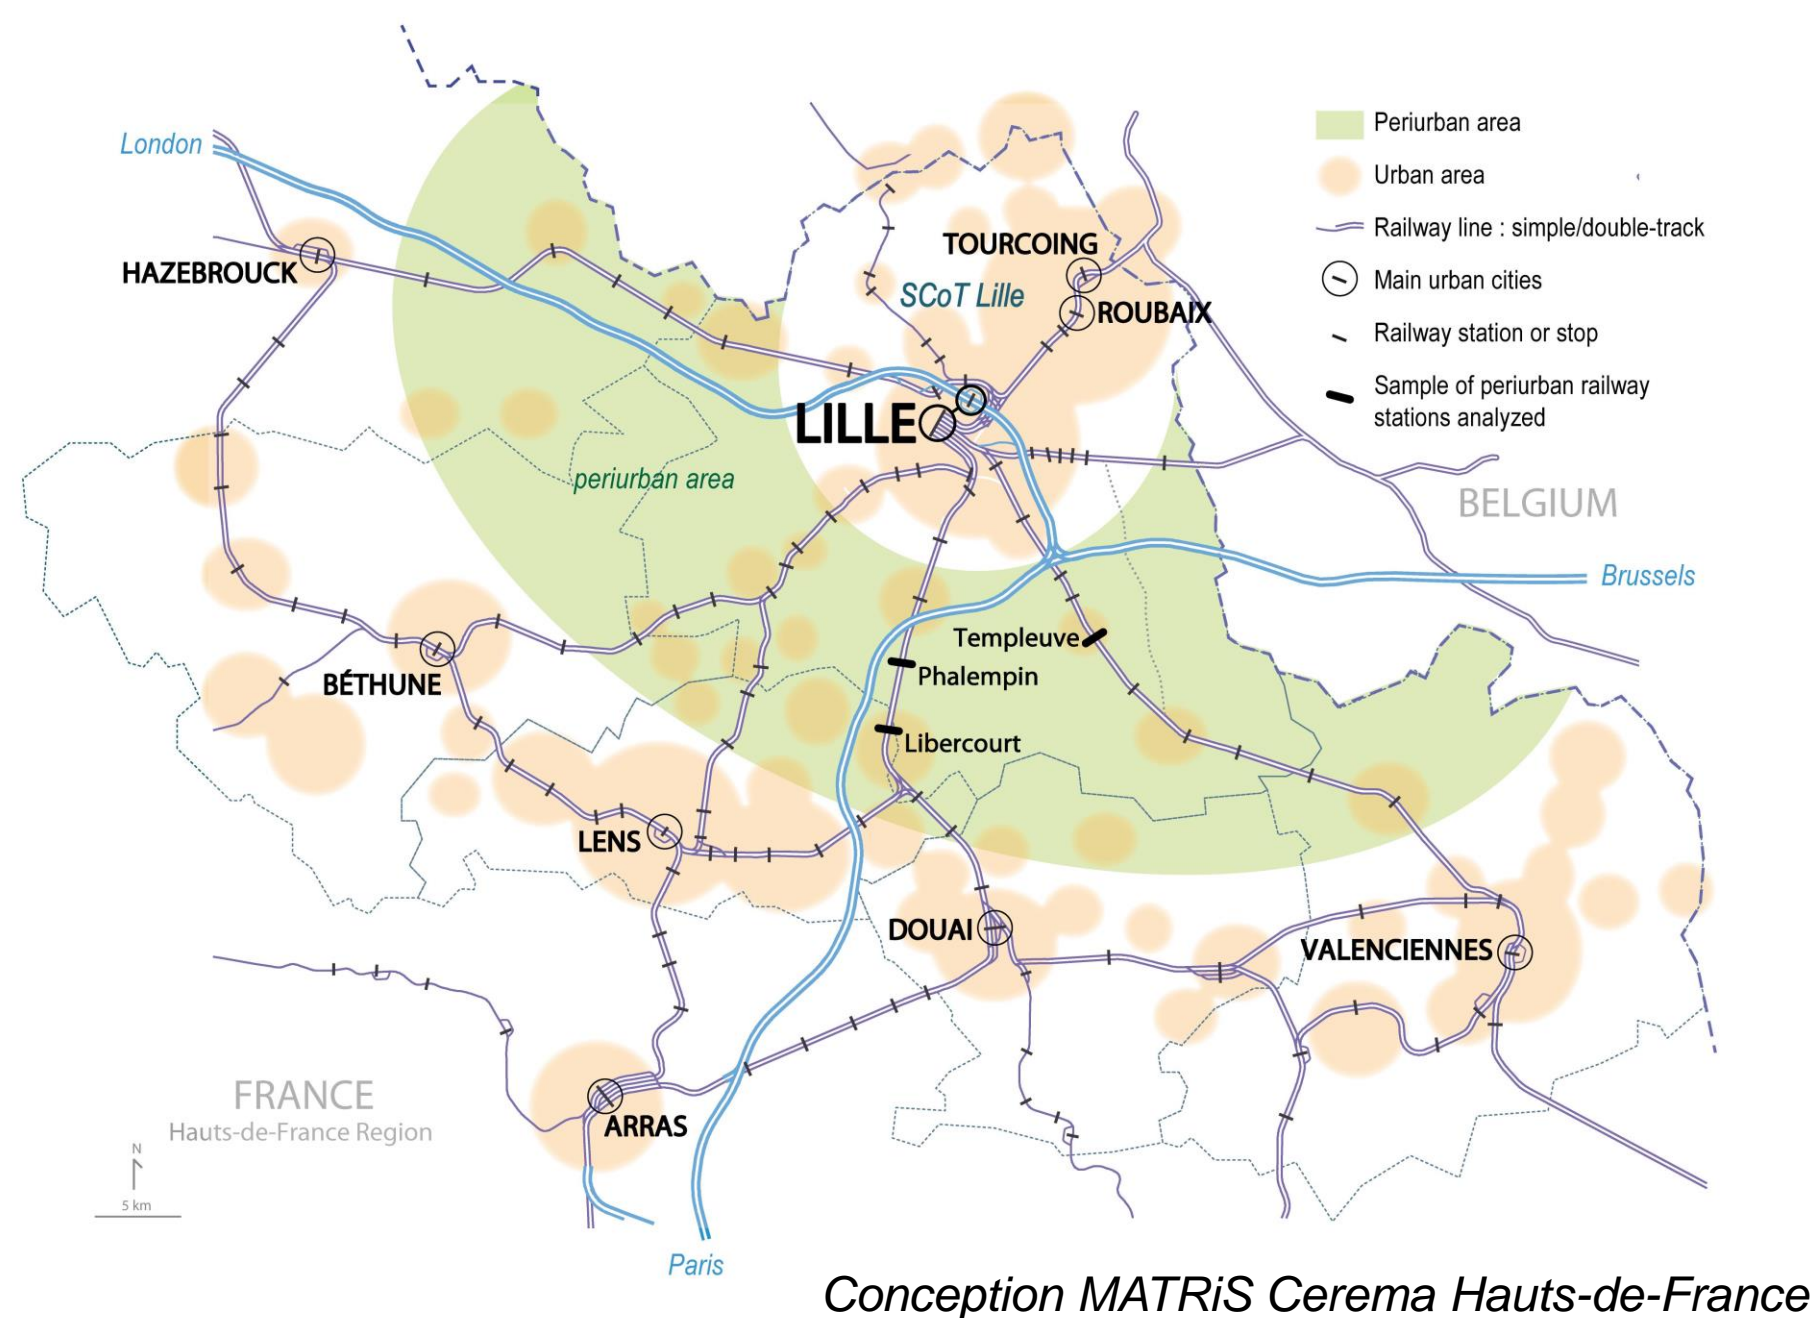

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Context: Valuation of Regional Railway System

- Challenge of both structuring periurban living and managing periurban mobilities through sustainable policies
- Territorial policies of valuation of railway stations (densification, urban re-conquest)
- 3 types of stakeholders involved: public stakeholders, individuals and the private sphere
- Few knowledge about strategies of the private sphere

Focusing on periurban fringe of the metropolitan area of Lille (France): 3 communities (Templeuve, Phalempin, Libercourt)

- Under the influence of the metropolis of Lille (1.72 millions of inhabitants), located 20km from Lille
- Attractive in terms of housing, high standard of living
- Low population density, a predominantly suburban fabric (more than 85% of individual houses)
- Multi-motorized population
- Attractive train services to reach the centre of Lille (frequency, travel time)

