Pottery Workshops of Paphos (13th-14th c.)

Local production attested during the 13th century as evidenced by finds of first firing wasters, tripod stilts, glazed wasters and kiln debris in Lemba and throughout Paphos - in particular in the Hellenistic Theater of Kato Paphos excavated by the Universities of Sydney and Avignon.

in the 13th Century**

Nicosia Fabric

The fabric is different from that used in the workshops of Paphos at the same period. The earth used in the workshop of Nicosia is limestone clay, which is hard and contains red, white and black inclusions. After firing, its colour varies from beige to orange.

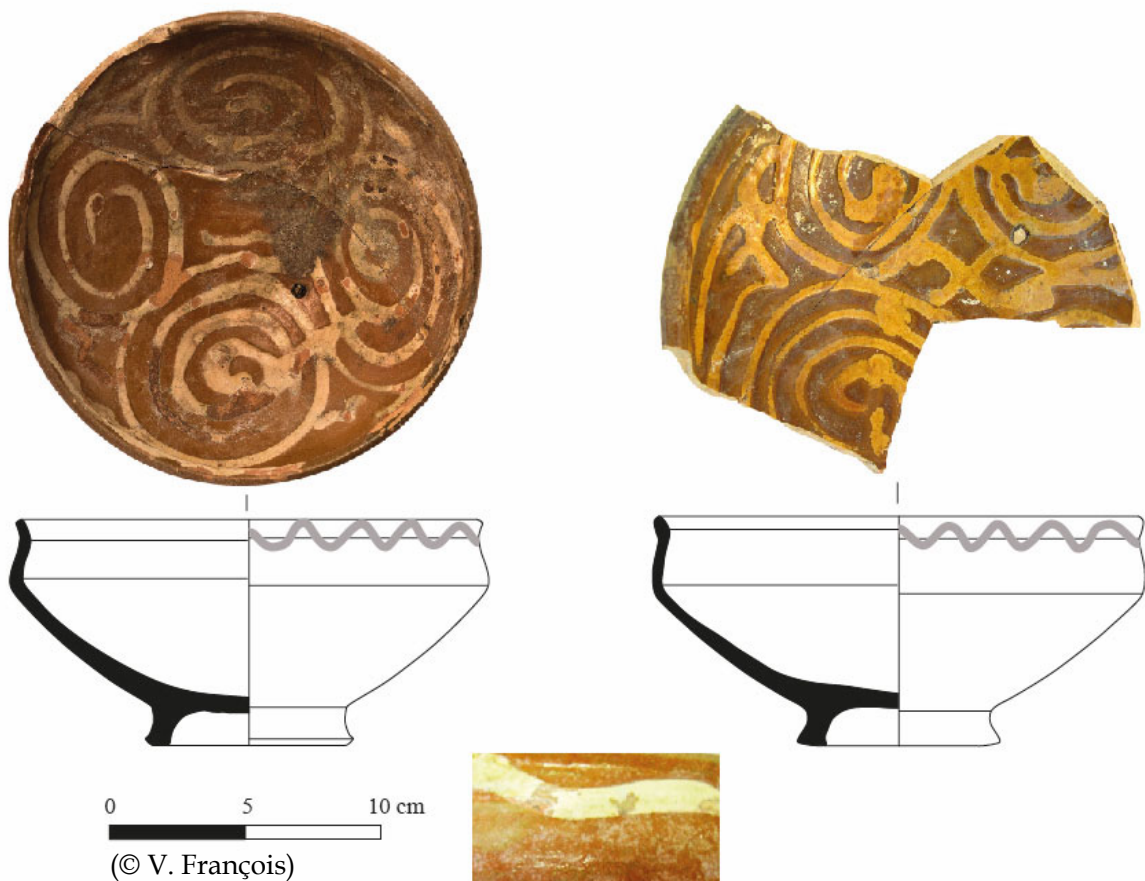

Paphos Fabric

It is a clay rich in iron. The hard fabric is a dark red fine, easily turning grey when over-fired.
