# I – Genealogias das linhagens

### **Notas explicativas:**

- São aqui descritas as genealogias que permitem traçar e delimitar o grupo de base sobre o qual incidiu o trabalho. Esta delimitação seguiu numa primeira fase o critério «ideológico» de linhagem, conforme é definido na 1.ª parte da tese. Assim, deu-se primazia às relações continuadas por via masculina, prolongando aquelas que passavam por mulheres na condição de, por via da transmissão do nome ou das armas heráldicas, estas terem permitido «continuar» a linhagem.
- Como referimos, este critério constitui apenas um trabalho de base, que não corresponde às noções cognáticas do parentesco medieval, em que as relações passavam pelos ascendentes paternos e maternos, por via masculina e feminina. Simultaneamente, e em particular no contexto aristocrático, a imbricação dessas relações permitia a criação de um grupo e a circulação do poder e da «fortuna», material e simbólica. Para dar conta desses efeitos, remetemos para os esquemas II e III, concentrados na renovação de alianças na consanguinidade e na afinidade.

## II – Esquemas de alianças consanguíneas

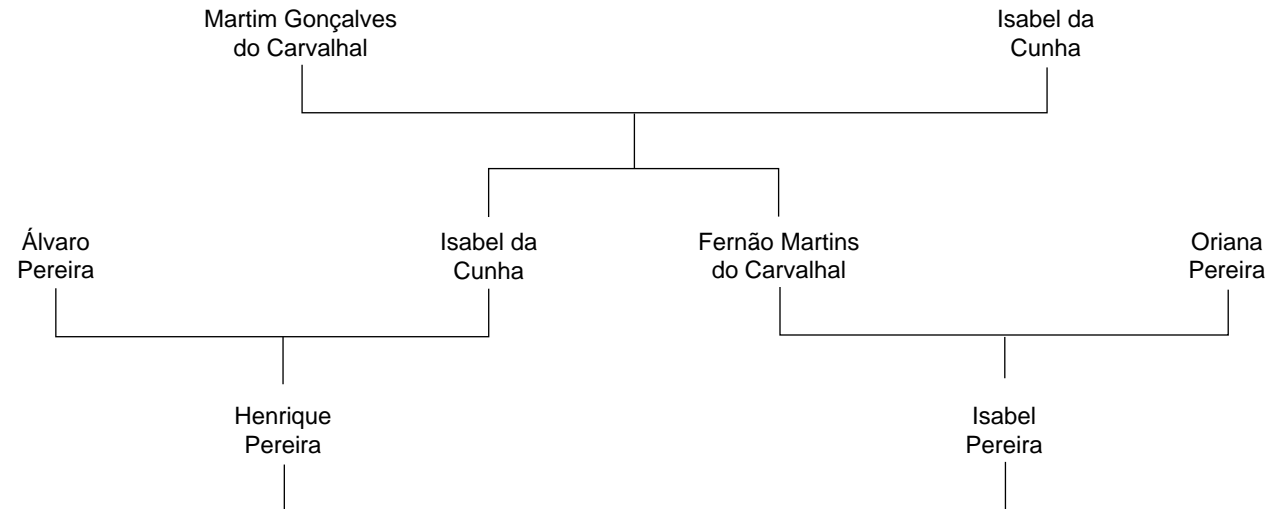

### **Notas explicativas:**

- Só se consideram os casamentos listados na tabela referente (vol. 1 de anexos, tabela 8).
- Apenas se contemplam esquemas genealógicos das relações até ao 6.º grau canónico.
- Nos casos em que foram detetadas várias linhas de ascendência para parentes comuns, foram consideradas apenas as que consubstanciavam linhas mais curtas.
- Cada casamento é identificado com o número referente à tabela 8 (vol. 1 de anexos)