Method: building up a specific corpus of data

- 600 property ads published on websites from April 2019 to March 2020
- 10 promotional leaflets of new properties
- 10 face-to-face interviews of real estate agents and notaries

POSTER SESSION

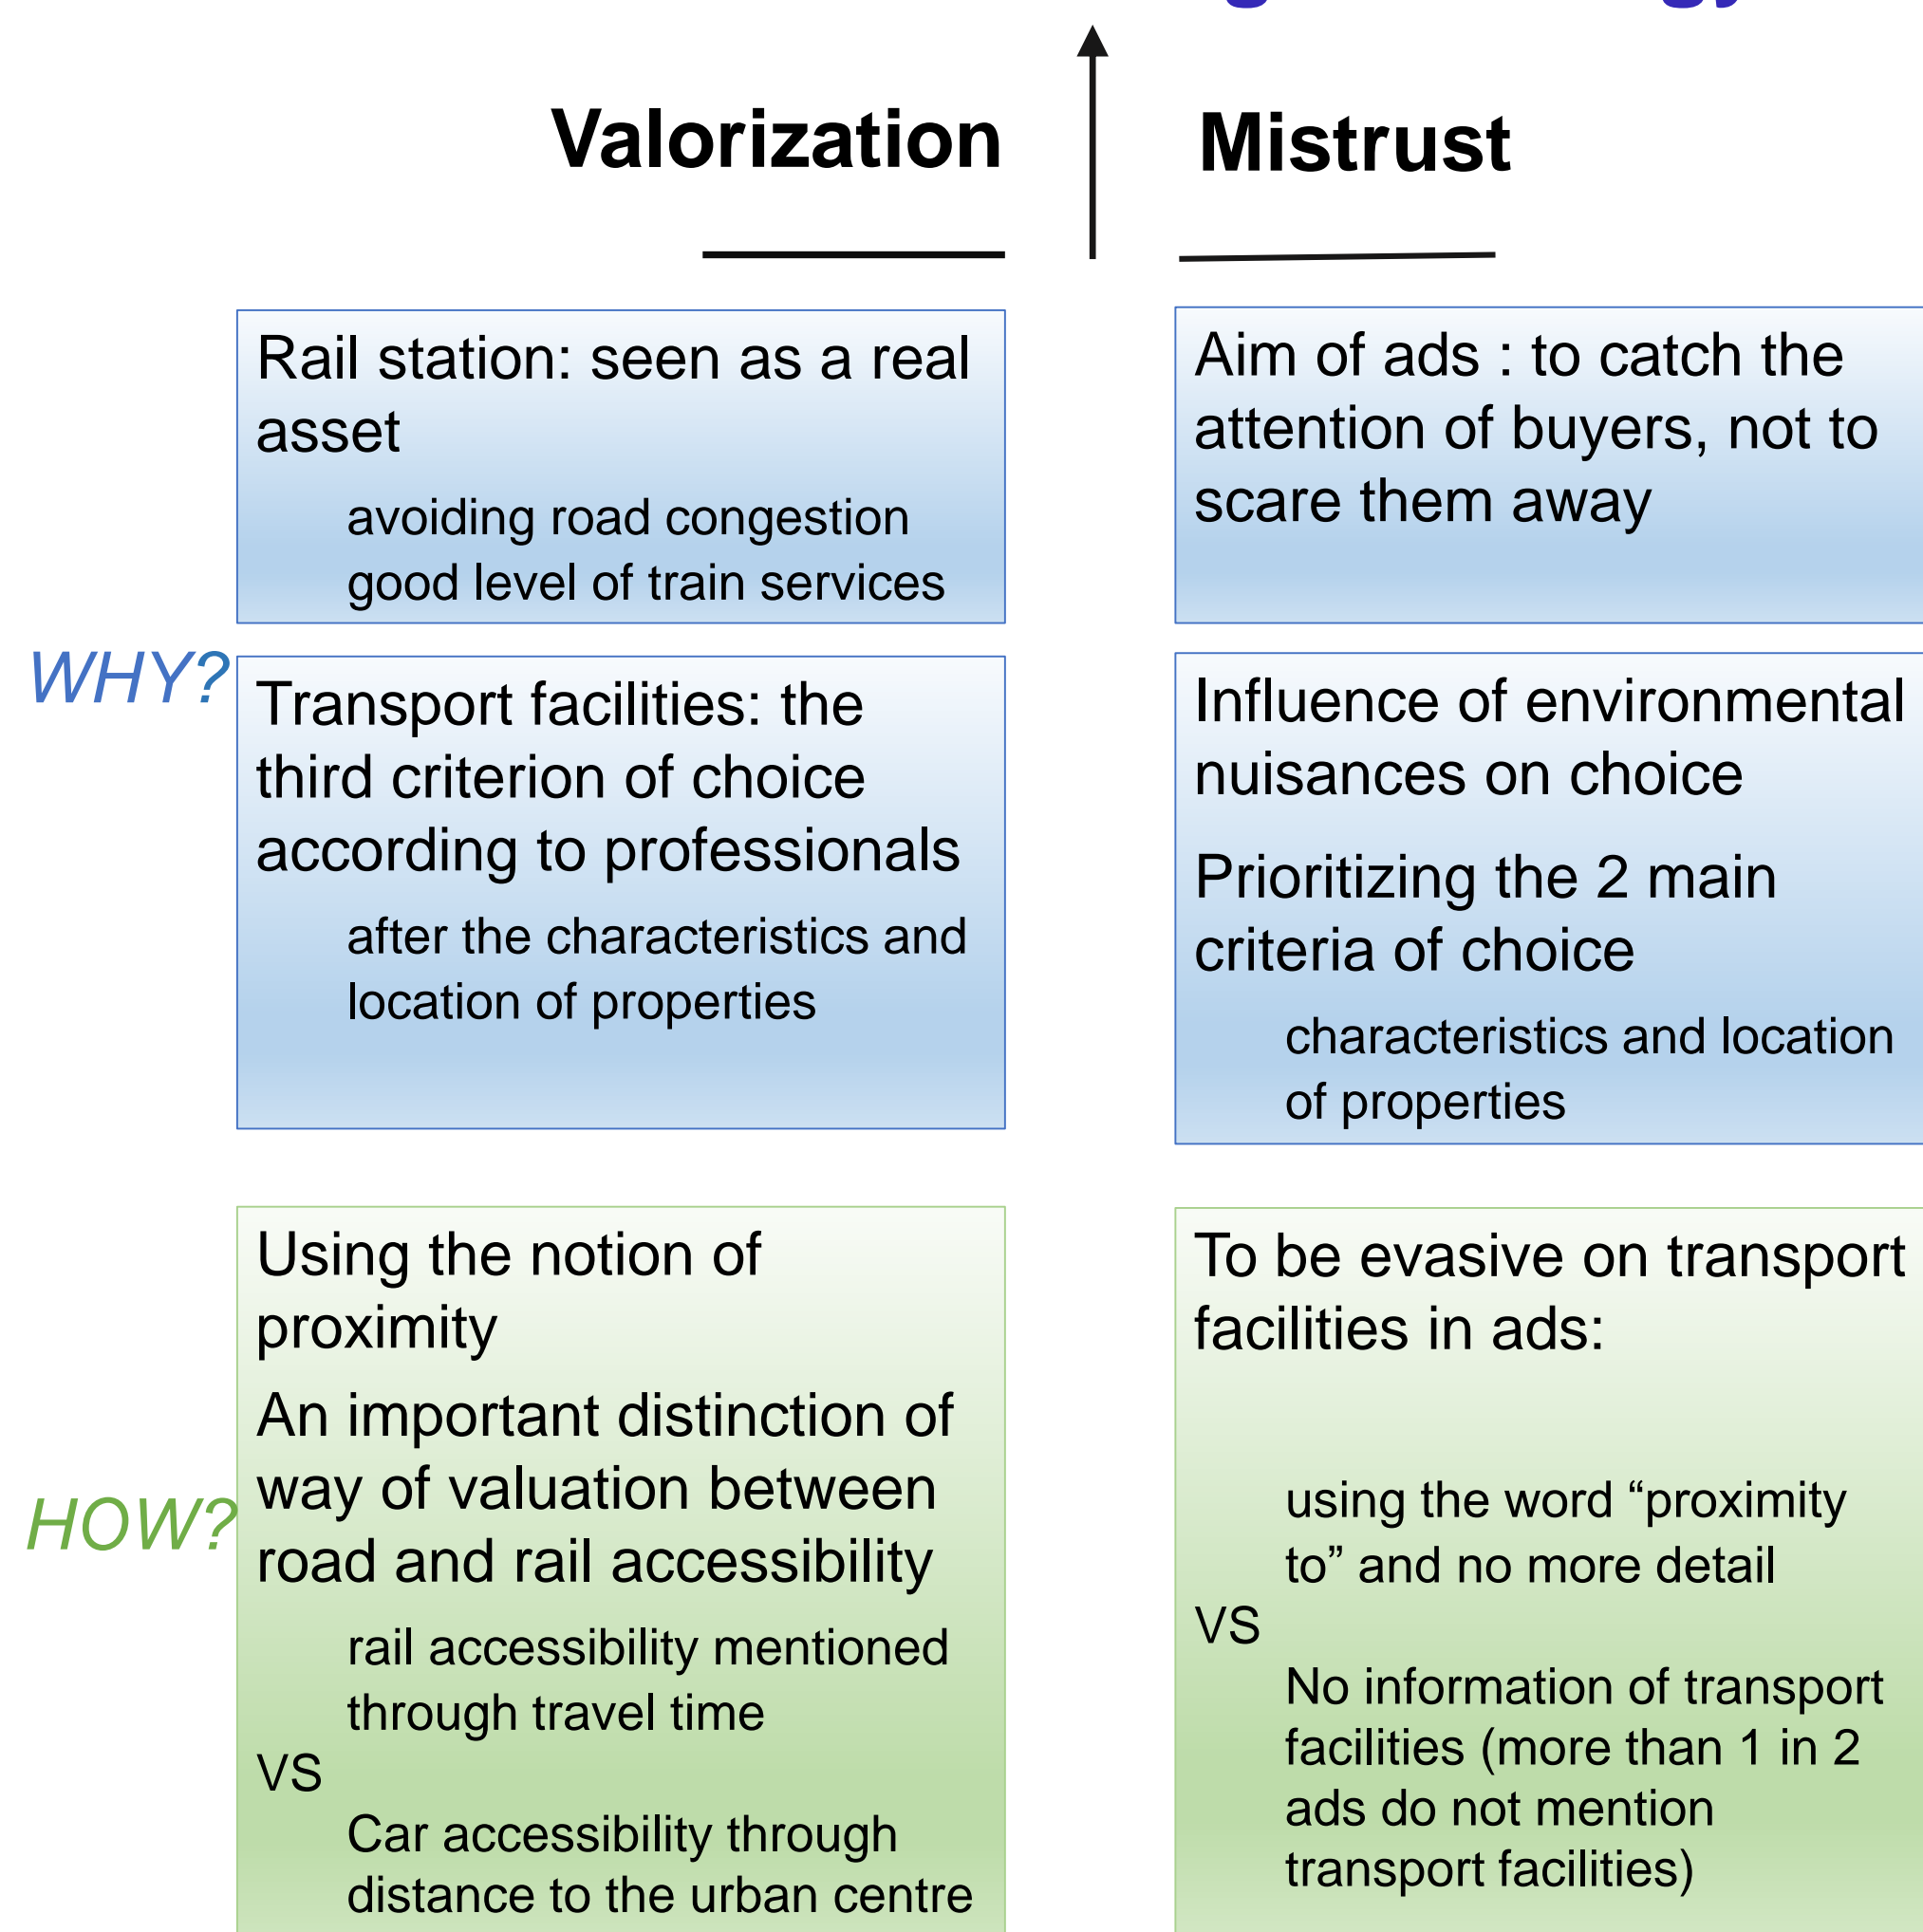

Sophie HASIAK - MATRiS Cerema / FRANCE

Promoting the attractiveness of peri-urban residential areas through public transport services: the strategy of French real estate professionals

Photo credit S. Hasiak

Main results: a double-edged strategy

Conclusion

- Railway stations in periurban areas: an interesting and useful asset to promote periurban housing and residential attractiveness of periurban communities
- Real estate professionals: a player in the valorization of territorial opportunities to some degree
 - ✓ Aware of the need to adapt their economic strategy with the ecological transition issues
 - ✓ But in a specific way of acting
- Challenge of improving knowledge of people behaviors and their preferences for residence since the crisis due to the Covid-19: questioning dependency to public transport?