# III – Esquemas de alianças na afinidade

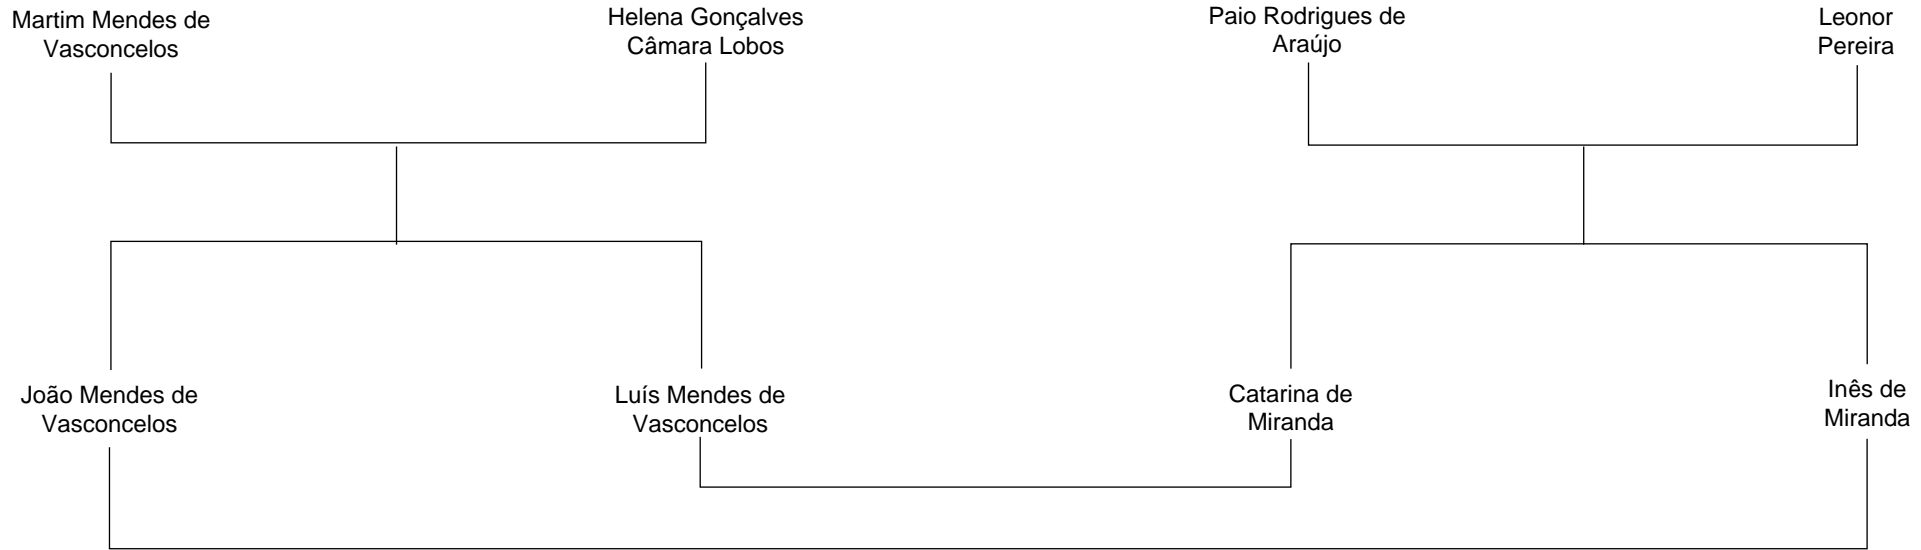

### **Notas explicativas:**

- Os esquemas são apresentados por ordem de tipologias, partindo dos casos mais simples (casamentos entre pares de irmãos) até aos esquemas mais complexos, seguindo a ordem de exposição da tabela onde são descritos os casos.
- Detetar casos de renovações de alianças na afinidade faz-se a partir de um amplo trabalho de reconstituição genealógica. Quanto mais se alarga o inquérito, mais casos aparecem. Portanto, e contrariamente ao caso da consanguinidade, este corpus não se fixará apenas nos grupos linhagísticos que elegemos para um estudo aprofundado. Optamos portanto por aqui inserir todos os casos que encontrámos, que abarcam a consanguinidade e afinidade do grupo de base.
